An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. In making an investment decision prospective investors must rely on their own examination of our Company and the terms of this offer including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider as immaterial to our operations.

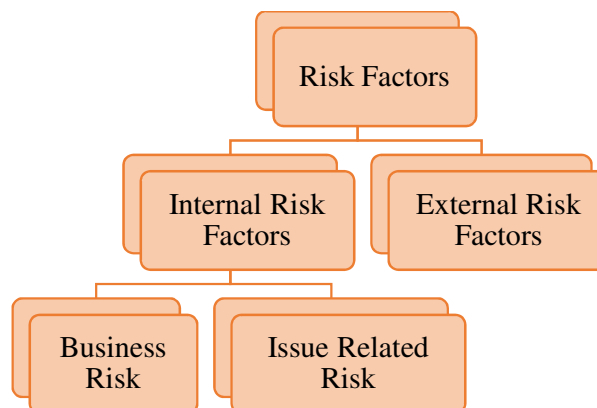

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. To obtain a complete understanding, you should read this section in conjunction with the chapters titled “Our Business” beginning on page 121, “Our Industry” beginning on page 101 and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 314 respectively, of this Draft Prospectus as well as other financial information contained herein.

The following factors have been considered for determining the materiality of Risk Factors:

- *Some events may not be material individually but may be found material collectively;*
- *Some events may have material impact qualitatively instead of quantitatively;*
- *Some events may not be material at present but may have material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, the financial information of the Company used in this section is derived from our financial statements under Indian GAAP, as restated in this Draft Prospectus. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviations” beginning on page 02 of this Draft Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

A. INTERNAL RISK FACTORS**A. Business Risks/ Company specific Risk**

- 1. Increase in the cost of, or a shortfall in the availability of our raw materials, and in particular, Steel shapes & sections and Zinc, could have an adverse effect on our business, results of operations and financial condition.***

The principal raw materials used by us for manufacturing galvanized steel structures are Steel shapes & sections which includes MS Plates, MS Angles, MS Pipes and Zinc. The price of these metals have been fluctuating which is evident from the cost of materials consumed to revenue ratio of 62.06%, 64.58% and 70.12% of our total revenues for the period ended September 30, 2016 and the Fiscal Years 2015-16 & 2014-15, respectively. The price and availability of these raw materials depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such materials, production and transportation cost, duties and taxes and trade restrictions. We buy steel from Tata Steels Ltd, Jindal Pipes Ltd, Hi-Tech Pipes Ltd, Madhav Stelco Pvt. Ltd. etc. We buy zinc in bulk from Hindustan Zinc Ltd, sometimes we buy from local vendors also. We usually do not enter into long term supply contracts with any of our raw material suppliers and typically place orders with them after firm-orders is received. The absence of long term contracts at fixed prices exposes us to volatility in the prices of raw materials that we require. If we are unable to compensate for or pass on our increased costs to end-customer, such price increases could have an adverse impact on our result of operations, financial condition and cash flows. However, where the supply contracts is for a longer duration, say 6 months and above, generally we insist on price escalation clause. We also face a risk that one or more of our existing suppliers may discontinue their supplies to us. Any inability on our part to procure raw materials from alternate suppliers in a timely fashion, or on terms acceptable us, may adversely affect our operations.

- 2. Within the parameters as mentioned in the chapter titled 'Objects of this Issue' beginning on page 90 of this Draft Prospectus, our Company's management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.***

The fund requirement and deployment, as mentioned in the "Objects of the Issue" on page 90 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan and order position. We cannot assure that the current business plan will be implemented or order shall be executed in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. Further the Company has applied to Bank of India for enhancing fund based limits to Rs. 700.00 million vide email dated January 21, 2017. The application is under process. Meanwhile the requirement of working capital for the initial public offer has been based on the enhanced limit of Rs. 700.00 million. The deployment of the funds as stated under chapter "Objects of the Issue" is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency.

