They will also have the ability to control our business including matters relating any sale of all or substantially all its assets, the timing and distribution of dividends and the election or termination or appointment of its officers and directors. Further, the extent of their shareholding in the Company may result in the delay or prevention of a change of management or control of the Company, even if such a transaction may be beneficial to the other shareholders of the Company.

**11. *Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

- increase our vulnerability to adverse general economic or industry conditions;
- limit our flexibility in planning for, or reacting to, competition and/or changes in our business or our industry;
- limit our ability to borrow additional funds;
- Place us at a competitive disadvantage relative to competitors that have less debt or greater financial resources.

There can be no assurance that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt or fund our planned capital expenditures. In addition, we may need to refinance some or all of our indebtedness. For further details, please see Statement of Financial Indebtedness beginning on page 191 of this Draft Prospectus.

Our Company and our Promoters have built relations with suppliers, clients and other persons who are connected with our business. Further, our Key Managerial Personal also possesses the requisite domain knowledge to provide efficient services to our clients. Accordingly, our Company's performance is dependent upon the services of our Promoters and other Key Managerial Personnel. Our future performance will, therefore, depend upon the continued services of these persons. It is possible that we may lose our skilled and trained staff to our competitors and high attrition rates in particular, could result in a loss of domain and process knowledge. Demand for key managerial personnel in the industry

is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

**23. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.***

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

**24. *Our revenues and profit may be affected due to dumping of steel imports from countries like China, Japan, etc.***

Steel dumping from countries like China, Japan etc will affect the revenue and profits of our Company as excessive imports will lead to underutilisation of capacities of our manufacturing plants.

**25. *Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline.***

The economic environment, pricing pressure and decreased employee utilization rates could negatively impact our revenues and operating results. In the event that the Government of India or the government of another country changes its tax policies in a manner that is adverse to us, our tax expense may materially increase, reducing our profitability.

**II. *Risk related to this Issue and our Equity Shares***

**26. *Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.***

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoter may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

- 27. *Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

- 28. *There is no guarantee that the Equity Shares issued pursuant to this Issue will be listed on the NSE Emerge in a timely manner.***

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to NSE to use its name as the Stock Exchange in this offer document for listing our shares on the NSE-Emerge. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the NSE-Emerge. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

India is set to become the world's fastest-growing major economy by 2016 ahead of China, the International Monetary Fund (IMF) said in its recent latest forecast. Service sector contributes 65% to the GDP while Industry and Agriculture shares the pie with 18% and 17% respectively. The Asian Development Bank (ADB) in its update released on July 16, 2015 for the Asian Development Outlook, kept its forecasts for India's GDP growth unchanged. The ADB expects India to grow by 7.8 % in 2015-16 backed by healthy growth in agriculture and a pick up in investment activity.

Passing through the phase of high current account deficit, rising inflation, slowing down in capex cycle and industrial activities, now the economy is witnessing some revival. Fall in crude oil prices supported to grapple the rising inflation as well as rates cuts is expected from the central bank that could be the positive sign for accelerating the investment cycle in the Economy. Index of Industrial Production which depicts the performance of eight core industries of Indian economy for 2014-15 has grown by 3.6 % as compared to 4.2 % in 2013-14.

India's current account deficit reduced sharply to US\$ 1.3 billion (0.2 % of GDP) in the fourth quarter of 2015 compared to US\$ 8.3 billion (1.6 % of GDP) in the previous quarter, indicating a shrink in the current account deficit by 84.3 % quarter-on-quarter basis., as global oil prices slumped while foreign investments into the country remained robust.

Apart from being a critical driver of economic growth, foreign direct investment (FDI) is a major source of non-debt financial resource for the economic development of India. Foreign companies invest in India to take advantage of cheaper wages, special investment privileges like tax exemptions, etc. For a country where foreign investments are being made, it also means achieving technical know-how and generation of employment. The continuous inflow of FDI in India, which is now allowed across several industries, clearly shows the faith that overseas investors have in the country's economy. FDI inflows soared by 24.5 % to US\$ 44.9 billion during FY2015, as compared to US\$ 36.0 billion in FY2014, according to Department of Industrial Policy and Promotion (DIPP) data. The top 10 sectors receiving FDI include telecommunication which received the maximum FDI worth US\$ 2.83 billion in the 10 month period, followed by services (US\$ 2.64 billion), automobiles (US\$ 2.04 billion), computer software and hardware (US\$ 1.30 billion) and pharmaceuticals sector (US\$ 1.25 billion).

India continues to be a preferred market for foreign investors. Listed India-focused funds saw record inflows of US\$ 1.7 billion in January this year, while most other emerging markets (EMs) saw redemptions to the tune of US\$ 3 billion. FIIs pumped in US\$ 2.87 billion into Indian equities in January, most of this coming from listed funds.

FII's net investments in Indian equities and debt are set to touch a record this financial year, backed by expectations of an economic recovery, falling interest rates and improving earnings outlook. FIIs have invested a net of US\$ 43.5 billion so far in 2014-15 expected to be their highest investment compared to others years. Of this, a huge amount US\$ 26.3 billion was invested in debt and it is their record investment in the asset class, while equities absorbed US\$ 17.2 billion.

