Further, the spiraling cost of living around our facilities may push our manpower costs higher, which may reduce our margin and cost competitiveness.

Our reliance on selective clients may lead to certain issues including pricing pressures. There are a number of factors, other than our performance, that could cause the loss of a client and such factors may not be predictable. The loss or significant decreases in the volumes of work from these clients would have a material adverse effect on our business, results of operations, financial condition and cash flows. Further, if any of our clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivables from that client may have to be written off. Any significant reduction in or the elimination of the use of the services we provide to any of our clients, or any requirement to lower our prices, would harm our business.

Our top five customers in commodity sales contribute approximately 80.88 % of our revenues during the financial year 2015-16. Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

Our promoter will also have the ability to control our business including matters relating any sale of all or substantially all its assets, the timing and distribution of dividends and the election or termination or appointment of its officers and directors. Further, the extent of the promoters' shareholding in the Company may result in the delay or prevention of a change of management or control of the Company, even if such a transaction may be beneficial to the other shareholders of the Company.

- 14. *We face competition in our business from both domestic and international competitors. Such competition would have an adverse impact on our business and financial performance.***

The industry, in which we are operating, is highly and increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

The fund requirement and deployment, as mentioned in the "Objects of the Issue" on 85 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter "Objects of the Issue" is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter "Objects of the Issue" will not vary from the estimated costs or schedule of implementation. However, the insurance cover taken by us may not be adequate enough for covering the entire future unforeseen liabilities that might occur in the normal course of business. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time by the insurers. To the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our business operations and cash flows may be affected. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

37. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other taxes by the Central and the State Governments may adversely affect our results of operations.

38. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

39. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax ("STT") is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. The agro industry in India is divided into several sub segments such as canned, dairy, processed, frozen food to fisheries, meat, poultry, and food grains.

The Department of Agriculture and Cooperation under the Ministry of Agriculture is responsible for the development of the agriculture sector in India. It manages several other bodies, such as the National Dairy Development Board (NDDB), to develop other allied agricultural sectors.

At 157.35 million hectares, India holds the second largest agricultural land in the world. With 20 agri-climatic regions, all 15 major climates in the world exist in India. India is the largest producer of spices, pulses, milk, tea, cashew and jute; and the second largest producer of wheat, rice, fruits and vegetables, sugarcane, cotton and oilseeds. Further, India is 2nd in global production of fruits and vegetables, and is the largest producer of mango and banana. It also has the highest productivity of grapes in the world.

Total food grains production in India reached an all-time high of 251.12 million tonnes (MT) in FY15 (as per 3rd Advance Estimates). PVC Industry in India

The PVC industry in India is valued at over Rs. 20,000 crores with five major producers and over 6,000 processors, employing tens of thousands of people, making consumer and industrial products. In spite of strong economic growth, India still has a long way to go to realize its infrastructural needs - nearly US\$ 650 billion will be required for urban infrastructure in the next twenty years. Also, the construction sector contributes to 10% of the GDP. This provides great opportunity for investment and hence for PVC products that are used in these sectors.

The forecasts for the PVC industry are bright. The global market, currently at US\$ 56 billion, is expected to reach revenue of US\$65 billion in 2019, with average annual demand expected to increase at 3.9%. The global consumption of PVC in 2014 was estimated at 40 million tons. The PVC industry in India has historically been driven by agriculture till 2000. Thereafter, the main driver for PVC consumption has been infrastructure, for instance, Pipes & Fittings, which has grown to over 70% from 14% in 1975. Globally, Pipes & Fittings account for only 43% of the PVC consumption, showing that PVC applications in India other than Pipes & Fittings are primed for growth. For the period between 2002 and 2015, the total demand for PVC in the country grew at a CAGR of 8.7%. During the same period domestic production capacity grew at a CAGR of 4.6 % whereas imports grew at a CAGR of 32.5%.

(Source: <http://ficci.in/PressRelease/2238/ficci-press-dec22-pvc.pdf>)

Need for strengthening domestic PVC production

Indian PVC demand in the future will mainly be driven by the Agriculture, Infrastructure, Housing and other sectors like FMCG, pharmaceutical and retail segments. The estimated annual growth for PVC will be at least 13% in the next five years, with demand expected to cross 5 million tons in 2020. India's supply -demand imbalance in PVC means that the deficit in demand is met by imports. As seen earlier, for the 2002 - 2015 period, the total demand for PVC in the country grew at a CAGR of 8.7%. During the same period domestic production grew at a CAGR of 3.7 % whereas imports grew at a CAGR of 32.5%. By 2020, India would need approximately 3,700kt of imports i.e. an additional 2,300kt from the present level to meet its PVC demand. Such high levels of imports will also have a deleterious effect and the resultant net outflow of foreign exchange could be of the order of US \$5 billion. Another factor that goes to show that this level of import is almost impossible is the estimated global trade in PVC resin by the year 2020 which is at around 10 million tons. It will again be not prudent for India to expect that almost 37% of this will be an inflow into the country.

PLASTICS EXPORT PROMOTION COUNCIL

The Plastics Export Promotion Council (PLEXCONCIL) is the apex government body responsible for the promotion of plastic exports including products like polypropylene, high-density polyethylene, low-density polyethylene and PVC. PLEXCONCIL members comprise large-/medium-/small-scale manufacturers and exporters. The council supports exporters by participating in international trade fairs, exploring new markets, organizing buyer- seller meets both in India and overseas, and engaging in through various other promotion and need- based activities. The council acts as an interface between the exporting community and the Government of India; sponsors delegations to target markets; and invites business delegations from overseas to India. It actively organizes events such as exhibitions, fairs and conferences/workshops to promote the Indian plastics industry at national and international levels.