- 3. We have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of working capital funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds could adversely affect our growth plans. We meet our working capital requirements through our owned funds, internal accruals and debt. Any shortfall in our net owned funds, internal accruals and our

inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 90 of this Draft Prospectus.

4. *Decrease in Sales of our wholly owned subsidiary, Salasar Stainless Limited in last three financial years.*

Sales of our wholly owned subsidiary, Salasar Stainless Limited has been on downtrend for last three financial years due to competition from unorganized sector and decrease in demand of stainless steel pipes which is generally used in capital goods. We have already put substantial resources in setting up the manufacturing plant. If the downtrend continues, we may have to impair our assets which will erode our profitability on consolidation basis. With the government focus on "Make in India", capital goods industry's output may rise which may lead to increase in our sales. For further details regarding financial performance of our Subsidiary, please refer to Chapter titled “Our Subsidiary” beginning on page 175 of this Draft Prospectus.

5. *Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an adverse effect on our business, results of operations and financial condition.*

Some of our strategic initiatives in the past have not resulted in the achievement of optimal growth and scale in our business and operations. For instance, in the year 2013, we entered into a joint venture and formed a company titled UNI Global Solution Inc to conduct the business of marketing of fabricated steel structures in USA. However, in Fiscal Year 2014-15, we closed this joint venture and wrote off investment of Rs. 0.46 million and loan of Rs. 19.82 million provided by us to UNI Global Solution, Inc. We cannot assure you that we will not sustain similar losses in future. We strive for enhancing shareholders value and work towards that goal, in view of that we will keep options open for strategic alliances.

6. *Application pending under Enforcement Department, Securities Exchange Board of India (“SEBI”) for settlement of adjudication proceedings filed by our Company, any liability on account of said proceedings which may have adverse effect on business and financial position of our Company*

Our Company has received notice bearing reference no. EFD/DRAIV/OW/33331/8/2016 dated December 09, 2016 issued from Enforcement Department, SEBI for violation of provisions of Securities Exchange Board of India (Prohibition of Insider Trading) Regulations, 1992 in the matter of non-disclosure of purchase/sale of shares in the scrip of Ashutosh Paper Mills Limited.

As per the above said notice SEBI has decided to initiate/launch adjudication proceedings against our Company under section 15A(b) of the SEBI Act, 1992 for the alleged violation and the notice may be treated as a show cause notice for the purpose of Regulation 4 of the Securities Exchange Board of India (Settlement of Administrative and Civil Proceedings) Regulations, 2014.

Our Company has applied on January 09, 2017 for settlement under Securities Exchange Board of India (Settlement of Administrative and Civil Proceedings) Regulations, 2014. The matter is currently pending under Division of Regulatory Action-II, Enforcement Department, SEBI.

7. *Any delay or default in payment from our customers could result in the reduction of our profits and affect our cash flows.*

Our operations involve extending credit, ranging typically from 60 to 90 days, to our customers in respect of our products. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Accordingly, we had and may continue to have high levels of outstanding receivables. For the period ended September 30, 2016 and Fiscal Years ended 2015-16 & 2014-15, our trade receivables were

Rs. 721.86 million, Rs. 568.94 million and 542.19 million, respectively, which constituted 49.01%, 20.55% and 14.10 % respectively of our total revenues for the same periods respectively as per restated standalone financial statements. Debtors over six months have also increased, during the aforesaid period. If our customers delay or default in making these payments, our profits margins and cash flows could be adversely affected. We have written off Rs. 23.16 million as bad debts during the last 5 years as per standalone financial statements.

8. *Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.*

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials, assumptions relating to operational efficiencies, as well as assumption in relation to galvanization of products manufactured by us. Actual production levels and utilization may differ significantly from the estimated production capacities or historical estimated capacity utilization of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Prospectus. For further information, see the section titled “Our Business” on page 121 of this Draft Prospectus.

