Any loss of any of our senior management or key personnel or any conflict of interest that may arise for such management or key personnel or the inability to recruit further senior managers or other key personnel could impede our growth by impairing our day-to-day operations and hindering our development of our business and our ability to develop, maintain and expand client relationships, which would have a material adverse effect on our business, results of operations, financial condition and prospects. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

- 14. Our logo  is not registered. In case of no registration our brand building efforts may be hampered which might lead to an adverse effect on our business.**

We have made application dated September 06, 2012 for registration of our Logo/trademark under the Trademarks Act, 1999 for getting the same registered. In case of no registration, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks. This could have a material adverse effect on our business, which in turn could adversely affect our results of operations.

- 15. Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.**

Post this Issue, our Promoter and Promoter Group will collectively own substantial portion of our Equity Share Capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that may not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

- 16. A significant change in the central and state governments' economic liberalization and deregulation policies could disrupt our business. A change in taxation laws could also adversely impact our financial condition and results of operations.**

Our performance and growth are dependent on the health of the Indian economy and more generally the global economy. The economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. Any change in the Government's policies in the future could adversely affect business and economic conditions in India and could also adversely affect our business prospects, financial condition and results of operations. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally and specifically have an adverse effect on our operations.

- 17. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.**

In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

- 18. *Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

- 19. *There is no guarantee that the Equity Shares issued pursuant to this Issue will be listed on the NSE-Emerge in a timely manner, or at all.***

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to NSE to use its name as the Stock Exchange in this offer document for listing our shares on the NSE- Emerge. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the NSE- Emerge. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 20. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Following the Issue, we will be subject to a daily "circuit breaker" imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The NSE may not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

B. EXTERNAL RISK FACTORS

- 21. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards ("IFRS"). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.***

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the "IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

- 22. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.***

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

23. Financial instability in Indian financial markets could adversely affect our company's results of operations and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

24. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between nonresidents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

25. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

26. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other taxes by the Central and the State Governments may adversely affect our results of operations.

27. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operation as well as the price of the Equity Shares.

28. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax ("STT") is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

Overview of Indian Economy

India, a South Asian nation, is the seventh-largest country by area, the second-most populous country with over 1.25 billion people, and the most populous democracy in the world. India is the fourth largest economy in the world in terms of purchasing power parity (PPP). Gross Domestic GDP of the country for the year 2014-2015 stood at INR 106.6 trillion (US\$ 1.60 trillion) as compared to INR 99.21 trillion (US\$ 1.49 trillion) in 2013-14 . India's economy has witnessed a significant economic growth in the recent past, growing by 7.3 % in 2015 as against 6.9 % in 2014. India is set to become the world's fastest-growing major economy by 2016 ahead of China, the International Monetary Fund (IMF) said in its recent latest forecast. Service sector contributes 65% to the GDP were as Industry and Agriculture shares the pie with 18% and 17% respectively. The Asian Development Bank (ADB) in its update released on July 16, 2015 for the Asian Development Outlook, kept its forecasts for India's GDP growth unchanged. The ADB expects India to grow by 7.8 % in 2015-16 backed by healthy growth in agriculture and a pick up in investment activity.

The outlook for Indian economy for short and long period remains positive. Young and educated population, new elected government, larger and positive integration with the major economies like US, Russia, Japan China, Europe etc makes the India a long term growth economy. India is preferred designation for investment by foreign economies.

Passing through the phase of high current account deficit, rising inflation, slowing down in capex cycle and industrial activities, now the economy is witnessing some revival. Fall in crude oil prices supported to grapple the rising inflation as well as rates cuts is expected from the central bank that could be the positive sign for accelerating the investment cycle in the Economy. Index of Industrial Production which depicts the performance of eight core industries of Indian economy for 2014-15 has grown by 3.6 % as compared to 4.2 % in 2013-14.

India's current account deficit reduced sharply to US\$ 1.3 billion (0.2 % of GDP) in the fourth quarter of 2015 compared to US\$ 8.3 billion (1.6 % of GDP) in the previous quarter, indicating a shrink in the current account deficit by 84.3 % quarter-on-quarter basis., as global oil prices slumped while foreign investments into the country remained robust.

India's Index of Industrial Production (IIP) grew by 4.1 % in April 2015 compared to 2.5 % in March 2015. The growth was largely due to the boost in manufacturing growth, which was 5.1 % in April compared to 2.8 % in the previous month. May came in at 2.7 %, falling from 4.1 %, led by a sharp fall in capital goods and consumer goods data.

India's Consumer Price Index (CPI) inflation rate increased to 5.01 % in May 2015 compared to 4.87 % in the previous month. On the other hand, the Wholesale Price Index (WPI) inflation rate remained negative at 2.36 % for the seventh consecutive month in May 2015 as against negative 2.65 % in the previous month, led by low crude oil prices.