India's steel production is expected to increase from 100 MTPA to 112.5 MTPA by FY16 and 300 MTPA by 2025. The Government of India has allowed 100 per cent foreign direct investment (FDI) in the steel sector under the automatic route. Nearly 301 MoUs have been signed with various states for planned capacity of about 486.7 MT.

India is the third-largest steel producer in the world. In 2015, Total Finished Steel production in India has increased at a CAGR of 7.45 percent over FY011–15 to 91.46 MT. Large public and private sector players strengthen steel production capacity in view of rising demand. Moreover, capacity is also expected to increase from 100 MT to 112.5 MT by FY16 while in the coming 10 years the country is anticipated to produce 300 MT of steel.

#### Production of Steel

- Steel industry was de-licensed and de-controlled in 1991 & 1992 respectively.
- In 2014-15, production for sale of total finished steel (alloy + non alloy) was 91.46 MT, a growth of 4.3% over 2013-14.

## **Indian Steel Tubes and Pipe Industry**

Steel products like tubes, pipes, HR coil, hollow section, CR sheets and other are basically driven by the growth and spending by infrastructure, shipping, aviation, housing, roads & highways, oil and gas industry, power. Steel tube and pipe industry has witnessed pickup in growth backed by higher government spending in infrastructure, and other sectors as well as recovery in the global economy has also supported the demand.

Over the years India has emerged as the fastest growing steel tubes and pipe manufacturers in the world with the production estimated to 10 million tonnes a years. Industry comprises of seamless, SAW, ERW pipes, galvanised pipes, steel sections and steel pannels. The sector in which our company operates has grown significantly as well as we have shown the consistence performance over the years.

Asia Pacific and Europe shares the largest pie in global demand for steel pipes and tubes. Asia Pacific and Latin America are among the the fastest growing markets for steel pipes and tubes due to growth in end user sector like oil and gas, power and refineries. Demand in Asian countries like India and China is driven by large population base and derived demand. This results in large investment rewuiired for infnrstructure, energy requirement, intensify the the construction acivity and power sector is also expected to drive the demand for steel pipes and tubes.

Globaly investment in energy security is rapidly increasing which likely to translate steady demand for these steel products and in developed countries opportunity is anticipated due to need for replacement of existing piplines that are more than 25 years old. Population expansion, higher income, and definetly going to create demand for various forms of energy including oil and gas.

Over the years India has emerged as the fastest growing steel tubes and pipe manufacturers in the world with the production estimated to 10 million tonnes a years. ## SUMMARY OF OUR BUSINESS

### OVERVIEW OF OUR COMPANY

Our journey started in late 1985 as M/S Ram Lal Harbans Lal Limited. Later the name of our company was changed to Hi-Tech Pipes Ltd (HPL). We started production in 1988 with manufacturing of MS pipes CR coils and strips in 1996 and as a measure of backward integration installed Continuous Galvanizing Line in 2001. Thereafter in 2005 we got hot-dipped galvanizing facilities installed, in 2008 started production of highway crash barriers and hollow section in 2010, commenced production of solar mounting structures. In 2012 set up another manufacturing unit to manufacture steel tubes and hollow sections as second unit in Sikandrabad Industrial Area. In 2014 started commissioning of a new Greenfield state of art steel tubes and hollow sections manufacturing facilities in Sanand Gujrat. In July 2015 got commercial production from Sanand facilities. Today, our multi-locational integrated plants have cold rolling mills to manufacture CRCA coils and strips, Continuous Galvanizing Line to manufacture Corrugated Sheets and Purling, pre-galvanized sheets required for manufacturing GP pipes, latest technology high speed tube mills to manufacture steel tubes, pipes, hollow sections of various sizes and types to cater the requirements of diverse industries and sectors.

Hi-Tech Pipes limited - an ISO 9001 certified company, is one of India's leading engineering house of excellence and innovation producing steel pipes, hollow sections, tubes, cold rolled coils, road crash barriers, solar mounting structures and strips and a variety of other galvanized products. We have grown into a matured and experienced organization, which better understands the market needs and demands. We work with the objective of providing maximum customer satisfaction through our superior quality products, which can satisfy specific needs and requirements. We are taking the pride of serving various industries with our products. ERW pipes & tubes for Oil & Gas and water sector. Black steel pipes, galvanized steel pipes and tubes for construction industry, precision tubes for automobile industry and hollow section for infrastructure and many more to boast of.

### MANUFACTURING FACILITY AND INFRASTRUCTURE

Hi-Tech Pipes Ltd. has its 2 state-of-the-art manufacturing units in Sikandrabad industrial area located in Uttar Pradesh and recently commissioned 3rd unit in Sanand (Gujrat). Our units are equipped with highly time tested superior machines in terms of technology and also houses sophisticated testing equipment's. With state of art machineries, we are sufficient enough to cater the demand for various products vide the requirement of clients with full satisfaction in terms of quality. We at Hi-Tech Pipes Ltd, can produce table top finish material having close tolerance to thickness, shape and flatness. Further, we have a bell type annealing furnace for superior surface finish and skin passing mill, which ensures sufficient pinch pass. In Tubes Division, we have installed a variety of state-of-the-art high speed tube mills capable of producing best quality Tubes/Pipes including Hollow Sections, Precision Tubes as per BIS (Bureau of Indian Standards) and various other International Specifications. All the above coupled with High-End HR slitters, Auto Cut-to-Lengths/shears/trimmers, cold saw cutting, sheet corrugation etc. to meet all kinds of requirement of clients.