9. *We appoint contract labour for carrying out certain of our operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations and financial condition.*

In order to retain flexibility and control costs, we appoint independent contractors who in turn engage on-site contract labour for performance of certain of our operations. As on January 31, 2017, more than 120 contract labourers were engaged at our manufacturing units apart from project sites. Although we do not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractor. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition. In addition, under the Contract Labour Act, we may be required to absorb a number of such contract labourers as permanent employees. Accordingly, any such order from a regulatory body or court may have an adverse effect on our business, results of operations and financial condition. The Company is taking necessary steps to ensure to follow all legal requirements in this regards.

10. *We face foreign exchange risks, primarily in our export operations that could adversely affect our results of operations.*

We export our products to other countries that are generally priced in foreign currency. Accordingly any rise in the value of the Rupee against the foreign currency would decrease the Rupee cost of such products. Further, our consolidated revenues include other operating income which includes foreign exchange fluctuation. Although we closely follow our exposure to foreign currencies and selectively enter into hedging transactions in an attempt to reduce the risks of currency fluctuations, these activities are not always sufficient to protect us against incurring potential losses if currencies fluctuate significantly. Any such losses on account of foreign exchange fluctuations may adversely affect our results of operations.

- 11. *We may not be able to qualify for, compete and win orders for Transmission Towers, which could adversely affect our business and results of operations.***

We obtain orders for Transmission Towers through a competitive bidding process on turnkey basis. For the period ended September 30, 2016, transmission towers sales contributed 34.45% of sales as compared to 6.33% for the year ended March 31, 2016 and 4.50% for the year ended March 31, 2015. In selecting contractors for major projects, clients generally limit the tender to contractors (or sub-contractors) who have pre-qualifications qualified based on several criteria including experience, technical and technological capacity, previous performance, reputation for quality, safety record, the financial strength of the bidder as well as its ability to provide performance guarantees. However, price competitiveness of the bid is typically one of the most important selection criterion. We are currently qualified to bid for orders up to a certain value and size and therefore may not be able to compete for larger orders for Transmission Towers. If we are unable to pre-qualify for orders that we intend to bid on, or successfully compete for and win such orders, our business, results of operations and financial condition may be adversely affected.

- 12. *Our transmission business is substantially dependent on projects awarded or funded by the Central or State Governments and we derive substantial revenues from contracts with a limited number of government entities. Any changes in the Central or State Government policies or focus, or delay in payment may affect our business and results of operations.***

Our transmission business increasingly relies on projects awarded or funded by the Government or State Governments. We have various government clients and our top client in transmission business is UP Power Transmission Corporation Limited and Paschimanchal Vidyut Vitaran Nigam Limited. Our business is thus subject to risks relating to or arising from the Government or State Governments' personnel, structural, or policy changes or any changes in practices or focus at the Government or State Government level.

There can be no assurance that the Government or the State Governments will continue to place emphasis on the power sector. In the event of any adverse change in budgetary allocations for power transmission or a downturn in available work in the sector, we may suffer significant losses or incur substantial costs.

- 13. *Our top five clients contribute approximately 63.52 % of our revenues for the period ended September 30, 2016. Any loss of business from one or more of them may adversely affect our revenues and profitability.***

Our top five clients contribute approximately 63.52 % of our revenues for the period ended September 30, 2016 and this ratio was 64.48% and for year ended March 31, 2016. Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

- 14. *We have to update the name of our company in some of the statutory approvals and certificates due to the conversion of our company.***

Few of our statutory approvals and certificates like factory licence are in the name of Salasar Techno Engineering Private Limited. Since our company was converted into a public limited company vide fresh Certificate of Incorporation dated August 16, 2016 we have to update the name Salasar Techno Engineering Limited on few of the statutory approvals and certificates. We cannot ensure that we will be able to update the said documents in timely manner. However we do not foresee any problem in our operations.

15. In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained all the requisite permits and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with.

Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

We have regular system of checking for any regulatory license being expiring & to apply for renewal within stipulated time. For further details, please refer to section titled “Government and Other Statutory Approvals” beginning on page 344 of this Draft Prospectus.

16. We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.

The industry, in which we are operating, is highly and increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

17. One of our Group Entity namely Hill View Infrabuild Ltd had incurred loss in financial year 2015-16.

One of our Group Entity namely Hill View Infrabuild Ltd had incurred loss in the financial year 2015-16. For further details regarding financial performance of our Group Entities, please refer to Chapter titled “Our Group Entities” beginning on page 179 of this Draft Prospectus. Sustained financial loss by our Group Entity may not be perceived positively by external parties such as customers, bankers, suppliers etc, which may affect our credibility and business operations. The loss has been due to onetime write off of loan amounting of Rs. 6.50 million.

18. We have issued Equity Shares during the last one year at a price that may be below the Issue Price.

During the last one year we have issued Equity Shares at a price lower than the Issue Price as detailed in the following table.

Date of Allotment	Number of Equity Shares	Face Value (Rs.)	Issue Price (Rs.)	Nature of Consideration	Reason of Allotment

Our Company had negative cash flows from our investing activities as well as financing activities in some of the previous year(s) as per the Restated Standalone Financial Statements and the same are summarized as under:

(Rs. In million)

Particulars	As on September 30, 2016	As on March 31, 2016	As on March 31, 2015	As on March 31, 2014	As on March 31, 2013	As on March 31, 2012
Cash Flow from/ (used in) Operating Activities	69.70	112.81	109.71	51.31	74.76	50.20
Cash Flow from/ (used in) Investing Activities	9.90	(30.73)	(3.76)	(188.82)	(8.74)	(0.18)
Cash Flow from/ (used in) Financing Activities	(67.64)	(85.03)	(119.11)	156.15	(61.57)	(59.21)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

21. Our registered office is not owned by us & is taken on lease.

Our registered office has been taken on lease. Our registered office is situated at E-20, South Extension I, New Delhi-110049, have been taken on rent vide lease agreement dated August 24, 2016 for a period of 10 months. In case the owner of the property does not renew the said lease agreement or renew the same on the term which are detrimental to the company we may suffer increased relocating costs. For further details of the property refer chapter titled “Our Business” beginning on page 121 of this Draft Prospectus.

22. If we are unable to raise additional capital, our business prospects could be adversely affected.

We intend to fund our development plans through our internal accruals, cash flow from operations and working capital from banks. We will continue to incur significant expenditure in maintaining and growing our existing manufacturing infrastructure. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our internal accruals and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, the inability to obtain sufficient financing could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on favourable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

23. Our Company has availed certain unsecured loans that are recallable by the lenders at any time.

Our Company has availed unsecured loans to the tune of Rs. 21.81 million as on September 30, 2016 that are recallable on demand by the lenders including our Promoters, shareholders and our group companies. In such cases, the lender is empowered to require repayment of the facility at any point in time during the tenure. We may not be able to secure fresh funds or have internal accruals to repay those loans. As a result, our cash flow may be affected resulting in working capital constraints. However since all of them belong to promoter group, we do not foresee any such situation. For further details please refer chapter titled “Financial Information” beginning on page 187 of this Draft Prospectus.

24. We have entered into certain transactions with related parties. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.

We have entered into certain transactions with our Promoters, Promoter Group, Group Companies, Directors and their relatives and may continue to do so in future. For absolute value of all transactions entered into with our related party entities please refer to Statement of Related Party Transactions under chapter “Financial Statement” beginning on page 187 of this Draft Prospectus. These transactions or any future transactions with our related parties could potentially involve conflicts of interest. However the Company cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on business and financial results. Our Company shall follow the provisions as laid down under Companies Act, 2013 and SEBI (LODR) Regulations, 2015.

25. Our Company has contingent liabilities which if materialises may adversely affect the financial position of the Company.