Apart from being a critical driver of economic growth, foreign direct investment (FDI) is a major source of non-debt financial resource for the economic development of India. Foreign companies invest in India to take advantage of cheaper wages, special investment privileges like tax exemptions, etc. For a country where foreign investments are being made, it also means achieving technical know-how and generation of employment. The continuous inflow of FDI in India, which is now allowed across several industries, clearly shows the faith that overseas investors have in the country's economy. FDI into India through the approval route shot up 162 % to US\$ 1.91 billion in the first ten months of the ongoing fiscal year, indicating that government's effort to improve ease of doing business and relaxation in FDI norms may be yielding results. The foreign inflows have grown to touch US\$ 25.52 billion during the April-January 2014-15, up 36 % year-on-year (y-o-y), from US\$ 18.74 billion in the corresponding period last fiscal, according to Department of Industrial Policy and Promotion (DIPP) data. The top 10 sectors receiving FDI include telecommunication which received the maximum FDI worth US\$ 2.83 billion in the 10 month period, followed by services (US\$ 2.64 billion), automobiles (US\$ 2.04 billion), computer software and hardware (US\$ 1.30 billion) and pharmaceuticals sector (US\$ 1.25 billion).

India continues to be a preferred market for foreign investors. Listed India-focused funds saw record inflows of US\$ 1.7 billion in January this year, while most other emerging markets (EMs) saw redemptions to the tune of US\$ 3 billion. FIIs pumped in US\$ 2.87 billion into Indian equities in January, most of this coming from listed funds.

FII's net investments in Indian equities and debt are set to touch a record this financial year, backed by expectations of an economic recovery, falling interest rates and improving earnings outlook. FIIs have invested a net of US\$ 43.5 billion so far in 2014-15— expected to be their highest investment in any fiscal year. Of this, a huge amount US\$ 26.3 billion was invested in debt and it is their record investment in the asset class, while equities absorbed US\$ 17.2 billion.

After languishing a for quite a long, in the April-June quarter of the fiscal year (Q1FY15) India's Gross Domestic Product (GDP) witnessed a growth of 5.7% the fastest rate recorded over last 9 quarters and depicted signs of breaking shackles. In Q1FY14 (i.e. over April-June quarter of last fiscal year), the Indian economy grew at 4.7% and for the entire fiscal year 2014 economic growth on average basis came near that level. Thus against this backdrop, Q1FY15 GDP growth rate of 5.7% looks encouraging. A strong performance by manufacturing as well as services sectors have attributed to this uptick in growth. Moreover, despite a tad underperformance of agriculture in the current fiscal so far, the Indian economy has remained relatively resilient. Agriculture recorded a growth of 3.8% as against 4.0% in Q1FY14. Manufacturing sectors which account for nearly 15% of India's GDP grew collectively at 3.5% in Q1FY15 as against a contraction of -1.2% recorded in Q1FY14. Similarly, the services sectors which collectively account for nearly 2/3rd of GDP recorded a growth of 6.8% in Q1FY15 vis-à-vis 6.4% registered in Q1FY14. Likewise, mining displayed revival by expanding at 2.1% in Q1FY15 as against a contraction of -3.9% in Q1FY14.

Sectors projected to do well in the coming years include automotive, technology, life sciences and consumer products. Engineering and research and development (ER&D) export revenue from India is expected to reach US\$ 37-45 billion by 2020, from an estimated US\$ 12.4 billion in FY14, according to Nasscom. The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2004-05) prices for Q1 of 2014-15 is estimated at Rs 14.38 trillion (US\$ 232.63 billion), as against Rs 13.61 trillion (US\$ 220.12 billion) in Q1 of 2013-14, registering a growth rate of 5.7%.

Origin of Plastics

Plastics play an important role in almost every aspect of our lives. Plastics are used to manufacture everyday products such as beverage containers, toys, and furniture. The widespread use of plastics demands proper end of life management.

One can go as far back as the Old Testament to find references about natural materials used as fillers, adhesives, coatings, and the like. These materials were the precursors of modern plastic materials. Historians continue to differ as to the exact year or decade that the plastics industry began because the definition of “plastic” is a matter of interpretation.

Certainly, the history of the rubber industry has a bearing on plastics. This is because ebonite, or hard rubber, discovered in 1851, was the first thermosetting material to be prepared and the first material that involved a distinct chemical modification of a natural material. But ebonite was not exploited commercially for some years after its discovery; for that reason, its historical importance has become somewhat blurred. Plastics are responsible for countless facets of the modern life we enjoy today. From health and well being, nutrition, shelter and transportation to safety and security, communication, sports, leisure activities and innovations of industry – plastics deliver bountiful benefits to you and your world. The men and women of the plastics industry make it all possible. In the United States, the plastics industry accounts for more than \$374 billion dollars in annual shipments and directly employs nearly 900 thousand people.

