We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

Whilst we have generally been successful in execution of our business strategy in the past, there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

- 30. *We face competition from existing and new entrants, which in turn can adversely affect our margins.***

As the market is expanding, smaller players are getting larger orders which will enable them to compete with existing large players, which will going forward increase competition. Presently, there are very few players competing for large orders, however over next couple of years, once various small producers start building up prequalification's, the competition in this space could intensify. This could result in margins coming under pressure.

- 31. *Due to the absence of any written agreements with our vendors/suppliers, we are exposed to risks due to supply obligations not clearly specified in writing.***

We do not have written agreements with our vendors/suppliers and operate on a purchase order system. Due to the absence of any formal contract with our vendors/suppliers, we are exposed to the risks of irregular supplies or no supplies at all and delayed supplies which would materially affect our results of operations.

- 32. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and

proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

**33. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.***

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

**34. *We have certain contingent liabilities, which have not been provided for. Crystallization of any of these contingent liabilities may adversely affect our financial condition.***

The Contingent liabilities of our Company not provided for, as certified by our Board of Directors is as under:

(Rs. In Lakhs)		
Sr. No.	Nature of Liability	Amount as on June 30, 2013
1.	Demand by Income Tax Authorities being disputed by the Company	2.35
2.	Demand under DVAT/DST Act and CST Act	186.49
3.	Estimated amount of contracts remaining to be executed on capital account (net of advances)	Nil
4.	Outstanding Bank Guarantees	Nil
5.	Claims against the Company not acknowledged as debts	Nil

In the event any of these contingent liabilities gets crystallized, our financial condition may be adversely affected.

**35. *Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors.***

Till date our Company has not paid any dividend. The amount of our future dividend payments, if any, will depend upon various factors such as our future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors. There can be no assurance that we shall have distributable funds or that we will declare dividends in the future. Additionally, the terms of any financing we obtain in the future, may contain restrictive covenants which may also affect some of the rights of our shareholders, including the payment of the dividend.

**36. *Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline***

The economic environment, pricing pressure and decreased employee utilization rates could negatively impact our revenues and operating results. In the event that the Government of India or the government of another country changes its tax policies in a manner that is adverse to us, our tax expense may materially increase, reducing our profitability.

## II. Risk related to this Issue and our Equity Shares

**37. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.**

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

**38. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.**

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

**39. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.**

- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to the Metal Trading Industry ;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies;
- g. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

**40. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.**

The Issue Price of our Equity Shares has been determined by fixed price method. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page 85 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity

Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

***41. You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.***

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with Section 40 of the Companies Act, 2013 in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

**B. EXTERNAL RISK FACTORS**

***42. We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards ("IFRS"). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.***

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the "IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of - implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

***43. Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.***

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

***44. Financial instability in Indian financial markets could adversely affect our company's results of operations and financial condition.***

In this globalised world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy.

Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

**45. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between nonresidents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

**46. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

**47. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.***

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

**48. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.***

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other taxes by the Central and the State Governments may adversely affect our results of operations.

**49. Demand for our services may decrease during an economic recession which may adversely affect our profitability and financial condition.**

The Metal Trading industry historically has experienced cyclical fluctuations in financial results due to economic recession, downturns in business cycles of our customers, fuel shortages, interest rate fluctuations, and other economic factors beyond our control.

**50. Our Company's Equity Shares are proposed to be listed and traded on BSE SME Platform, which is of recent origin and may take time to establish**

BSE SME Platform was launched by BSE on 13th March, 2012. Such an SME platform is of recent origin and may take time to establish in markets. Since its launch till the date of this Draft Prospectus, 34 (Thirty Four) companies have been listed on BSE SME Platform and another 3 (three) companies listed on NSE SME Platform – Emerge. Investors may still not have strong confidence for initial subscription and / or secondary market trading in SME scrip. Moreover, it is proposed to list the Equity Shares of our Company only on BSE SME Platform. Investment in this Issue, thus, could be riskier.

**51. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.**

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

**52. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.**

India has experienced natural calamities such as earthquakes, tsunami, and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operation as well as the price of the Equity Shares.

**53. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.**

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax ("STT") is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

## SECTION III INTRODUCTION

### SUMMARY OF OUR INDUSTRY

#### Overview of Indian Economy:

India, the world's largest democracy in terms of population (1,220 million people) had a GDP on a purchasing power parity basis of approximately INR 58 trillion in June 2013. This makes it the fourth largest economy in the world after the United States of America, European Union and China. The outlook for India's medium-term growth is positive due to a young population and corresponding low dependency ratio, healthy savings and investment rates, and increasing integration into the global economy. (Source: CIA World Fact book as on April 22, 2013 & [http://eaindustry.nic.in/Key\\_Economic\\_Indicators/Key\\_Economic\\_Indicators.pdf](http://eaindustry.nic.in/Key_Economic_Indicators/Key_Economic_Indicators.pdf)).