As on September 30, 2016 our Company has contingent liabilities of Rs. 651.27 million towards bank guarantees, corporate guarantee & tax demand not provided for. The said contingent liabilities if materialises may adversely affect the financial position of our Company. The Bank guarantee is issued to customers against advance or as performance guarantee. These bank guarantees are released after a stipulated period of time even after project completion. Though in past there has been no instance of our bank guarantees being encashed, we cannot assure you that this will not happen in future.

26. In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

27. Our success depends largely upon the services of our Management and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain key managerial personnel may adversely affect the operations of our Company.

Our success largely depends on the continued services and performance of our management and other key personnel which is defined as under:

Name	Designation	Department
Mr. Alok Kumar	Chairman & Managing Director	Purchases & Finance
Mr. Shahank Agarwal	Jt. Managing Director	Operations, Sales & Marketing of telecom towers and solar mounting structures
Mr. Shalabh Agarwal	Whole Time Director	Operations, Sales & Marketing of Power Transmission Line Towers.

Though they have been assisted by team of professionals, the loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new turn key projects and expand our business.

28. One of our Key Management Personnel are associated with the Company less than one year.

One of our Key Management Personnel i.e. Company Secretary is associated with the Company for a period of less than one year. For details of Key Management Personnel and their appointment, please refer to chapter “Our Management” beginning on page 153 of this Draft Prospectus.

29. Certain documents in relation to educational qualifications and experience of our Directors and Key Managerial Persons are not available.

Certain supporting documentation for details required to be stated under brief profiles of Directors and KMPs of our Company in “Our Management” on page 153, including in respect of educational qualifications and work experience could not be made available to our Company, despite due enquiries with such Directors and KMPs. We have relied on certain indirect sources for such information.

30. Our trademark or logo SALASAR is under the process of registration. If we are unable to protect our trademarks and trade-names, others may be able to use our trademarks and trade-names to compete more effectively.

We have filed the application dated December 21, 2016 in form TM-1 for registration of our Logo SALASAR under the Trademarks Act, 1999. In case of no registration, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks. We cannot assure you that we will be able to obtain such registrations in a timely manner. As a result, we may be unable to prevent use of these names or variations thereof by any other party or ensure that we will continue to have a right to use it. We further cannot assure you that any third party will not infringe upon our trademark, logo and/or trade name in a manner that may have a material adverse effect on our business prospects, reputation and goodwill.

31. Our operations are subject to environmental, health and safety laws and regulations.

Our operations are subject to various Central and State environmental laws and regulations relating to the control of pollution in the area where we operate. In particular, the discharge or emission of chemicals, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage to others may give rise to liability to the Government and third parties, and may result in our incurring costs to remedy such discharge or emissions. There can be no assurance that compliance with such environmental laws and regulations will not result in a curtailment of operations, or a material increase in the costs of operations, or otherwise have a material adverse effect on the financial condition and results of our operations. Environmental laws and regulations in India have been increasing in stringency and it is possible that they will become significantly more stringent in the future. Stricter laws and regulations, or stricter interpretation of the existing laws and regulations, may impose new liabilities on us or result in the need for additional investment in pollution control equipment, either of which could adversely affect our business, financial condition or prospects. While as of the date of this Draft Prospectus, we are not subject to any environmental legal proceedings, we may be impleaded in such legal proceedings in the course of our business. Such legal proceedings could divert management time and attention, and consume financial resources in defense or prosecution of such legal proceedings or cause delays in the production, development or commencement of

operations of our projects. No assurance can be given that we will be successful in all, or any, of such proceedings.

32. *We are subject to risk of fraud, theft, embezzlement by our employees, contractors and customers, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

As of September 30, 2016, we had total inventory consisting of raw materials, stock in process and finished goods to the value of Rs. 384.95 million as per our Restated Standalone Financial Statements. Our operations may be subject to incidents of theft or damage to inventory in transit, prior to or during stocking. We may also encounter some inventory loss on account of employee/contractor/vendor fraud, theft, embezzlement and general administrative error. Although, we have set up various security measures, including CCTV in our offices and the existing Manufacturing Units at Ghaziabad, deployment of security guards and follow stringent operational processes such as periodic stock taking, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition.