Structure of Plastic Industry

The entire chain in the Plastic industry can be classified into (A) manufacturing of Polymers and is called “upstream” and (B) conversion of polymers into plastic articles and is known as “downstream”. The upstream Polymer manufacturers have commissioned globally competitive size plants with imported state-of-art technology from the world leaders. The upstream petrochemicals industries have also witnessed consolidation to remain globally competitive.

The downstream plastic processing industry is highly fragmented and consists of micro, small and medium units. Plastic processed articles which were earlier exclusively reserved for Small Scale sector has now been de-reserved. The Micro Small and Medium Enterprise (MSME) Act 2006 increased the investment in plant and Machinery to Rs. 5 crore and the current exemption on Excise Duty is Rs. 1 Crore. This initiative helped the industry to increase competitiveness and meet the global challenges.

Notwithstanding plastic being one of the important foreign exchange earners for the country the share of plastics exports of the total export by India remains at an abysmal 1.5% in 2014. India exported plastics of US\$ 4,860 million in 2014 as against US\$ 4,441 in 2013

(Source: http://plexconcil.co.in/composition_plastics_exports.pdf, <http://www.commerce.nic.in/eidb/ecom.asp>)

Despite the industry's high growth spanning over a period of over 2 decades and crossing several milestones, Indian plastics industry is yet to realize its full potential. The low level of per capita plastics consumption in India is indicative of the massive growth potential of the plastic industry. Compared to per capita consumption of plastics in USA at 109 Kg, China at 29 Kg and Brazil at 32 Kg. India at 5.8 Kg is still in nascent stage. USA consumption has reached saturation level, while China's higher levels of consumption are primarily due to exports. India has the advantage of high population and is expected to maintain high economic growth. This should propel India's plastics consumption to new levels in coming years.

The domestic downstream industry comprises of 3 broad segments viz. Injection molding, Blow molding and Extrusion and caters to the requirements of a wide array of applications like packaging, automobile, consumer durables, healthcare, etc.

SUMMARY OF OUR BUSINESS

OVERVIEW

Foundation

Ahimsa Industries Limited was formed by Mr. Ashutosh Damubhai Gandhi & Mr. Lalit C Shah on January 24, 1996. Mr. Ashutosh Damubhai Gandhi & family bought over Mr. Lalit C Shah's shares in 1999-2000. Initially, we were a merchant export company only. We were mainly focusing on exports of sugar confectionery machinery, moulds & plastic processing machinery. We achieved turnover of Rs. Fifty Lakhs in first year & reached turnover for Rs. 7.5 crore in year 2011.

Next Move

Mr. Ashutosh Damubhai Gandhi & family bought 49% of share of M/s General Additives Pvt. Ltd in 2004-05. M/s General Additives Pvt. Ltd. is a food & pharma flavor making unit based at Andheri, Mumbai.

Rowed the Feet Into Manufacturing Activity

Along with merchant export activity, we decided to go for a Greenfield manufacturing project at Ahmedabad. At world famous K show in Dusseldorf Germany, we booked world's latest Husky, all electric PET Preform injection molding system in October 2010. We decided to go for Indian beverage market offering world class PET preforms made on latest Husky equipment.

Splendid & Convenient Location

In Year 2010 we bought industrial plot at state of Art non polluting DEVERAJ INDUSTRIAL PARK located on outskirts of Ahmedabad @ village Piplaj. It is very conveniently located on SP ring road. It has good industrial infrastructure.

Start of Commercial Production

We started our commercial production of PET Preform with 3 start Alaska neck preforms on HPET 180 in December 2011 under Greenpet brand. Due to better preform design & good manufacturing practice, Greenpet got recognition throughout India. Greenpet is now approved preform with Railneer, Bisleri, Kingfisher, Royal Stag etc national & multinational brands. Beauty of Greenpet quality is known in beverage world, which brought weight of pet bottles down drastically.

We did expansion in 2013 by adding approx 10000sq ft industrial shed & adding HPET 230 AE, 48 cavity injection molding system. For second H-PET AE system, we choose to go for small weight preforms of PCO 1881 (Short Neck). This latest neck finish is now extremely acceptable to all international & domestic carbonated soft drinks & Juice industry. Again Greenpet quality is well accepted in domestic & overseas beverage industry. We have Big Cola, RC cola, City cola etc many regional big players in our satisfied client portfolio.