(Source: <https://www.cia.gov/library/publications/the-world-factbook/geos/in.html>)

(Source: "Fact Book" from Department of Economic Affairs, Ministry of Finance, Government of India, June 2012)

The Indian economy's performance in FY 2012-13 and Q1 FY 2013-14 was marked by slowing growth and widening fiscal and current account gaps. The slowdown was partly rooted in external causes, while domestic causes like higher inflation, supply side constraints and policy inaction also put a drag on the economy. With GDP growth of 4.4% in Q1 FY13-14, the economy grew at its slowest quarterly pace in four years with mining, manufacturing and construction dragging growth down. Weakening of both domestic and external demand contributed further to the slowdown. Post 2008 crisis, Reserve Bank in response to the high inflation persisted with tightening till October 2011 and paused before easing in April 2012. The inflation has eased in last year though slowing growth, and widening twin deficits on the back of policy inaction along with global flight to safety amidst a deepening euro area crisis put pressures on the financial markets and the exchange rate during the year. As a result, Rupee has depreciated significantly in last one year further widening India's macro-economic problems.

### GDP-real growth rate (%)

(Source: <http://www.indexmundi.com/g/g.aspx?v=66&c=in&l=en>)

The Indian economy was one of the fastest growing economies in the post-crisis period. During 2012-13, however, there was continuous deceleration of economic activity in each of the four quarters which pushed the expansion of the economy to below potential and the economic growth hit 4.4% in Q1 of FY 2013-14.

Growth slowed down due to multiple factors. One of the reasons was the persistence of inflation at a much higher level than the threshold for two successive years. Persistent and high inflation necessitated continued tightening of monetary policy. Even after reducing inflation in recent time, widening twin deficits has prevented RBI to pursue aggressive monetary easing. Recent research suggests that real interest (lending) rates explain only about one-third of GDP growth.

This suggests that non-monetary factors played a bigger role and accentuated the slowdown to beyond what was anticipated while tightening the monetary policy. Recession in the euro area and general uncertainty regarding the global economic climate chipped the external demand as well. Domestic policy uncertainties, governance and corruption issues amidst lack of political consensus on reforms led to a sharp deterioration in investment climate. Structural constraints emerged in key investment drivers in the infrastructure space – telecom, roads and power – which increased the disinflationary costs. High inflation kept aggregate demand and business confidence subdued.

**Overview of Copper Industry:**

Copper is a malleable and ductile metallic element that is an excellent conductor of heat and electricity as well as being corrosion resistant and antimicrobial. Copper is an important non-ferrous base metal having wide industrial applications, ranging from defence, space programme, railways, power cables, mint, telecommunication cables, etc. India is not self-sufficient in the resources of copper ore. In addition to domestic production of ore and concentrates, India imports copper concentrates for its smelters. The domestic demand of copper and its alloys is met through domestic production, recycling of scrap and to some extent by imports.

Copper is the electrical conductor in many categories of electrical wiring. Copper wire is used in power generation, power transmission, power distribution, telecommunications, electronics circuitry, and countless types of electrical equipment. Copper and its alloys are also used to make electrical contacts. Electrical wiring in buildings is the most important market for the copper industry. Copper is used for electrical wires because it has high electrical conductivity, enough tensile strength, enough ductility and does not possess brittle strength. Roughly half of all copper mined is used to manufacture electrical wire and cable conductors.

**Major uses of copper:**

Copper is the best non precious metal conductor of electricity as it encounters much less resistance compared with other commonly used metals. It sets the standard to which other conductors are compared. Copper is also used in power cables, either insulated or uninsulated, for high, medium and low voltage applications. In addition, copper's exceptional strength, ductility and resistance to creeping and corrosion makes it the preferred and safest conductor for commercial and residential building wiring. Copper is an essential component of energy efficient generators, motors, transformers and renewable energy production systems. Renewable energy sources such as solar, wind, geothermal, fuel cells and other technologies are all heavily reliant on copper due to its excellent conductivity.