33. *Orders placed by customers may be delayed, modified, cancelled or not fully paid by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may result in the postponement of the delivery of products or cause its cancellation. Accordingly, it is difficult to predict with certainty that, when, and to what extent we may be able to deliver the orders placed. Further, we may be bound to certain terms in the contracts entered with the customers any non-adherence to the same may lead to breach of the contract, which may subject us to penalties and liquidated damages. Any failure to adhere to the conditions which may be beyond our control may subject us to liquidated damages which could have an effect on the result of operation and cash flow.

34. *Our Company has filed certain forms as prescribed under the Companies Act with Registrar of Companies with additional fees.*

Under the provisions of Companies Act, certain forms are required to be filed within prescribed timelines. In past, our Company has exceeded such timeline for filing the forms and has paid additional fees. If our company fails to comply with the provisions for filing of forms under the provisions of the Companies Act, then the company and every officer of the company who is in default is punishable with fine.

35. *Certain of our old corporate records in connection with the allotment of our Equity Shares are not available.*

We are unable to trace certain corporate records in relation to allotment of shares of our Company. These corporate records include documents relating to applications for certain allotments of our equity shares. These documents pertain to the period commencing from year 2006 to 2009. We have also been unable to trace copies of certain transfer deeds for transfer of equity shares made by and to our Directors, their relatives & group entity. Despite having conducted an extensive search in the records of our Company, we have not been able to retrieve the aforementioned documents, and accordingly, have relied on other documents, such as our share transfer register, register of members, board resolutions and minutes, annual returns to verify the details of our equity shares allotted during this period, and details of transfers of equity shares made by and to our Directors, their relatives and group entities.

- 36. *Loans availed by our Company have been secured on personal guarantees of our Promoter and Promoter Group members. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees or collateral securities provided by our Promoter and Promoter Group members.***

Our Promoter and Promoter Group Members has provided personal guarantees as security to secure our existing borrowings of Rs. 1000.00 million taken from Bank of India and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter and Promoter Group Members may be invoked and/ or the security may also be enforced, which could negatively impact the reputation and networth of the Promoters. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoter and Promoter Group Members may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “Statement of Financial Indebtedness” on page 244 of this Draft Prospectus.

- 37. *Our insurance coverage may not be sufficient or may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.***

We have taken insurance which may not be adequate enough for covering the entire future unforeseen liabilities that might occur in the normal course of business. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time by the insurers. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected. For further details on insurance arrangements, see the section titled “Our Business – Insurance” on page 121 of this Draft Prospectus.

- 38. *This Draft Prospectus contains information from an industry report which was prepared by CARE pursuant to an engagement with our Company.***

This Draft Prospectus includes information that is derived from the industry report dated December 23, 2016, titled “Overview of the Steel & Allied Industry in India” (“CARE Report”) prepared by CARE, an independent consultant, pursuant to an engagement with our Company. The CARE Report was prepared by CARE for the purpose of confirming our understanding of the customized galvanized and non-galvanized fabricated steel structures like Telecom Towers, Transmission Towers, Solar Module Mounting Structures etc. Neither we, nor any of the LM, nor any other person connected with the Issue has verified the information in the CARE Report. The CARE Report highlights certain industry and market data. Such data is subject to many assumptions. There are no standard data gathering methodologies in the industries in which we conduct our business, and methodologies and assumptions may vary widely among different industry sources. Further, such assumptions may change based on various factors. We cannot assure you that CARE’s assumptions are correct or will not change and accordingly our position in the market may differ from that presented in this Draft Prospectus. Prospective investors are advised not to unduly rely on the CARE Report when making their investment decisions.

39. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of our Company.*

Our Company is engaged in business of manufacturing of galvanized steel products, which attracts tax liability such as Excise, Value added Tax and Service Tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund. Though, we have deposited the required returns under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of our Company.

40. *Our Promoters and the members of our Promoters Group will continue to retain significant control in the Company after the Issue, which will enable them to influence the outcome of matters submitted to shareholders for approval. Our Promoters and the members of our Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.*

As of September 30, 2016, our Promoters and the members of our Promoter Group hold entire issued equity share capital of the Company. After completion of the Issue, our Promoters and the members of our Promoter Group will hold 74.98% of the equity shares capital of the Company and continue to retain a significant control of the Company. As a result, our Promoters and our Promoter Group will have the ability to control our business, including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as our Promoters and the members of our Promoter Group continue to exercise significant control over the Company they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. Our Promoters and the members of our Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

41. *High dependence on the smooth supply and transportation of our products. Supply and transportation are subject to various uncertainties and risks, and delays in delivery or non-delivery may result in rejected or discounted deliveries.*

We depend on transportation services to deliver our products. We rely on third parties to provide such services. Disruptions of transportation services because of weather related problems, strikes, lock-outs, inadequacies in road infrastructure or other events could impair our ability to supply our products to our customers. There is no assurance that such disruptions will not occur in the future. Any such disruptions could materially adversely affect our business, financial condition and results of operations.

42. *Our Order Book does not represent our future revenues and our actual income may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations.*

The Company has orders from which it expects future revenue and profit. Order Book refers to a compilation of our expected revenues from uncompleted orders received. Orders in the order book represent business that is considered firm. Our Order Book does not necessarily indicate future earnings related to the performance of that work, as cancellations or unanticipated variations or scope or schedule adjustments may occur. Due to changes in order schedule, we cannot predict with certainty when or if orders in our Order Book will be executed. In addition, even where an order proceeds as scheduled, it is possible that customers may default and fail to make the payments due. We cannot guarantee that the income anticipated in our Order Book will be realized, or, if realized, will be realized on time or result in profits. Any order cancellations or adjustments, which may occur from time to time, could reduce the amount of our Order Book and the income and profits that we ultimately earn from the business.

Any delay, cancellation, payment and our counterparties may seek liquidated damages due to our failure to complete the required milestones or even terminate the contract totally or refuse to grant us any extension default could have a material adverse effect on our business. Accordingly, the realization of our Order Book and the effect on our results of operations may vary significantly from reporting period to reporting period depending on the nature of such order as well as the stage of completion of such orders as of the relevant reporting date as it is impacted by applicable accounting principles affecting revenue and cost recognition.

43. *Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards. In addition, all income-tax assesseees in India, including our Company, will be required to follow the Income Computation and Disclosure Standards.*

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”). These “IFRS based / synchronised Accounting Standards” are referred to in India as the Indian Accounting Standards (“Ind AS”). The Ministry of Corporate Affairs, Government of India, has through a notification dated February 16, 2015, set out the Ind AS and the timelines for their implementation. Accordingly, our Company is required to prepare their financial statements in accordance with Ind AS for periods beginning on or after April 01, 2017. Given that Ind AS is different in many respects from Indian GAAP under which our financial statements are currently prepared, our financial statements for the period commencing from April 01, 2017 may not be comparable to our historical financial statements. Further, our Restated Financial Statements have been prepared in accordance with Indian GAAP and the Companies Act, and restated in accordance with the SEBI Regulations. These statements have not been drawn up in accordance with Ind AS and they may be impacted if Ind AS were applied to them.