One of the significant aspects of AHIMSA manufacturing functions has been its emphasis on increasing productivity on a continuing basis through improvements in manufacturing processes. Our in-house machine tools manufacturing facility has contributed significantly to this. The company has laid emphasis on indigenization & adaptation of techniques acquired from better technologies which has helped in productivity improvements.

We proudly manufacture and own greenpet brand for our superior quality Preforms. This results in a smooth finish, flash free, tailless and uniform wall thickness preform with high clarity, dust free and near zero 'AA' level. The design is such that while blowing the preform you will get uniform material distribution resulting in superior sturdiness and improved transparency.

The preforms are made under stringent quality control conditions. This gives our customers trouble free production with near zero rejections which saves valuable time as well as reduces their production costs. Our fully equipped laboratory ensures that all products meet or exceed international quality standards. We also undertake custom jobs for MNCs and customers with large orders. Our Company is also engaged in trading of textile and clothing products.

PRODUCT PORTFOLIO:

We have wide range of preforms range available in variety of colours. Some of the neck types available at our end are –

- 28 Alaska 3 Start for Water
- 28 PCO 1881 Short Neck for CSD
- 28 PCO 1881 Short Neck for Juice

Amenity to the Customers

8. The Market Maker may also be present in the opening call auction, but there is no obligation on him to do so.
9. There will be special circumstances under which the Market Maker may be allowed to withdraw temporarily/fully from the market – for instance due to system problems, any other problems. All controllable reasons require prior approval from the Exchange, while force-majeure will be applicable for non-controllable reasons. The decision of the Exchange for deciding controllable and non-controllable reasons would be final.

Overview of Indian Economy

India, a South Asian nation, is the seventh-largest country by area, the second-most populous country with over 1.25 billion people, and the most populous democracy in the world. India is the fourth largest economy in the world in terms of purchasing power parity (PPP). Gross Domestic GDP of the country for the year 2014-2015 stood at INR 106.6 trillion (US\$ 1.60 trillion) as compared to INR 99.21 trillion (US\$ 1.49 trillion) in 2013-14. India's economy has witnessed a significant economic growth in the recent past, growing by 7.3 % in 2015 as against 6.9 % in 2014. India is set to become the world's fastest-growing major economy by 2016 ahead of China, the International Monetary Fund (IMF) said in its recent latest forecast. Service sector contributes 65% to the GDP were as Industry and Agriculture shares the pie with 18% and 17% respectively. The Asian Development Bank (ADB) in its update released on July 16, 2015 for the Asian Development Outlook, kept its forecasts for India's GDP growth unchanged. The ADB expects India to grow by 7.8 % in 2015-16 backed by healthy growth in agriculture and a pick up in investment activity.

The outlook for Indian economy for short and long period remains positive. Young and educated population, new elected government, larger and positive integration with the major economies like US, Russia, Japan China, Europe etc makes the India a long term growth economy. India is preferred designation for investment by foreign economies.

Passing through the phase of high current account deficit, rising inflation, slowing down in capex cycle and industrial activities, now the economy is witnessing some revival. Fall in crude oil prices supported to grapple the rising inflation, as well as rates cuts is expected from the central bank that could be the positive sign for accelerating the investment cycle in the Economy. Index of Industrial Production which depicts the performance of eight core industries of Indian economy for 2014-15 has grown by 3.6 % as compared to 4.2 % in 2013-14.

India's current account deficit reduced sharply to US\$ 1.3 billion (0.2 % of GDP) in the fourth quarter of 2015 compared to US\$ 8.3 billion (1.6 % of GDP) in the previous quarter, indicating a shrink in the current account

deficit by 84.3 % quarter-on-quarter basis., as global oil prices slumped while foreign investments into the country remained robust.

India's Index of Industrial Production (IIP) grew by 4.1 % in April 2015 compared to 2.5 % in March 2015. The growth was largely due to the boost in manufacturing growth, which was 5.1 % in April compared to 2.8 % in the previous month. May came in at 2.7 %, falling from 4.1 %, led by a sharp fall in capital goods and consumer goods data.

India's Consumer Price Index (CPI) inflation rate increased to 5.01 % in May 2015 compared to 4.87 % in the previous month. On the other hand, the Wholesale Price Index (WPI) inflation rate remained negative at 2.36 % for the seventh consecutive month in May 2015 as against negative 2.65 % in the previous month, led by low crude oil prices.