(Source: <http://www.icsg.org/index.php/component/jdownloads/finish/170/1188> )

Electrical/Electronic Industry is by far the largest consumer of copper, where it is used in the form of cables, winding wires as it is the best non-precious metal conductor of electricity and is safe for electrical distribution system from high voltage transmission cables to micro-circuits. Copper also has relatively high creep strength as compared to other commonly used materials. It is also used in circuitry in silicon chips and heat sinks etc. Copper is used in construction industry as plumbing, taps, valves and fittings components. Copper is also extensively used in industrial machinery, transportation and equipment. It is used in a number of consumer products such as coinage, utensils, fixtures, etc. Large quantities of copper are consumed in making copper-based alloys such as brass and bronze. ## SECTION IV – ABOUT THE COMPANY

### OUR INDUSTRY

#### Overview of Indian Economy:

India, the world's largest democracy in terms of population (1,220 million people) had a GDP on a purchasing power parity basis of approximately INR 58 trillion in June 2013. This makes it the fourth largest economy in the world after the United States of America, European Union and China. The outlook for India's medium-term growth is positive due to a young population and corresponding low dependency ratio, healthy savings and investment rates, and increasing integration into the global economy. (Source: CIA World Fact book as on April 22, 2013 & [http://eaindustry.nic.in/Key\\_Economic\\_Indicators/Key\\_Economic\\_Indicators.pdf](http://eaindustry.nic.in/Key_Economic_Indicators/Key_Economic_Indicators.pdf)).

(Source: "Fact Book" from Department of Economic Affairs, Ministry of Finance, Government of India, June 2012)

The Indian economy's performance in FY 2012-13 and Q1 FY 2013-14 was marked by slowing growth and widening fiscal and current account gaps. The slowdown was partly rooted in external causes, while domestic causes like higher inflation, supply side constraints and policy inaction also put a drag on the economy. With GDP growth of 4.4% in Q1 FY13-14, the economy grew at its slowest quarterly pace in four years with mining, manufacturing and construction dragging growth down. Weakening of both domestic and external demand contributed further to the slowdown. Post 2008 crisis, Reserve Bank in response to the high inflation persisted with tightening till October 2011 and paused before easing in April 2012. The inflation has eased in last year though slowing growth, and widening twin deficits on the back of policy inaction along with global flight to safety amidst a deepening euro area crisis put pressures on the financial markets and the exchange rate during the year. As a result, Rupee has depreciated significantly in last one year further widening India's macro-economic problems.

### GDP-real growth rate (%)

(Source: <http://www.indexmundi.com/g/g.aspx?v=66&c=in&l=en>)

The Indian economy was one of the fastest growing economies in the post-crisis period. During 2012-13, however, there was continuous deceleration of economic activity in each of the four quarters which pushed the expansion of the economy to below potential and the economic growth hit 4.4% in Q1 of FY 2013-14.

Growth slowed down due to multiple factors. One of the reasons was the persistence of inflation at a much higher level than the threshold for two successive years. Persistent and high inflation necessitated continued tightening of monetary policy. Even after reducing inflation in recent time, widening twin deficits has prevented RBI to pursue aggressive monetary easing. Recent research suggests that real interest (lending) rates explain only about one-third of GDP growth.

This suggests that non-monetary factors played a bigger role and accentuated the slowdown to beyond what was anticipated while tightening the monetary policy. Recession in the euro area and general uncertainty regarding the global economic climate chipped the external demand as well. Domestic policy uncertainties, governance and corruption issues amidst lack of political consensus on reforms led to a sharp deterioration in investment climate. Structural constraints emerged in key investment drivers in the infrastructure space – telecom, roads and power – which increased the disinflationary costs. High inflation kept aggregate demand and business confidence subdued.

**Overview of Copper Industry:**

Copper is a malleable and ductile metallic element that is an excellent conductor of heat and electricity as well as being corrosion resistant and antimicrobial. Copper is an important non-ferrous base metal having wide industrial applications, ranging from defence, space programme, railways, power cables, mint, telecommunication cables, etc. India is not self-sufficient in the resources of copper ore. In addition to domestic production of ore and concentrates, India imports copper concentrates for its smelters. The domestic demand of copper and its alloys is met through domestic production, recycling of scrap and to some extent by imports.

Copper is the electrical conductor in many categories of electrical wiring. Copper wire is used in power generation, power transmission, power distribution, telecommunications, electronics circuitry, and countless types of electrical equipment. Copper and its alloys are also used to make electrical contacts. Electrical wiring in buildings is the most important market for the copper industry. Copper is used for electrical wires because it has high electrical conductivity, enough tensile strength, enough ductility and does not possess brittle strength. Roughly half of all copper mined is used to manufacture electrical wire and cable conductors.

