- 2. ***We do not own any of our Offices, Manufacturing Units and the godowns from which we operate and the same are owned by our promoters/directors, their relatives and others.***

Our Registered Office, Manufacturing Units, and the godowns apart from other offices from which we operate are not owned by us. They are owned by our promoters and directors, their relatives and others. Rent agreements have been executed for using the same for business purpose. We cannot assure you that we will acquire, or have the right to occupy these premises in future, or that we will be able to continue with the uninterrupted use of these premises, which may impair our operations and adversely affect our financial condition. For details on properties taken on lease/rent by us please refer to the heading titled “Property” in chapter titled “*Our Business*” beginning on page 105 of this Draft Prospectus.

3. ***We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.***

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there are no other statutory/regulatory requirements which are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits in time or at all. Failure by

us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have an adverse effect on our business.

4. *Our manufacturing operations are critical to our business and any shutdown of our manufacturing facilities may have an adverse effect on our business, results of operations and financial condition.*

Any local, social unrest, natural disaster or breakdown of services and utilities in that area could have material adverse effect on the business and result of operations. Our facilities are subject to operating risks like breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply and performance below expected levels of efficiency, obsolescence, natural disaster, industrial accidents and the need to comply with the directives of relevant government authorities. In the event that we are forced to shut down our facilities for a significant period of time, it would have a material adverse effect on our business, results of operations and financial condition. Further, continuous addition of industries in and around our manufacturing facilities without commensurate growth of its infrastructural facilities may put pressure on the existing infrastructure therein, which may adversely affect our business. Further, the spiraling cost of living around our facilities may push our manpower costs higher, which may reduce our margin and cost competitiveness.

5. *Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline.*

Our revenue and profitability have grown significantly in certain years and are likely to vary significantly in the future from period to period. Therefore, we believe that period to period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as an indication of our future performance. It is possible that in future our results of operations may be below market expectations, which could cause the share price of our equity shares to decline significantly.

6. *The secured loan availed by us is recallable by the lender at any time.*

Our Company has availed secured loan which is recallable on demand by the lender. In such cases, the lender is empowered to require repayment of the facility at any point in time during the tenor. In case the loan is recalled on demand by the lender and our Company is unable to repay the outstanding amounts under the facility at that point, it would constitute an event of default under the respective loan agreements. See “Financial Indebtedness” in the chapter “Financial Information” beginning on page 163 of this Draft Prospectus.

7. *We have entered into certain transactions with related parties. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.*

Our manufacturing activities are labor-intensive. We are subject to a number of stringent labor laws that protect the interests of workers, including legislation that stipulates rigorous procedures for dispute resolution and retrenchment of workers that imposes financial obligations on employers. Strikes, lock-outs and other labor action may have an adverse impact on our operations, and we cannot guarantee that we will not experience any strike, work stoppage or other industrial action in the future. Also, our third-party suppliers may experience strikes or other labor disruptions and shortages that could affect our operations, possibly for a significant period of time, result in increased wages, shortage in manpower and other costs and otherwise have a material adverse effect on our business, results of operations or financial condition.

We also enter into contracts with contract manufacturers who, in turn, employ on-site contract labor to perform certain operations. We generally engage such labor frequently, it is possible under Indian law that we may be held responsible for wage payments to the labor engaged by such contract manufacturers should they default on wage payments. Any requirement to fund such payments will adversely affect us, our business, financial condition, results of operations and cash flows. Any order from a regulatory body or court requiring us to make payments to such contract labor may have an adverse effect on our business, financial condition, results of operations and cash flows.

- 9. *We rely significantly on our Dealers/Distributors and Agents network in open market for sale of our products.***

We sell our products in open market through our network of Dealers/Distributors and agents as well as through Direct Marketing. However, significant proportion of the sale is done through our Dealers and Distributors. Furthermore, our business growth depends on our ability to attract additional dealerships/distributorships to our network. While, we believe that we have good relations with our dealers / distributors but there is no assurance that our current dealers / distributors will continue to do business with us or that we can continue to attract additional dealers / distributors to our network. If we do not succeed in maintaining the stability of our dealership / distributorship network, our market share may decline materially affecting our results of operations and financial condition.

12. We may not be able to adapt to changing market trends and customer requirements especially in the innerwear market in a timely manner, or at all.