Apart from being a critical driver of economic growth, foreign direct investment (FDI) is a major source of non-debt financial resource for the economic development of India. Foreign companies invest in India to take advantage of cheaper wages, special investment privileges like tax exemptions, etc. For a country where foreign investments are being made, it also means achieving technical know-how and generation of employment. The continuous inflow of FDI in India, which is now allowed across several industries, clearly shows the faith that overseas investors have in the country's economy. FDI into India through the approval route shot up 162 % to US\$ 1.91 billion in the first ten months of the ongoing fiscal year, indicating that government's effort to improve ease of doing business and relaxation in FDI norms may be yielding results. The foreign inflows have grown to touch US\$ 25.52 billion during the April-January 2014-15, up 36 % year-on-year (y-o-y), from US\$ 18.74 billion in the corresponding period last fiscal, according to Department of Industrial Policy and Promotion (DIPP) data. The top 10 sectors receiving FDI include telecommunication which received the maximum FDI worth US\$ 2.83 billion in the 10 month period, followed by services (US\$ 2.64 billion), automobiles (US\$ 2.04 billion), computer software and hardware (US\$ 1.30 billion) and pharmaceuticals sector (US\$ 1.25 billion).

India continues to be a preferred market for foreign investors. Listed India-focused funds saw record inflows of US\$ 1.7 billion in January this year, while most other emerging markets (EMs) saw redemptions to the tune of US\$ 3 billion. FIIs pumped in US\$ 2.87 billion into Indian equities in January, most of this coming from listed funds.

FII's net investments in Indian equities and debt are set to touch a record this financial year, backed by expectations of an economic recovery, falling interest rates and improving earnings outlook. FIIs have invested a net of US\$ 43.5 billion so far in 2014-15— expected to be their highest investment in any fiscal year. Of this, a huge amount US\$ 26.3 billion was invested in debt and it is their record investment in the asset class, while equities absorbed US\$ 17.2 billion.

After languishing for quite a long, in the April-June quarter of the fiscal year (Q1FY15) India's Gross Domestic Product (GDP) witnessed a growth of 5.7% the fastest rate recorded over last 9 quarters and depicted signs of breaking shackles. In Q1FY14 (i.e. over April-June quarter of last fiscal year), the Indian economy grew at 4.7% and for the entire fiscal year 2014 economic growth on average basis came near that level. Thus against this backdrop, Q1FY15 GDP growth rate of 5.7% looks encouraging. A strong performance by manufacturing as well as services sectors have attributed to this uptick in growth. Moreover, despite a tad underperformance of agriculture in the current fiscal so far, the Indian economy has remained relatively resilient. Agriculture recorded a growth of 3.8% as against 4.0% in Q1FY14. Manufacturing sectors which account for nearly 15% of India's GDP grew collectively at 3.5% in Q1FY15 as against a contraction of -1.2% recorded in Q1FY14. Similarly, the services sectors which collectively account for nearly 2/3rd of GDP recorded a growth of 6.8% in Q1FY15 vis-à-vis 6.4% registered in Q1FY14. Likewise, mining displayed revival by expanding at 2.1% in Q1FY15 as against a contraction of -3.9% in Q1FY14.

Sectors projected to do well in the coming years include automotive, technology, life sciences and consumer products. Engineering and research and development (ER&D) export revenue from India is expected to reach US\$ 37-45 billion by 2020, from an estimated US\$ 12.4 billion in FY14, according to Nasscom. The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2004-05) prices for Q1 of 2014-15 is estimated at Rs 14.38 trillion (US\$ 232.63 billion), as against Rs 13.61 trillion (US\$ 220.12 billion) in Q1 of 2013-14, registering a growth rate of 5.7%.

Origin of Plastics

Plastics play an important role in almost every aspect of our lives. Plastics are used to manufacture everyday products such as beverage containers, toys, and furniture. The widespread use of plastics demands proper end of life management.

One can go as far back as the Old Testament to find references about natural materials used as fillers, adhesives, coatings, and the like. These materials were the precursors of modern plastic materials. Historians continue to differ as to the exact year or decade that the plastics industry began because the definition of “plastic” is a matter of interpretation.

Certainly, the history of the rubber industry has a bearing on plastics. This is because ebonite, or hard rubber, discovered in 1851, was the first thermosetting material to be prepared and the first material that involved a distinct chemical modification of a natural material. But ebonite was not exploited commercially for some years after its discovery; for that reason, its historical importance has become somewhat blurred. Plastics are responsible for countless facets of the modern life we enjoy today. From health and well being, nutrition, shelter and transportation to safety and security, communication, sports, leisure activities and innovations of industry – plastics deliver bountiful benefits to you and your world. The men and women of the plastics industry make it all possible. In the United States, the plastics industry accounts for more than \$374 billion dollars in annual shipments and directly employs nearly 900 thousand people.

Structure of Plastic Industry

The entire chain in the Plastic industry can be classified into (A) manufacturing of Polymers and is called “upstream” and (B) conversion of polymers into plastic articles and is known as “downstream”. The upstream Polymer manufacturers have commissioned globally competitive size plants with imported state-of-art technology from the world leaders. The upstream petrochemicals industries have also witnessed consolidation to remain globally competitive.