Total export of plastic and plastic products stood at US\$ 449.72 million in May 2015 as per Ministry of Commerce.

Export of Agro-based Products

India is the world's second largest producer of rice, wheat and other cereals. The huge demand for cereals in the global market is creating an excellent environment for the export of Indian cereal products. In 2008, India had imposed ban on export of rice and wheat etc to meet domestic needs. Now, seeing the huge demand in the global market and country's surplus production, Country has lifted the ban, but only limited amount of export of the commodity are allowed. The allowed marginal quantity of exports cereals could not make any significant impact either on domestic prices or the storage conditions.

The important cereals are - wheat, paddy, sorghum, millet (bajra), barley and maize etc. According to the final estimate for the year 2011-12 by ministry of agriculture of India, the production of major cereals like rice, maize and bajra stood at 105 million tonnes, 21.76 million tonnes and 10.28 million tonnes respectively, India is not only the largest producer of cereal as well as largest exporter of cereal products in the world. India's export of cereals stood at Rs. 58279.80 crore during the year 2014-15. Rice (including Basmati and Non Basmati) occupy the major share in India's total cereals export with 64.40% during the same period. Whereas, other cereals including wheat represent 35.60% share in total cereals exported from India during this period. The major importing countries of India's cereals during the period were Iran, Saudi Arabia, Indonesia, UAE and Bangladesh.

Export of Spices

India, known as the home of spices, boasts a long history of trading with the ancient civilizations of Rome and China. India has the largest domestic market for spices in the world. India is the world's largest producer, consumer and exporter of spices; the country produces about 75 of the 109 varieties listed by the International Organization for Standardization (ISO) and accounts for half of the global trading in spices.

Key Markets

- India commands a formidable position in the world spice trade with the spice exports expected to touch US\$3 billion by 2016-17
- In value terms, India's spice market grew an average 8.8 per cent annually between 2009–10 and 2014–15 (up to December 2014).
- About 893,920 tonnes of spices, valued at US\$ 2,440.8 million, were exported in 2014–15.
- In 2014–15, the US was the major importer, followed by China, Vietnam, the UAE, Malaysia, the UK, Germany, Saudi Arabia, Thailand and Sri Lanka. Spice exports to the US increased 4.3 per cent to US\$ 410.3 million in 2014–15 from US\$ 393.3 million in 2013–14.

(Source: <http://www.ibef.org/exports/spice-industry-indias.aspx>)

The total export of spices increased 7 per cent to reach US\$ 2.4 billion for FY 2014-15. The Spices Board of India works towards the development and worldwide promotion of Indian spices. PVC Industry in India

The PVC industry in India is valued at over Rs. 20,000 crores with five major producers and over 6,000 processors, employing tens of thousands of people, making consumer and industrial products. In spite of strong economic growth, India still has a long way to go to realize its infrastructural needs - nearly US\$ 650 billion will be required for urban infrastructure in the next twenty years. Also, the construction sector contributes to 10% of the GDP. This provides great opportunity for investment and hence for PVC products that are used in these sectors.

The forecasts for the PVC industry are bright. The global market, currently at US\$ 56 billion, is expected to reach revenue of US\$65 billion in 2019, with average annual demand expected to increase at 3.9%. The global consumption of PVC in 2014 was estimated at 40 million tons. The PVC industry in India has historically been driven by agriculture till 2000. Thereafter, the main driver for PVC consumption has been infrastructure, for instance, Pipes & Fittings, which has grown to over 70% from 14% in 1975. Globally, Pipes & Fittings account for only 43% of the PVC consumption, showing that PVC applications in India other than Pipes & Fittings are primed for growth. For the period between 2002 and 2015, the total demand for PVC in the country grew at a CAGR of 8.7%. During the same period domestic production capacity grew at a CAGR of 4.6 % whereas imports grew at a CAGR of 32.5%.

Projected Capacity (kt) 2016-17

Projected Consumption (kt) 2016-17

Need for strengthening domestic PVC production

Indian PVC demand in the future will mainly be driven by the Agriculture, Infrastructure, Housing and other sectors like FMCG, pharmaceutical and retail segments. The estimated annual growth for PVC will be at least 13% in the next five years, with demand expected to cross 5 million tons in 2020. India's supply –demand imbalance in PVC means that the deficit in demand is met by imports. As seen earlier, for the 2002 - 2015 period , the total demand for PVC in the country grew at a CAGR of 8.7%. During the same period domestic production grew at a CAGR of 3.7 % whereas imports grew at a CAGR of 32.5%. By 2020, India would need approximately 3,700kt of imports i.e. an additional 2,300kt from the present level to meet its PVC demand. Such high levels of imports will also have a deleterious effect and the resultant net outflow of foreign exchange could be of the order of US \$5 billion. Another factor that goes to show that this level of import is almost impossible is the estimated global trade in PVC resin by the year 2020 which is at around 10 million tons. It will again be not prudent for India to expect that almost 37% of this will be an inflow into the country.

PLASTICS EXPORT PROMOTION COUNCIL

The Plastics Export Promotion Council (PLEXCONCIL) is the apex government body responsible for the promotion of plastic exports including products like polypropylene, high-density polyethylene, low-density polyethylene and PVC. PLEXCONCIL members comprise large-/medium-/small-scale manufacturers and exporters. The council supports exporters by participating in international trade fairs, exploring new markets, organizing buyer- seller meets both in India and overseas, and engaging in through various other promotion and need- based activities. The council acts as an interface between the exporting community and the Government of India; sponsors delegations to target markets; and invites business delegations from overseas to India. It actively organizes events such as exhibitions, fairs and conferences/workshops to promote the Indian plastics industry at national and international levels.