The market for innerwear in the country is highly competitive with several players present in various segments in brick and mortar stores and through third party e-commerce platforms. If we are unable to anticipate consumer preferences or industry changes, or if we are unable to modify our products and their prices on a timely basis, we may lose customers to our competitors, or may be forced to reduce our sales realization on products by having to offer them at a discount, thereby reducing our margins. If our competitors are able to cater to these markets, or if we are not able to anticipate the demand, or misjudge the quantity, inter alia, this could lead to lower sales, higher inventories and higher discounts, each of which could have a material adverse effect on our brand, reputation, results of operations and financial condition.

13. The products manufactured by our Company in relation to our brands as mentioned in chapter titled ‘Our Business’ beginning on page 105 of this Draft Prospectus are vulnerable to counterfeiting or imitation by third parties that may affect the reputation of our Company

The products manufactured and sold by us under our brands are developed by our management team based on prevailing trends. Our Company ensures that the cutting and finishing of these products are exclusively done by contract manufacturers for our Company and they are not permitted to sell these products. We maintain a close check and control over each stage of the production process and conduct quality checks at every stage. However, the products under our brands are vulnerable to counterfeiting and imitation by third party vendors who may manufacture and sell products in the mass market at relatively cheaper prices. While we make constant checks in mass markets in an effort to prevent the sale of any counterfeit products of our brands, there can be no assurance that we will be able to prevent sale of counterfeit products at all time. Any sale of counterfeit or imitation products which does not match the quality standards of our products will adversely impact our reputation and may also affect our relationship with our customers and suppliers. It will also materially affect our business, prospects, results of operations and financial conditions.

The industry, in which we are operating, is highly and increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially/adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

18. Our success depends largely upon the services of our Promoters and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain key managerial personnel may adversely affect the operations of our Company.

Our Company's performance is largely dependent upon the services of our Promoters and other Key Managerial Personnel. Our Promoters have built relations with suppliers, consumers and other persons who are connected with our business. Further, our Key Managerial Personal also possesses the requisite domain knowledge to provide efficient services to our consumers. Any failure or inability of our Company to attract and retain human resources may affect the operations and ability to expand our business.

We do not have any permanent arrangement of labour and recruitments are made as per requirements except for those who are on permanent pay rolls of our Company. Our manufacturing activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations.

- 20. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

The fund requirement and deployment, as mentioned in the “*Objects of the Issue*” on page 83 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “*Objects of the Issue*” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds could adversely affect our growth plans. In the event of non-materialization of our estimates and expected order flow for our existing and / or future products and/or failure of optimum utilization of our capacities, due to factors including adverse economic scenario, change in demand or for any other reason, our capacities may not be fully utilized thereby impairing our ability to fully absorb our fixed cost and may adversely impact our consolidated financial performance.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

OVERVIEW OF INDIAN TEXTILE AND APPAREL INDUSTRY

Introduction

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The textiles industry is also labor intensive and is one of the largest employers.

The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world. Even today, textiles sector is one of the largest contributors to India's exports with approximately 11% of total exports. India's overall textile exports during FY 2015-16 stood at US\$ 40 billion.

The Indian textiles industry is extremely varied, with the hand-spun and handwoven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector.

Market Size

The Indian textiles industry, currently estimated at around US\$ 108 billion, is expected to reach US\$ 223 billion by 2021. The industry is the second largest employer after agriculture, providing employment to over 45 million people directly and 60 million people indirectly.

The Indian Textile Industry contributes approximately 5% to India's Gross Domestic Product (GDP), and 14% to overall Index of Industrial Production (IIP).

The Indian textile industry has the potential to reach US\$ 500 billion in size. The growth implies domestic sales to rise to US\$ 315 billion from currently US\$ 68 billion. At the same time, exports are implied to increase to US\$ 185 billion from approximately US\$ 41 billion currently.

All controllable reasons require prior approval from the Exchange, while force-majeure will be applicable for non-controllable reasons. OVERVIEW OF INDIAN TEXTILE AND APPAREL INDUSTRY

Introduction

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The textiles industry is also labor intensive and is one of the largest employers.

The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world. Even today, textiles sector is one of the largest contributors to India's exports with approximately 11% of total exports. India's overall textile exports during FY 2015-16 stood at US\$ 40 billion.

The Indian textiles industry is extremely varied, with the hand-spun and handwoven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the **organised sector** consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector.