The downstream plastic processing industry is highly fragmented and consists of micro, small and medium units. Plastic processed articles which were earlier exclusively reserved for Small Scale sector has now been de-reserved. The Micro Small and Medium Enterprise (MSME) Act 2006 increased the investment in plant and Machinery to Rs 5 crore and the current exemption on Excise Duty is Rs. 1 Crore. This initiative helped the industry to increase competitiveness and meet the global challenges.

Notwithstanding plastic being one of the important foreign exchange earners for the country the share of plastics exports of the total export by India remains at an abysmal 1.5% in 2014. India exported plastics of US\$ 4,860 million in 2014 as against US\$ 4,441 in 2013

(Source: http://plexconcil.co.in/composition_plastics_exports.pdf, <http://www.commerce.nic.in/eidb/ecom.asp>)

Despite the industry’s high growth spanning over a period of over 2 decades and crossing several milestones, Indian plastics industry is yet to realize its full potential. The low level of per capita plastics consumption in

India is indicative of the massive growth potential of the plastic industry. Compared to per capita consumption of plastics in USA at 109 Kg, China at 29 Kg and Brazil at 32 Kg. India at 5.8 Kg is still in nascent stage. USA consumption has reached saturation level, while China's higher levels of consumption are primarily due to exports. India has the advantage of high population and is expected to maintain high economic growth. This should propel India's plastics consumption to new levels in coming years.

The domestic downstream industry comprises of 3 broad segments viz. Injection molding, Blow molding and Extrusion and caters to the requirements of a wide array of applications like packaging, automobile, consumer durables, healthcare, etc.

Plastics in Daily Life

- In the home, break-resistant, shatterproof and no-spill plastic bottles cut down on injuries and clean-ups in the kitchen, bath and garage - or anywhere the floor is hard and hands may be slippery.
- Plastics made possible the commercialization of electronics. Without plastics, most of the electronic products we use today would not have been practical or economic. In fact, microprocessor miniaturization would have been impossible without the qualities and cost-effectiveness of plastics.
- The construction industry is making increasing use of plastic materials that are waterproof, stable, weather-resistant, light and easy to handle.
- When a plastic pipe carries corrosive fluid through the ground near a river, it prevents pollution of the groundwater, conserves the quality of the water in the river and protects wildlife.
- Mainstays of today's farms, plastics help foster food production by providing economical irrigation pipe, greenhouse materials, mulching film and many other necessities and conveniences. After harvest, plastics packaging helps get much of that food to market and keeps it fresher longer once it is purchased.
- Plastics and composite materials provide more efficient engines, improved aerodynamics and reduced aircraft weight to the aerospace industry.
- More than 2000 police officers have been saved through the use of protective vests made with plastics materials.
- In six decades of use, plastics have made health care simpler and new techniques and prostheses possible. They have reduced contamination, relieved pain and cut medical costs. They have prolonged lives, improved the quality of lives and saved lives.

- In the past few decades, plastics have made health care simpler and less painful and made new techniques and prostheses possible. They have reduced contamination, relieved pain and cut medical costs. They have prolonged, improved and saved lives.
- The United States has the lowest rate of cross-staph infection in the world as a result of its use of plastic medical disposables.

- Plastics are key components of modern prosthetic devices, providing comfort, flexibility, mobility and a life-like appearance.
- Artificial hips and knees use plastics to help provide smoothly working, trouble-free joints.
- Not too long ago, almost no medical packaging had tamper-evident seals. Today, nearly 100 percent of all pharmaceutical packaging does. In addition, child-resistant caps help keep medicines away from little hands.
- Surgical gloves made of soft pliable plastic help preserve the sterile environment of hospital operating rooms.
- Plastics permeate medicine. From the smallest tubing to the open MRI machine, plastics deliver when lives are on the line.
- Many of today's most innovative medical procedures are dependent on the use of plastics.
- From the machinery housing to petri dishes, plastics serve health-care needs both large and small.
- As the need for home health care continues to increase, plastics will play a major role in creating simple, portable and effective medical devices.
- Plastics have helped reduce the weight of eyeglass frames and lenses, while improving their strength and shatter resistance. Plastics also provide vision-impaired consumers with another option: contact lenses. (Source: <http://www.plasticsindustry.org/AboutPlastics/content.cfm?ItemNumber=815&navItemNumber=1280>)

Plastic Moulding

Plastic moulding is the process of shaping plastic using a rigid frame or mould. The technique allows for the creation of objects of all shapes and sizes with huge design flexibility for both simple and highly complex designs. A popular manufacturing option, plastic moulding techniques are responsible for many car parts, containers, signs and other high volume items.