For accelerated pace of growth and to strengthen the Company's position in the emerging markets, especially in western part of India (there is huge demand-supply gap in this particular segment) it became necessary to have a manufacturing base in new territory and for this purpose, the management of the Company had set up a green field project in Sanand (Gujarat).

Our company acquired land measuring 10550.67 sq. mtrs. at Plot No.E-6, Sanand-II, Industrial Estate, Gujarat from Gujarat Industrial Development Corporation. The location has well-developed infrastructure facilities in terms of road network for smooth connectivity as well as continuous power and water supply along with good manpower availability. More over Kandla/ Mundra ports are located at a distance of 270 Kms serving as added advantage for disposal of export output.

Our Company's manufacturing facility here has installed capacity of 100,000 MT per annum and would reduce freight cost by approx Rs. 1500/- per ton for Gujarat and nearby markets. Moreover it will result in improvements in overall margins on account of higher margins in western India market.

We have already implemented substantial part of the project and commercial production has started in July 2015. At Sanand Plant, we have established state of art, world class manufacturing line, completely synchronized with ancillary, balancing/finishing equipments with superior layout plans and as such we are expecting better capacity utilization at that plant as compared to the existing facilities and to the industry average also.

Besides these visible benefits, some yet unidentified synergies are also anticipated from, among other things, the new customer franchise, product development, the impact of consolidated operations, bidding and other financial synergies etc. etc. which 'll enable the Company to reduce its working capital requirements also .

### **In-house Sheet Galvanizing Facilities**

As a measure of backward integration, the Company recently commissioned in-house sheet galvanizing facility at its Sikandrabad Plant having installed capacity of ~30000MTPA, with this own in-house sheet galvanized manufacturing facility, the Company strengthened its competitiveness and industry position.

Pre-galvanized tubes has its applications in fencing, cabling, electrical conduits, arches and sheds for nursery plants, greenhouse structures, roof-top structures, pre-fabricated sheds and buildings, bus-body skeleton etc. etc. Considering its cost competitiveness and day by day increasing usage across the varied industries, pre-galvanized tubes and hollow section's demand is expected to surge in massive way going forward.

This sheet galvanizing facility not only strengthen company's product offering but also result in improved margins as it fetches almost the same per unit realizations as 'hot-dipped galvanized products' but require only 1/3 zinc for coating. With the installation of this facility, our Sikandrabad Unit became single point integrated manufacturing location for entire range of the products.

Choice Equity Broking Private Limited, registered with SME segment (NSE-EMERGE) of NSE will act as the market maker and has agreed to receive or deliver the specified securities in the market making process for a period of three years from the date of listing of our Equity Shares or for a period as may be notified by amendment to SEBI (ICDR) Regulations.

The Market Maker shall fulfill the applicable obligations and conditions as specified in the SEBI (ICDR) Regulations, as amended from time to time and the circulars issued by the NSE and SEBI in this matter from time to time.

Following is a summary of the key details pertaining to the Market Making arrangement:

1. The Market Maker(s) (individually or jointly) shall be required to provide a 2-way quote for 75% of the time in a day. The same shall be monitored by the Stock Exchange. Further, the Market Maker(s) shall inform the Exchange in advance for each and every black out period when the quotes are not being offered by the Market Maker(s).
2. The minimum depth of the quote shall be Rs. 1,00,000/-. However, the investors with holdings of value less than Rs. 1,00,000/- shall be allowed to offer their holding to the Market Maker(s) (individually or jointly) in that scrip provided that he sells his entire holding in that scrip in one lot along with a declaration to the effect to the selling broker.
3. After a period of three (3) months from the market making period, the market maker would be exempted to provide quote if the Shares of market maker in our Company reaches to 25 % of Issue Size (Including the 1,38,000 Equity Shares out to be allotted under this Issue.) Any Equity Shares allotted to Market Maker under this Issue over and above 1,38,000 Equity Shares would not be taken in to consideration of computing the threshold of 25% of Issue Size. As soon as the Shares of market maker in our Company reduce to 24% of Issue Size, the market maker will resume providing 2-way quotes.
4. There shall be no exemption/threshold on downside. However, in the event the market maker exhausts his inventory through market making process, the concerned stock exchange may intimate the same to SEBI after due verification.
5. Execution of the order at the quoted price and quantity must be guaranteed by the Market Maker(s), for the quotes given by him.
6. There would not be more than five Market Makers for a script at any point of time and the Market Makers may compete with other Market Makers for better quotes to the investors. At this stage, Choice Equity Broking Private Limited is acting as the sole Market Maker.
7. On the first day of the listing, there will be pre-opening session (call auction) and there after the trading will happen as per the equity market hours. The circuits will apply from the first day of the listing on the discovered price during the pre-open call auction.
8. The Market Maker may also be present in the opening call auction, but there is no obligation on him to do so.
9. There will be special circumstances under which the Market Maker may be allowed to withdraw temporarily/fully from the market – for instance due to system problems, any other problems. All controllable reasons require prior approval from the Exchange, while force-majeure will be applicable for non-controllable reasons. The decision of the Exchange for deciding controllable and non-controllable reasons would be final.
10. The Market Maker(s) shall have the right to terminate said arrangement by giving one month notice or on mutually acceptable terms to the Merchant Banker, who shall then be responsible to appoint a replacement Market Maker(s).