Market Size

The Indian textiles industry, currently estimated at around US\$ 108 billion, is expected to reach US\$ 223 billion by 2021. The industry is the second largest employer after agriculture, providing employment to over 45 million people directly and 60 million people indirectly.

The Indian Textile Industry contributes approximately 5% to India's Gross Domestic Product (GDP), and 14% to overall Index of Industrial Production (IIP).

The Indian textile industry has the potential to reach US\$ 500 billion in size. The growth implies domestic sales to rise to US\$ 315 billion from currently US\$ 68 billion. At the same time, exports are implied to increase to US\$ 185 billion from approximately US\$ 41 billion currently.

Indian Textile Market Size USD billion

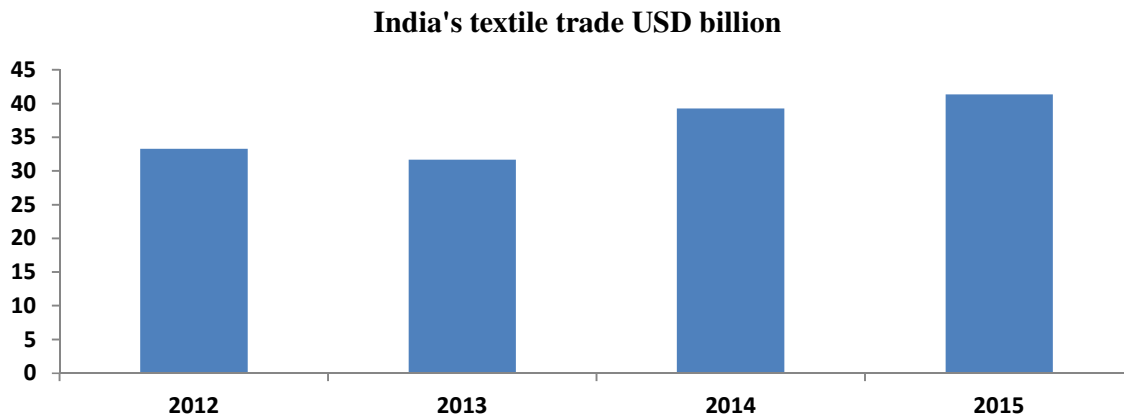

Export of Textiles and Apparels

Exports have been a core feature of India's textile and India's textile trade (USD billion) apparel sector. Exports grew to USD41.4 billion in FY15 from USD17.6 billion in FY06, implying a CAGR of 9.97%. Exports during FY16 (between April-September 2015) touched USD19.1 billion. However, in FY15, India's textile exports crossed the mark of FY14 and touched USD41.4 Billion.

Readymade garments was the largest contributor to total Shares in India's textile exports (FY15) textile and apparel exports from India in FY15 the segment had a share of 41%. Cotton and man-made textiles were the major contributors with shares of 31% and 16%, respectively.

The textile and apparel industry can be broadly divided into two segments

- Yarn and fibre
- Processed fabrics and apparel.

India accounts for 14% of the world's production of textile fibres and yarns (largest producer of jute, second largest producer of silk and cotton, and third largest in cellulosic fibre). India has the highest loom capacity (including hand looms) with 63% of the world's market share.

Textile and apparel exports from India are expected to increase to US\$ 82 billion by 2021 from US\$ 40 billion in 2014. Readymade garments remain the largest contributor to total textile and apparel exports from India. In FY15 the segment had a share of 40% of all textile and apparel exports. Cotton and man-made textiles were the other major contributors with shares of 31% and 16%, respectively.

Rising government focus and favorable policies is leading to growth in the textiles and clothing industry. Foreign direct investment (FDI) in textile sector increased to US\$ 1,587.8 million in FY15 from US\$ 1,424.9 million in FY14. The Ministry of Textiles is encouraging investments through increasing focus on schemes such as Technology Up-gradation Fund Scheme (TUFS). To promote apparel exports, 12 locations have been approved by the government to set up apparel parks for exports. As per the 12th Five Year Plan, the Government plans to provide a budgetary support of US\$ 4.25 billion to textiles. Free trade with ASEAN countries and proposed agreement with European Union will also help boost exports.

Rising production of man-made fabric

- Production of man-made fibre has been on an upward trend.
- Production stood at 1.34 million tons in FY15 with the figure reinforcing a recovery from 2009 levels.
- During the period of FY07-15, production increased at a CAGR of 2.0%.
- During FY16 (April-October 2015), production stood at 0.77 million tones.