Plastic Moulding Techniques

The underlying concept of plastic moulding is placing liquid polymer into a hollow mould so that the polymer can take its shape, often with various ranges of pressure and heat required. There are different plastic moulding techniques available to accomplish this including rotational moulding, injection moulding, blow moulding, and compression moulding to name just a few. Each technique has its benefits and is best suited for the creation of specific items.

The Plastic Molding Processes:

Injection Molding

In Injection Molding, melted plastic is forced into a mold cavity. Once cooled, the mold can be removed. This plastic molding process is commonly used in mass-production or prototyping of a product. Injection molding

machines were made in the 1930's. These can be used to mass produce toys, kitchen utensils, bottle caps, and cell phone stands to name a few.

Blow Molding

Blow molding is like injection molding except that hot liquid plastic pours out of a barrel vertically in a molten tube. The mold closes on it and forces it outward to conform to the inside shape of the mold. When it is cooled, the hollow part is formed. Examples of blow molding products are bottles, tubes and containers.

Equipments needed in setting-up a blow molding business are relatively higher than injection molding.

Compression Molding

In this type of plastic molding, a slug of hard plastic is pressed between two heated mold halves. Compression molding usually uses vertical presses instead of the horizontal presses used for injection and blow molding. The parts formed are then air-cooled. Prices of equipment's used for compression molding are moderate.

Film Insert Molding

This plastic molding technique imbeds an image beneath the surface of a molded part. A material like film or fabric is inserted into a mold. Plastic is then injected.

Gas Assist Molding

Also called gas injection molding is used to create plastic parts with hollow interiors. Partial shot of plastic is then followed by high-pressure gas to fill the mold cavity with plastic.

Rotational Molding

Hollow molds packed with powdered plastic are secured to pipe-like spokes that extend from a central hub. The molds rotate on separate axes at once. The hub swings the whole mold to a closed furnace room causing the powder to melt and stick to the insides of the tools. As the molds turn slowly, the tools move into a cooling room. Here, sprayed water causes the plastic to harden into a hollow part. In this type of plastic molding, tooling costs are low and piece prices are high. Cycle time takes about 40-45 minutes.

Structural Foam Molding

Structural foam molding is a process of plastic molding usually used for parts that require thicker walls than standard injection molding. Inserting a small amount of nitrogen or chemical blow agent into the plastic material makes the walls thicker. Foaming happens as the melted plastic material enters the mold cavity. A thin plastic skin forms and solidifies in the mold wall. This type of plastic molding can be used with any thermoplastic that can be injection molded.

Thermoforming

In this plastic molding process, sheets of pre-extruded rigid plastics are horizontally heated and sucked down into hollow one-piece tools. When the hot plastic solidifies, its shape conforms to that of the mold.

Tooling costs are usually low and piece prices vary on the machinery.

Plastic molding is a very technical process. It needs experts in this type of manufacturing business for it to be competitive in the market. Therefore, a very scientific and systematic study should be first made before going into this endeavor

Plastic Industry in India

INDIA- one of the fastest growing economies of the world, is all set to attain the premier status along with China. India is a favoured destination for overseas investors and offers the advantages of an open economy, increasing liberalization, a stable democratic political scenario, highly skilled work force with fluency in English. Various overseas players wish to explore the Indian market and invest in opportunities thrown open by the country. This seems a very achievable position as since the past decade, the Indian plastics industry continues to grow at double digit figures.

(Source: <http://projectreports.eiriindia.org/overview-indian-plastics-industry/>)

The Indian plastics industry made a promising beginning in 1957 with the production of polystyrene. Thereafter, significant progress has been made and the industry has grown and diversified rapidly. Currently, the Indian plastics industry is spread across the country, employing about 4 million people and over 2,000 exporters. It operates more than 30,000 processing units, of which 85 per cent to 90 per cent are small and medium enterprises (SMEs).

Products from the Indian plastic industry are exported to over 150 countries round the globe with the major trading partners being the European Union, USA, China, UAE, Saudi Arabia, Turkey, Nigeria, Indonesia, Egypt etc.

OUR BUSINESS

OVERVIEW

Foundation

Ahimsa Industries Limited was formed by Mr. Ashutosh Damubhai Gandhi & Mr. Lalit C Shah on January 24, 1996. Mr. Ashutosh Damubhai Gandhi & family bought over Mr. Lalit C Shah's shares in 1999-2000. Initially, we were a merchant export company only. We were mainly focusing on exports of sugar confectionery machinery, moulds & plastic processing machinery. We achieved turnover of Rs. Fifty Lakhs in first year & reached turnover for Rs. 7.5 crore in year 2011.

Next Move

Mr. Ashutosh Damubhai Gandhi & family bought 49% of share of M/s General Additives Pvt. Ltd in 2004-05. M/s General Additives Pvt. Ltd. is a food & pharma flavor making unit based at Andheri, Mumbai.