**Major uses of copper:**

Copper is the best non precious metal conductor of electricity as it encounters much less resistance compared with other commonly used metals. It sets the standard to which other conductors are compared. Copper is also used in power cables, either insulated or uninsulated, for high, medium and low voltage applications. In addition, copper's exceptional strength, ductility and resistance to creeping and corrosion makes it the preferred and safest conductor for commercial and residential building wiring. Copper is an essential component of energy efficient generators, motors, transformers and renewable energy production systems. Renewable energy sources such as solar, wind, geothermal, fuel cells and other technologies are all heavily reliant on copper due to its excellent conductivity.

(Source: <http://www.icsg.org/index.php/component/jdownloads/finish/170/1188> )

Electrical/Electronic Industry is by far the largest consumer of copper, where it is used in the form of cables, winding wires as it is the best non-precious metal conductor of electricity and is safe for electrical distribution system from high voltage transmission cables to micro-circuits. Copper also has relatively high creep strength as compared to other commonly used materials. It is also used in circuitry in silicon chips and heat sinks etc. Copper is used in construction industry as plumbing, taps, valves and fittings components. Copper is also extensively used in industrial machinery, transportation and equipment. It is used in a number of consumer products such as coinage, utensils, fixtures, etc. Large quantities of copper are consumed in making copper-based alloys such as brass and bronze. **Copper Trade:**

Copper products across the value chain are traded internationally. Major product categories of copper traded internationally include:

- Copper concentrates
- Copper blister and anode
- Copper cathode and ingots
- Copper scrap and
- Copper semis

Copper is contained in many end-use products that are traded globally including automobiles, appliances, electronic equipment and other products. Changes in trade regulations, such as import duties or export quotas, can have significant impacts on the international trade of copper.

(Source: <http://www.icsg.org/index.php/component/jdownloads/finish/170/1188> )

The end-use of copper is determined by its chemical, physical, electrical, mechanical properties, etc. The end use consumption pattern of copper in world and India is given as follows:

### Global Copper Industry:

Copper is a base metal like nickel, zinc, aluminum, etc. and is indispensable for many industries. Total global copper production from mines amounted to 17 million metric tons in 2012. Major producing countries include Chile, China and Peru and United States. Chile produces roughly one third of the world's copper, and is also by far the country with the largest copper reserves.

The world reserves of copper metal are assessed at 690 million tonnes of copper content. Chile has the largest share followed by Peru, Australia, Mexico & USA, China, Indonesia etc. The world mine production of contained copper was 16.2 million tonnes in 2010. Chile also continued to be the largest producer of copper in 2010 with 33% share followed by Peru (8%), China & USA (7% each) and Indonesia (5%).

Global copper consumption is steadily increasing, and currently stands at some 21.4 million metric tons. Forecasts for global copper demand show the same trend. Thus, prices have also increased rapidly over the last decade, reaching a record high in 2011. Global production of refined secondary copper stands at approximately 3.3 million metric tonnes.

### **Domestic Scenario:**

The size of Indian Copper Industry is around 5 Lakh tonnes, which as a percentage of world copper market is only 3 percent. India has emerged as net exporter of copper from the status of net importer on account of rise in production. The domestic production of copper ore as well as concentrates in 2010-11 increased by 11% and 10%, respectively, over the previous year.

(Source: <http://mines.nic.in/writereaddata%5CContentlinks%5C49f2ad2911a24d3d81c401c03e137302.pdf>,  
[http://ibm.gov.in/IMYB%202011\\_Copper.pdf](http://ibm.gov.in/IMYB%202011_Copper.pdf))

The per capita consumption of copper in India is currently at 0.5 kg per annum as compared to China's per capita consumption of 4.6 kg per annum and to that of 10 kg of developed nations and 2.4 kg in the entire world. The per capita consumption of copper in India is estimated to reach 3 kg in 2025.

The past few years saw the Indian copper industry taking remarkable strides towards the goal of self sufficiency. After 1992 the private domestic producers boosted the production of copper metal based on imported ores and concentrates and now India exports copper to various countries. India also imports sizable quantities of copper ores and concentrates to feed the smelters as well as copper metal is also imported in the form of copper and alloys, copper scrap and cement copper (precipitated).

### **Exports:**

India plays an important role in the world export market. India stands 11th in the tally of refined copper exporting countries. India's export of refined copper shows an increasing trend since last few years. The exports of refined copper which was only 105 thousand tonnes in 2003 increased to 236 thousand tonnes in 2006 and came down to 185 thousand tonnes in 2009. The main destinations of Indian copper alloys were mainly to China (36%) was followed by Saudi Arabia (17%). A small quantity of cement copper (precipitated) was also exported. India also exports copper scrap and scrap of brass and bronze.