In case of termination of the above mentioned Market Making agreement prior to the completion of the compulsory Market Making period, it shall be the responsibility of the Lead Manager to arrange for another Market Maker(s) in replacement during the term of the notice period being served by the Market Maker but prior to the date of releasing the existing Market Maker from its duties in order to ensure compliance with the requirements of regulation 106V of the SEBI (ICDR) Regulations, 2009. Further the Company and the Lead Manager reserve the right to appoint other Market Maker(s) either as a replacement of the current Market Maker or as an additional Market Maker subject to the total number of Designated Market Makers does not exceed 5 (five) or as specified by the relevant laws and regulations applicable at that particular point of time. The Market Making Agreement is available for inspection at our Registered Office from 11.00 a.m. to 5.00 p.m. on working days.

12. Emerge of NSE will monitor the obligations on a real time basis and punitive action will be initiated for any exceptions and/or non-compliances. Penalties / fines may be imposed by the Exchange on the Market Maker, in case he is not able to provide the desired liquidity in a particular security as per the specified guidelines. These penalties / fines will be set by the Exchange from time to time. The Exchange will impose a penalty on the Market Maker(s) in case he is not present in the market (offering two way quotes) for at least 75% of the time. The nature of the penalty will be monetary as well as suspension in market making activities / trading membership.  
The Department of Surveillance and Supervision of the Exchange would decide and publish the penalties/ fines/ suspension for any type of misconduct/ manipulation/ other irregularities by the Market Maker from time to time.

Apart from being a critical driver of economic growth, foreign direct investment (FDI) is a major source of non-debt financial resource for the economic development of India. Foreign companies invest in India to take advantage of cheaper wages, special investment privileges like tax exemptions, etc. For a country where foreign investments are being made, it also means achieving technical know-how and generation of employment. The continuous inflow of FDI in India, which is now allowed across several industries, clearly shows the faith that overseas investors have in the country's economy. FDI inflows soared by 24.5 % to US\$ 44.9 billion during FY2015, as compared to US\$ 36.0 billion in FY2014, according to Department of Industrial Policy and Promotion (DIPP) data. The top 10 sectors receiving FDI include telecommunication which received the maximum FDI worth US\$ 2.83 billion in the 10 month period, followed by services (US\$ 2.64 billion), automobiles (US\$ 2.04 billion), computer software and hardware (US\$ 1.30 billion) and pharmaceuticals sector (US\$ 1.25 billion).

India continues to be a preferred market for foreign investors. Listed India-focused funds saw record inflows of US\$ 1.7 billion in January this year, while most other emerging markets (EMs) saw redemptions to the tune of US\$ 3 billion. FIIs pumped in US\$ 2.87 billion into Indian equities in January, most of this coming from listed funds.

FII's net investments in Indian equities and debt are set to touch a record this financial year, backed by expectations of an economic recovery, falling interest rates and improving earnings outlook. FIIs have invested a net of US\$ 43.5 billion so far in 2014-15 expected to be their highest investment compared to others years. Of this, a huge amount US\$ 26.3 billion was invested in debt and it is their record investment in the asset class, while equities absorbed US\$ 17.2 billion.

### Consumption

Currently the steel consumption in India is second only to the China. However, with the steel consumption in China is expected to moderate at around 3%, India is likely to emerge as the fastest growing steel consuming nation. Further India's per capita finished steel consumption is 52 kg is well below the world average of 203 kg. Rise in income level is expected to make steel affordable, there remains a vast scope for demand to come as various industry are the end user of steel like automobile, consumer durables, infrastructure, shipbuilding and capital goods.

In FY15, the consumption of finished steel grew to 76.36 MT while the CAGR increased to 5.56 percent during FY08-15. Total real consumption of steel grew to 74.1 MT in FY14 against 73.5 MT in FY13; over FY08-14, consumption has expanded at a CAGR of 6 percent. It is expected that consumption per capita would increase supported by rapid growth in the industrial sector, and rising infrastructure expenditure projects in railways, roads & highways, etc.

### Demand and Supply Gap, leading to Higher Imports

With growth in demand for steel outpacing growth in domestic production over the last few years, import dependency has increased. India was a net importer of steel till FY13, but turned a net exporter of the same in FY14. In 2015 India imported 9.32 MT of steel while exports declined to 5.59 from 5.98 during 2014-15. Import of steel reduced at a compounded annual rate of 4.4 percent, where as exports increase data CAGR of 1.5 Total domestic demand for steel is estimated at 113.3 mt pa by 2016-17 percent.