Rowed the Feet Into Manufacturing Activity

Along with merchant export activity, we decided to go for a Greenfield manufacturing project at Ahmedabad. At world famous K show in Dusseldorf Germany, we booked world's latest Husky, all electric PET Preform injection molding system in October 2010. We decided to go for Indian beverage market offering world class PET preforms made on latest Husky equipment.

Splendid & Convenient Location

In Year 2010 we bought industrial plot at state of Art non polluting DEVERAJ INDUSTRIAL PARK located on outskirts of Ahmedabad @ village Piplaj. It is very conveniently located on SP ring road. It has good industrial infrastructure.

Start of Commercial Production

We started our commercial production of PET Preform with 3 start Alaska neck preforms on HPET 180 in December 2011 under Greenpet brand. Due to better preform design & good manufacturing practice, Greenpet got recognition throughout India. Greenpet is now approved preform with Railneer, Bisleri, Kingfisher, Royal Stag etc national & multinational brands. Beauty of Greenpet quality is known in beverage world, which brought weight of pet bottles down drastically.

We did expansion in 2013 by adding approx 10000sq ft industrial shed & adding HPET 230 AE, 48 cavity injection molding system. For second H-PET AE system, we choose to go for small weight preforms of PCO 1881 (Short Neck). This latest neck finish is now extremely acceptable to all international & domestic carbonated soft drinks & Juice industry. Again Greenpet quality is well accepted in domestic & overseas beverage industry. We have Big Cola, RC cola, City cola etc many regional big players in our satisfied client portfolio.

One of the significant aspects of AHIMSA manufacturing functions has been its emphasis on increasing productivity on a continuing basis through improvements in manufacturing processes. Our in-house machine tools manufacturing facility has contributed significantly to this. The company has laid emphasis on indigenization & adaptation of techniques acquired from better technologies which has helped in productivity improvements.

We proudly manufacture and own greenpet brand for our superior quality Preforms. This results in a smooth finish, flash free, tailless and uniform wall thickness preform with high clarity, dust free and near zero 'AA' level. The design is such that while blowing the preform you will get uniform material distribution resulting in superior sturdiness and improved transparency.

The preforms are made under stringent quality control conditions. This gives our customers trouble free production with near zero rejections which saves valuable time as well as reduces their production costs. Our fully equipped laboratory ensures that all products meet or exceed international quality standards. We also undertake custom jobs for MNCs and customers with large orders. Our Company is also engaged in trading of textile and clothing products.

EMPLOYEES STATE INSURANCE ACT, 1948

The promulgation of Employees' State Insurance Act, 1948(ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi-dimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

The appellant has contended that the PET Preform is a packing material and it falls under Entry 55 of Schedule II to the Gujarat Value Added Tax Act, 2003 on 30.08.2012. However, the learned Joint Commissioner of Commercial Tax (Legal) Vide Order No. VAT/Sec. 80/2012/D/237/J.504/507 had determined dated on 20/11/2012 held that PET preform is not a Packing Material and its included as Residuary Goods. He held that it is covered under Entry 87 of Schedule II to the Act and it is accordingly taxable at the rate of 12.5% plus 2.5% additional tax. Instead of 4%+1% as charged by Company.
- In against the order No. VAT/K-80/2012/D/237/J.504/507, dated 20.11.2012 of the learned Joint Commissioner of Commercial Tax, Company filed appeal, dated 28.11.2012 in the Gujarat Value Added Tax Tribunal, Ahmedabad. Therefore it is held to be declared as polythene packing material falling under Entry 55 of Schedule II to the GVAT Act and liable to be taxed accordingly and the same cannot be treated under residuary Entry 87 of Schedule II to the Act. The order of the determining authority is therefore, not just and proper and the appellant is not liable to be taxed @ 12.5% plus 2.5% by way of additional tax.

Multiple Applications

An Applicant should submit only one Application (and not more than one) for the total number of Equity Shares required. Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

- (i) All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications
- (ii) Applications which do not qualify as multiple applications as per above procedure are further checked for common DP ID/ beneficiary ID. In case of applications with common DP ID/ beneficiary ID, are manually checked to eliminate possibility of data entry error to determine if they are multiple applications.
- (iii) Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of 'know your client' norms by the depositories. The Company reserves the right to reject, in our absolute discretion, all or any multiple Applications in any or all categories.

July 2, 2007. Each of the Applicants should mention his/her PAN allotted under the IT Act. Applications without this information will be considered incomplete and are liable to be rejected. It is to be specifically noted that Applicants should not submit the GIR number instead of the PAN, as the Application is liable to be rejected on this ground.