(Source: [http://ibm.nic.in/marketsurvey\\_copper.pdf](http://ibm.nic.in/marketsurvey_copper.pdf))

The export of copper from India is in the forms of copper ore & concentrates, refined copper, copper & alloys, brass & bronzes, scrap, cement copper, mattes and powder & flakes. Export of copper ores and concentrates decreased sharply to 8,187 tonnes in 2010-11 as against 40,422 tonnes in 2009-10. Export of refined copper increased sharply to 781,743 tonnes in 2010-11 from 199,842 tonnes registered in 2009-10. China was the largest importer of copper from India with a share of (75%) followed by UAE (12%) Saudi Arabia and Thailand (4% each).

(Source: [http://ibm.gov.in/IMYB%202011\\_Copper.pdf](http://ibm.gov.in/IMYB%202011_Copper.pdf))

### **Imports:**

India is one of the major importers of copper ores & concentrates. The major countries from which India imports copper ores and concentrates are Chile, Australia, Indonesia, Brazil, Iran etc.

(Source: [http://ibm.nic.in/marketsurvey\\_copper.pdf](http://ibm.nic.in/marketsurvey_copper.pdf))

The imports of copper in the country are in the form of copper ore and concentrates, refined copper, copper & alloys, brass & bronzes, scrap, cement copper, mattes, blister, worked (bars, rods & plates), etc. During the year 2010-11, imports of copper ores and concentrates were slightly lower at 1,902,026 tonnes as compared to 2,187,460 tonnes in 2009-10. Chile with a share of 31% was the leading supplier followed by Australia (24%), Indonesia (11%) and Iran & Brazil (9% each). Imports of refined copper decreased in 2010-11 at 8,055 tonnes

as against 11,543 tonnes in 2009-10. Sri Lanka with 14% share was the major supplier. UK, Australia and Malaysia contributed 9% each followed by Ukraine (7%).

#### **Demand Drivers for Copper Markets:**

- As the prices of Copper in India are derived from LME, the international prices on LME and exchange rate between USD/INR affect the prices and in-turn demand of the metal.
- Economic growth of the major consuming countries such as China, USA, Japan, Germany, India etc enhances the demand.
- Growth and development in the Infrastructure, Real-estate, Telecom and Electrical Industry increases the demand.
- Economic events such as the national industrial growth, global financial crisis and recession and inflation affect the demand and prices of Copper.
- Commodity specific events such as the construction of new production facilities, new uses, or the discontinuance of historical uses, unexpected mine or plant closures (natural disaster, supply disruption, accident, strike, and so forth), or industry restructuring, all affect demand and prices of Copper.
- Trade policies set by the Government (implementation and suspension of taxes, penalties and quotas) affect supply as they regulate (restricting or encouraging) material flow.
- Geopolitical events involving Governments or economic paradigms and armed conflict can cause major changes.
- As societies develop, their demand for metal increases based on their current economic position, which could also be referred as National Economic Growth Factor.

#### **World Future Scenario:**

It has been observed that the average annual growth of refined copper consumption is 3.20% worldwide. Area-wise growth rates are negative in Europe, America and Oceania. The growth rates in the developing and under developed countries are on the positive side. In Asia there is a healthy growth rate of 8.18% and in Africa it is 1.78%. The consumption of refined copper in the World has been estimated at 31 million tonnes (CAGR 3.2%) by 2025 based on World Bank projections of world growth..

(Source: [http://ibm.nic.in/marketsurvey\\_copper.pdf](http://ibm.nic.in/marketsurvey_copper.pdf))

#### **Future Outlook of Indian Copper Industry:**

Copper is an important contributor to the national economies of mature, newly developed and developing countries. Mining, processing, recycling and the transformation of metal into a product creates jobs and generates wealth. These activities contribute to building and maintaining a country's infrastructure, and create trade and investment opportunities. Copper will continue to contribute to society's development well into the future. Copper makes vital contributions to sustaining and improving society. The demand for copper will continue to be met by the discovery of new deposits, technological improvements, efficient design, and by taking advantage of the renewable nature of copper through reuse and recycling. As well, competition between materials, and supply and demand principles, contribute to ensuring that materials are used efficiently and effectively.

(Source: <http://www.icsg.org/index.php/component/jdownloads/finish/170/1188> )

India's refined copper consumption has increased at 10% per annum over the last four years. The demand of copper by 2015-16 is estimated at 1,227 thousand tonnes against a projected production of 1,347 thousand tonnes of refined copper during the same period. High growth in copper demand is likely to be from sectors like

Electrical, Transport (auto and railways), Air conditioner and Refrigerator (ACR) Manufacturers and Consumer durable manufacturing sector and the newer potential end use sectors including gas supply, plumbing tube, solar water heater and desalination.