### Investment in Steel Sector

Steel industry and its associated mining and metallurgy sectors have seen a number of major investments and developments in the recent past.

According to the data released by Department of Industrial Policy and Promotion (DIPP), the Indian mining and metallurgical industries attracted foreign direct investments (FDI) to the tune of US\$ 1,669.49 million and US\$ 8,527.34 million, respectively, in the period April 2000 to February 2015.

The Ministry of Steel has announced to invest in modernisation and expansion of steel plants of Steel Authority of India Limited (SAIL) and Rashtriya Ispat Nigam Limited (RINL) in various states to enhance the crude steel production capacity in the current phase from 12.84 MTPA to 21.4 MTPA and from 3 MTPA to 6.3 MTPA respectively.

The government has stepped up infrastructures pending from the current 5 percent of GDP to 10 percent by 2017, and the country is committed to investing USD 1 trillion in infrastructure during the 12th Five Year Plan. Considering 15 percent as steel component in the total investment, the initiative has a potential to generate an additional demand for steel of 18.75 mt.

### Indian Steel Tubes and Pipe Industry

Steel products like tubes, pipes, HR coil, hollow section, CR sheets and other are basically driven by the growth and spending by infrastructure, shipping, aviation, housing, roads & highways, oil and gas industry, power. Steel tube and pipe industry has witnessed pickup in growth backed by higher government spending in infrastructure, and other sectors as well as recovery in the global economy has also supported the demand.

Over the years India has emerged as the fastest growing steel tubes and pipe manufacturers in the world with the production estimated to 10 million tonnes a years. Industry comprises of seamless, SAW, ERW pipes, galvanised pipes, steel sections and steel pannels. The sector in which our company operates has grown significantly as well as we have shown the consistence performance over the years.

Asia Pacific and Europe shares the largest pie in global demand for steel pipes and tubes. Asia Pacific and Latin America are among the the fastest growing markets for steel pipes and tubes due to growth in end user sector like oil and gas, power and refineries. Demand in Asian countries like India and China is driven by large population base and derived demand. This results in large investment required for infrastructure, energy requirement, intensify the the construction activity and power sector is also expected to drive the demand for steel pipes and tubes.

Globally investment in energy security is rapidly increasing which likely to translate steady demand for these steel products and in developed countries opportunity is anticipated due to need for replacement of existing pipelines that are more than 25 years old. Population expansion, higher income, and definitely going to create demand for various forms of energy including oil and gas.

Over the years India has emerged as the fastest growing steel tubes and pipe manufacturers in the world with the production estimated to 10 million tonnes a years. Industry comprises of seamless, SAW, ERW pipes, galvanised pipes, steel sections and steel pannels. ### **Sectors to Drive Demand for Steel Products**

#### **a. Power:**

The Government of India announced a massive renewable power production target of 175,000 MW by 2022; this comprises generation of 100,000 MW from solar power, 60,000 MW from wind energy, 10,000 MW from biomass, and 5,000 MW from small hydro power projects. The Union Cabinet of India approved 15,000 MW of grid-connected solar power projects of National Thermal Power Corp Ltd (NTPC). India's wind energy market is expected to attract investments totalling Rs 1,00,000 crore (US\$ 15.7 billion) by 2020, and wind power capacity is estimated to almost double by 2020 from over 23,000 MW in June 2015, with an addition of about 4,000 MW per annum in the next five years. These efforts by the government are prime drivers of demand for steel products.

#### **b. Oil & Gas:**

Rise in population and growing demand for energy and its various forms has been key to the drive the growth of steel tubes and pipes. India will have a natural gas pipeline grid of 30,000 km that will connect the consumption centers of fuels sources by 2017, Out of which 12,000 kms of gas pipelines and another 12,000 km of oil pipelines is to be constructed. This step by the government will serve the enormous opportunity for pipes and tubes industry.

#### **c. Shipping and Port:**

At present there are 187 minor and 13 major ports in India that concludes close to 1 billion TPA capacity. Indian port sector has been in expansion mode since last few years. The National Maritime Agenda plans to increase the port capacity to 3.2 billion TPA by 2020, which is 3 fold growth.

#### **d. Rural Infrastructure**

Given the correlation between improvement in agriculture and the development of the country, the Government of India adopted several initiatives and programmes to ensure continuous growth. It allocated Rs 25,000 crore (US\$ 3.9 billion) for the Rural Infrastructure Development Fund (RIDF), Rs 1,500 crore (US\$ 234 million) for the long-term rural credit fund, Rs 45,000 crore (US\$ 7.03 billion) for the short-term cooperative rural credit finance fund and Rs 25,000 crore (US\$ 3.9 billion) for the short-term RRB refinance fund. It also marked an ambitious target of Rs 8.5 lakh crore (US\$ 132 billion) of agriculture credit during 2015–16.

#### **e. Housing for All 2022 Mission:**

In the Union Budget of 2015 Government has announced the scheme of housing for all by 2022, besides various incentives to buy and build homes, IT has also set up a mission of low cost affordable housing. These scheme by the government will definitely create a demand for steel pipes and tubes. The Government of India has earmarked Rs 50,000 crore (US\$ 7.53 billion) to develop 100 smart cities across the country. The Government released its list of 98 cities for the smart cities project in August 2015.