Government Initiatives

- Investment was made to promote modernisation and up-gradation of the textile industry by providing credit at reduced rates.
- USD 0.39 billion has been allocated for Technology Upgradation Fund Scheme(TUFS) scheme for FY15.
- The policy was introduced for the overall development of textile industry.
- Key areas of focus include technological upgrades, enhancement of productivity, product diversification and financing arrangements.
- New draft for this policy ensures to employ 35 million by attracting foreign investments. It also focuses on establishing a modern apparel garment manufacturing center in every North Eastern state for which Government has invested an amount of USD3.27 million.
- FDI of up to 100% is allowed in the textile sector through the automatic route.
- Scheme for Integrated Textiles Parks (SITP) was set up in 2005 to provide necessary infrastructure to new textile units; under SITP, 40 projects (worth USD678 million) have been sanctioned.
- Government of India has planned an increase in the fund outlay for technical textile industry to more than USD117 million during the current 12th Five Year Plan (2012-17).

The Innerwear Category

Innerwear is one of the high growth categories in the apparel market and promises growth and innovation. The increase in income levels, along with higher discretionary spending, growing fashion orientation of consumers, and product innovations by the innerwear market have turned innerwear from a traditionally utilitarian item to an essential fashion requirement.

The size of the Indian Innerwear market is INR 15,870 crore (USD 2.9 billion); the category is also growing at an impressive CAGR of 12% and is expected to reach INR 27,900 crore (USD 5.1 billion) by 2017. The women's innerwear market, which is driven by value-added innerwear products, contributes around 60% to the market. The growth of the innerwear category is primarily centered in urban India. The trend towards western outfits, combined with the demand for occasion- and outfit-based innerwear, is acting as a boost for the market. The demand for innerwear with higher functionality and greater comfort is rising fast. The market for innerwear product variations like seamless intimates, plus size inner wear, body shape enhancers, etc. is burgeoning in the metros and mini metros.

Consumer Innerwear consumers can be segregated into four core groups on the basis of their attitude towards innerwear products and their buying behaviour. The first group comprises men and women employed in high-paying jobs, earning high disposable incomes, having high aspirations, seeking only branded innerwear. The next group also consists of consumers with well-paying jobs, but these consumers assess value along various parameters of which price is just one; others are convenience of purchase, easy availability, style, quality, etc. Again, these consumers do not have any issue with paying a premium for innerwear products of a particular brand as long as the quality is assured. The third group includes consumers from mostly tier -I, -II and -III cities having high aspirations and eager to have a metro-like lifestyle. They are open to experimenting through purchasing aspirational brands. The last group of consumers consists of men and women who have low

disposable incomes but have big dreams and aspirations. They have cautious buying patterns and value price over brands. For them comfort, price and quality are most crucial while purchasing innerwear.

Indian Innerwear Market Among the core apparel categories, innerwear appears to be a potential growth category across all segments. With rising incomes, higher discretionary spending, greater number of working women and growing fashion consciousness, the innerwear segment is expected to continue to progress. Currently, the Indian innerwear market is worth Rs. 19,960 crore (2014) and is estimated to grow at 13% to reach Rs. 68,270 crore by 2024. The innerwear market has traditionally been largely unorganised, although in the past few years, the organised innerwear segment has shown promising growth in both men's and women's categories.

Looking to the Future

Simply put, the future of the apparel market, and the innerwear category, looks promising. At the same time, fashion retailers have to face some daunting challenges prior to tapping the extant opportunities. Rising real estate costs, increasing power tariffs, and supply chain inefficiencies are some of the issues that have to be tackled with utmost prudence. The growth story of Indian consumption is expected to revive in the medium to long term, but it will require improvements in the overall business performance and managerial prudence of the highest degree to benefit from this growth. To emerge a winner in a market marked by the presence of multiple players, brands and retailers have to optimize their business operations by addressing the challenges and harnessing market opportunities. Understanding the psyche of the Indian consumer, amalgamating the Indian style of functioning with western management techniques, and tailoring fashion offerings to defined consumer segments, are some of the key areas on which fashion and innerwear players have to focus.

EMPLOYEES STATE INSURANCE ACT, 1948

The promulgation of Employees' State Insurance Act, 1948 (ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi-dimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act, 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

It also provides for the manner and time period within which a complaint shall be made to the Internal Complaints Committee i.e. a written complaint is to be made within a period of 3 (three) months from the date of the last incident.