#### **f. Roads & Highways:**

Rise in population and development in rural and urban economy has created demand for surface transport infrastructure. The Union government approved the construction of around 1,000 km of expressways at a cost of Rs 16.68 crore (US\$ 2.5 million) on a design-build-finance-operate-transfer (DBFOT) mode. The approved corridors are Delhi-Chandigarh (249 km), Bengaluru-Chennai (334 km), Delhi-Jaipur (261 km) and Vadodara-Mumbai (400 km). The government will also take up the development of 135 km long Eastern Peripheral Expressway at an estimated cost of Rs 5,763 crore (US\$ 868 million). The Ministry of Road Transports and Highways plans to award 273 road projects covering a length of around 12,900 km at an estimated cost of Rs 1,26,700 crore (US\$ 19 billion) in FY 2015-16.

#### **g. Urbanisation:**

Urban India contributes to around 63% to India's GDP, which is expected to rise to 75% by 2030-31. About 31% of India's population is estimated to be living in urban areas; this proportion is likely to rise to 49% by 2031, creating increased real estate demand and indirectly for steel pipes demand. In the 12th Plan, the monitorable targets for infrastructure include:

- Increase investment in infrastructure as a percentage of GDP to 9% by the end of Twelfth Five Year Plan.
- Increase the gross irrigated area from 90 mn hectare to 103 mn hectare by the end of 12th Five Year Plan.
- Provide electricity to all villages and reduce AT&C losses to 20% by the end of Twelfth Five Year Plan.
- Ensure 50% of rural population has access to 40 lpcd piped drinking water supply.

#### **h. Sanitization:**

Swatchh Bharat Abhiyaan is the main motive of the Government i.e. need for sanitations in all houses. The Government is providing with the resources and requested everyone to co-operate equally. 20,000 habitations affected with arsenic, fluoride, heavy/ toxic elements, pesticides/fertilizers to be provided safe drinking water through community water purification plants in next 3 years. Government is planning that "Swatchh Bharat Abhiyan" to cover every household with sanitation facility by the year 2019.

### **Global Steel Industry**

The world market for steel will reach \$1.3 trillion in 2015, with production levels to reach 1,694.73 million tonnes whilst consumption will reach 1,545.50 million tonnes. The market has been declining over the past few years as a result of the large oversupply of steel that pressured prices downwards. The global recession that hit the commodities sector hard also contributed to the shrinking growth. As a result, the steel market is expected to grow at a slow rate in the first half of the forecast period (2015-2020) before accelerating at a higher rate in the second half of the forecast period (2020-2025).

The steel market has been dominated by China, accounting for half of the global market. It is the largest and fastest growing producer and consumer of steel and it will retain its leading position throughout the forecast period. India, Taiwan, Iran, Japan, Mexico and South Korea are other countries exhibiting strong growth in terms of steel production and consumption. Global steel demand over the next decade will mainly depend on the emerging economies. However, economic conditions for the global steel industry remain uncertain and challenging.

## OUR BUSINESS

### OVERVIEW OF OUR COMPANY

Our journey started in late 1985 as M/S Ram Lal Harbans Lal Limited. Later the name of our company was changed to Hi-Tech Pipes Ltd (HPL). We started production in 1988 with manufacturing of MS pipes CR coils and strips in 1996 and as a measure of backward integration installed Continuous Galvanizing Line in 2001. Thereafter in 2005 we got hot-dipped galvanizing facilities installed, in 2008 started production of highway crash barriers and hollow section in 2010, commenced production of solar mounting structures. In 2012 set up another manufacturing unit to manufacture steel tubes and hollow sections as second unit in Sikandrabad Industrial Area. In 2014 started commissioning of a new Greenfield state of art steel tubes and hollow sections manufacturing facilities in Sanand Gujarat. In July 2015 got commercial production from Sanand facilities. Today, our multi-locational integrated plants have cold rolling mills to manufacture CRCA coils and strips, Continuous Galvanizing Line to manufacture Corrugated Sheets and Purling, pre-galvanized sheets required for manufacturing GP pipes, latest technology high speed tube mills to manufacture steel tubes, pipes, hollow sections of various sizes and types to cater the requirements of diverse industries and sectors.

Hi-Tech Pipes limited - an ISO 9001 certified company, is one of India's leading engineering house of excellence and innovation producing steel pipes, hollow sections, tubes, cold rolled coils, road crash barriers, solar mounting structures and strips and a variety of other galvanized products. We have grown into a matured and experienced organization, which better understands the market needs and demands. We work with the objective of providing maximum customer satisfaction through our superior quality products, which can satisfy specific needs and requirements. We are taking the pride of serving various industries with our products. ERW pipes & tubes for Oil & Gas and water sector. Black steel pipes, galvanized steel pipes and tubes for construction industry, precision tubes for automobile industry and hollow section for infrastructure and many more to boast of.

### MANUFACTURING FACILITY AND INFRASTRUCTURE

Hi-Tech Pipes Ltd. has its 2 state-of-the-art manufacturing units in Sikandrabad industrial area located in Uttar Pradesh and recently commissioned 3rd unit in Sanand (Gujrat). Our units are equipped with highly time tested superior machines in terms of technology and also houses sophisticated testing equipment's. With state of art machineries, we are sufficient enough to cater the demand for various products vide the requirement of clients with full satisfaction in terms of quality. We at Hi-Tech Pipes Ltd, can produce table top finish material having close tolerance to thickness, shape and flatness. Further, we have a bell type annealing furnace for superior surface finish and skin passing mill, which ensures sufficient pinch pass. In Tubes Division, we have installed a variety of state-of-the art high speed tube mills capable of producing best quality Tubes/Pipes including Hollow Sections, Precision Tubes as per BIS (Bureau of Indian Standards) and various other International Specifications. All the above coupled with High-End HR slitters, Auto Cut-to-Lengths/shears/trimmers, cold saw cutting, sheet corrugation etc. to meet all kinds of requirement of clients.

For accelerated pace of growth and to strengthen the Company's position in the emerging markets, especially in western part of India (there is huge demand-supply gap in this particular segment) it became necessary to have a manufacturing base in new territory and for this purpose, the management of the Company had set up a green field project in Sanand (Gujarat).

Our company acquired land measuring 10550.67 sq. mtrs. at Plot No.E-6, Sanand-II, Industrial Estate, Gujarat from Gujarat Industrial Development Corporation. The location has well-developed infrastructure facilities in terms of road network for smooth connectivity as well as continuous power and water supply along with good manpower availability. More over Kandla/ Mundra ports are located at a distance of 270 Kms serving as added advantage for disposal of export output.

Our Company's manufacturing facility here has installed capacity of 100,000 MT per annum and would reduce freight cost by approx Rs. 1500/- per ton for Gujarat and nearby markets. Moreover it will result in improvements in overall margins on account of higher margins in western India market.

We have already implemented substantial part of the project and commercial production has started in July 2015. At Sanand Plant, we have established state of art, world class manufacturing line, completely synchronized with ancillary, balancing/finishing equipments with superior layout plans and as such we are expecting better capacity utilization at that plant as compared to the existing facilities and to the industry average also.

Besides these visible benefits, some yet unidentified synergies are also anticipated from, among other things, the new customer franchise, product development, the impact of consolidated operations, bidding and other financial synergies etc. etc. which 'll enable the Company to reduce its working capital requirements also .

### **In-house Sheet Galvanizing Facilities**

As a measure of backward integration, the Company recently commissioned in-house sheet galvanizing facility at its Sikandrabad Plant having installed capacity of ~30000MTPA, with this own in-house sheet galvanized manufacturing facility, the Company strengthened its competitiveness and industry position.

Pre-galvanized tubes has its applications in fencing, cabling, electrical conduits, arches and sheds for nursery plants, greenhouse structures, roof-top structures, pre-fabricated sheds and buildings, bus-body skeleton etc. etc. Considering its cost competitiveness and day by day increasing usage across the varied industries, pre-galvanized tubes and hollow section's demand is expected to surge in massive way going forward.

This sheet galvanizing facility not only strengthen company's product offering but also result in improved margins as it fetches almost the same per unit realizations as 'hot-dipped galvanized products' but require only 1/3 zinc for coating. With the installation of this facility, our Sikandrabad Unit became single point integrated manufacturing location for entire range of the products.

## MANUFACTURING PROCESS

### ERW Tubes and Pipes:

### CR Coils and Strips:

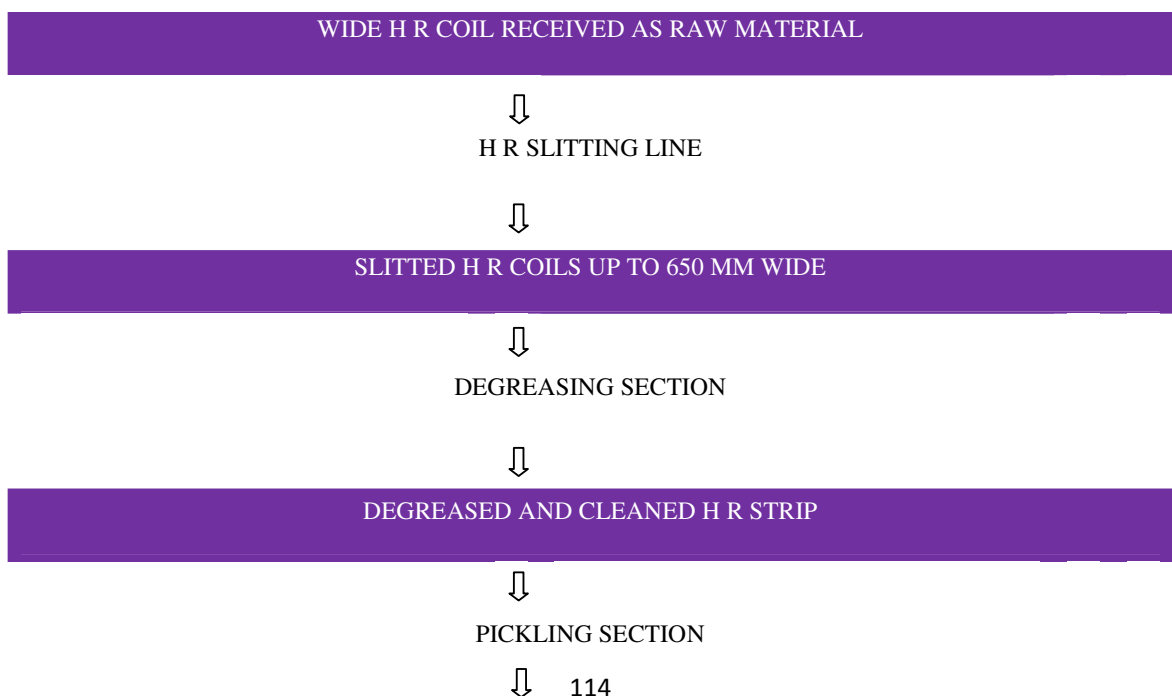

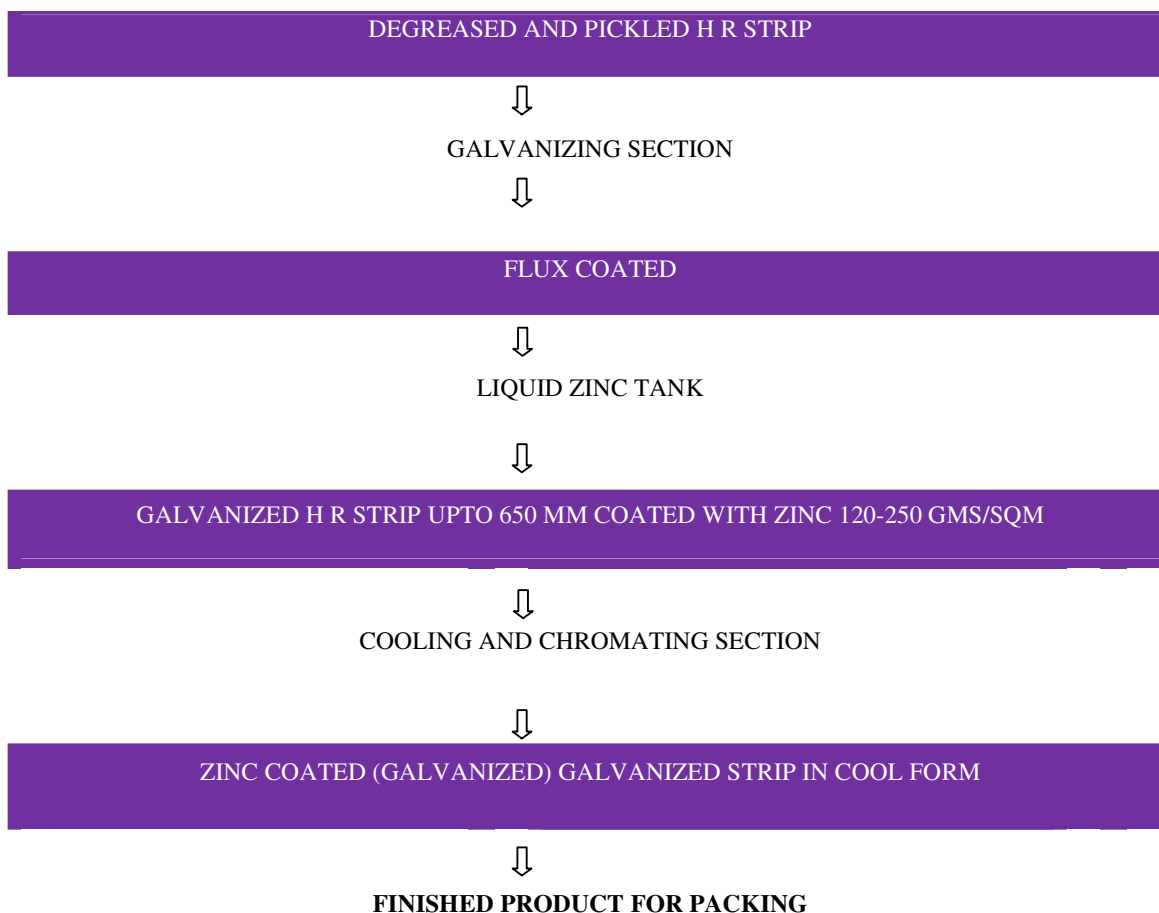

### Sheet Galvanizing Process

HR Coil is the basic raw material for producing Galvanized strips. HR coil are slitted into desired width up to 650mm on slitting line. Thereafter, it is degreased and cleaned on line. Then, these strips enter galvanized area. In the galvanized area, these strips are sprayed with flux and then the strips go in zinc tank for zinc coating. After zinc coating these strips enter cooling and chroming area. Thereafter these strips are ready for packing/further use in piping section.

## **EMPLOYEES STATE INSURANCE ACT, 1948**

The promulgation of Employees' State Insurance Act, 1948 (ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi-dimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act, 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.