There can be no assurance that the adoption of Ind AS will not affect our reported results of operations or cash flows. Further, we may be required to retroactively apply Ind AS to our historical financial statements, subject to certain exemptions, which may require us to restate financial statements after March 31, 2016, once included. In addition, our management may also have to divert its time and other resources for the successful and timely implementation of Ind AS. Any failure to successfully adopt Ind AS may have an adverse effect on the trading price of our Equity Shares and/or may lead to regulatory action and other legal consequences. Moreover, our transition to Ind AS reporting may be hampered by increasing competition and increased costs for the relatively small number of Ind AS-experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Any of these factors relating to the use of Ind AS may adversely affect our financial condition, results of operations and cash flows. We have not attempted to quantify the impact of Ind AS on the financial information included in this Draft Prospectus, nor have we provided a reconciliation of our financial statements to those under Ind AS.

Further, the Ministry of Finance has issued a notification dated March 31, 2015 notifying Income Computation and Disclosure Standards (“ICDS”), thereby creating a new framework for the computation of taxable income. The ICDS came into force with effect from April 01, 2015 and shall apply to the assessment year 2017-18 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. For example, where ICDS-based calculations of taxable income differ from Indian GAAP or Ind AS-based concepts, the ICDS-based calculations will have the effect of requiring taxable income to be recognised earlier, higher overall levels of taxation to apply or both. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for Minimum Alternate Tax.

The application and interpretation of the ICDS by assessing authorities may differ substantially from our interpretation, and such variations could lead to additional tax demands. It is also possible that the resultant computation of taxable income based on the ICDS and net income based on our Company’s financial statements may be significantly different, and, if they differ, we may be required to recognise taxable income for tax purposes earlier and/or pay higher overall taxes, thus either negatively impacting our effective tax rates, or the amount of taxes paid out relative to the income reported by the relevant accounting standards. This may

lead to tax outflows happening in accounting periods earlier relative to the period when these incomes would get reported under the relevant accounting standards.

I. Risk related to this Issue and our Equity Shares

44. Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

45. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

46. There is no guarantee that the Equity Shares issued pursuant to this Issue will be listed on the BSE and NSE in a timely manner.

We have applied to BSE and NSE to use its name as the Stock Exchange in this offer document for listing our shares on the BSE and NSE. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the BSE and NSE. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

B. EXTERNAL RISK FACTORS

47. Natural calamities and force majeure events may have an adverse impact on our business.

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

48. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.

The Issue Price of the Equity Shares will be determined by our Company in consultation with the LM and will be based on numerous factors. For further information, see the section titled "Basis for Issue Price" on page 96 of this Draft prospectus. The Issue Price may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurances that applicants who are allotted Equity Shares through the Issue will be able to resell their Equity Shares at or above the Issue Price.

49. *The Goods and Services Tax (GST) regimes proposed by the Government of India may have material impact on our operations.*

The Government of India has proposed a comprehensive national Goods and Services Tax (GST) regime that will combine taxes and levies by the Central and State Governments into unified rate structure. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Given the limited liability of information in the public domain covering the GST we are unable to provide/ measure the impact this tax regime may have on our operations.

50. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax (“STT”) is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

In Finance Bill 2017 it is proposed to amend section 10(38) to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October, 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October, 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

51. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

52. *There is no existing market for our Equity Shares, and we do not know if one will develop. The price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Issue. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions and environment towards developments relating to India and volatility in the BSE and the NSE and securities markets elsewhere in the world. Additionally, once listed, we will be subject to a daily “circuit breaker” imposed by stock exchanges in India, which does not

allow transactions beyond specified increases or decreases in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

53. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

54. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

55. *Economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

56. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

57. *Investors may be adversely affected due to retrospective tax law changes made by the GoI affecting us.*

Certain recent changes to the Income Tax Act provide that income arising directly or indirectly through the sale of a capital asset of an offshore company, including shares, will be subject to tax in India, if such shares derive indirectly or directly their value substantially from assets located in India. The term "substantially" has not been defined under the Income Tax Act and therefore, the applicability and implications of these changes are largely unclear. Due to these recent changes, investors may be subject to Indian income taxes on the income arising directly or indirectly through the sale of the Equity Shares. In the past, there have been

instances where changes in the Income Tax Act have been made retrospectively and to that extent, there cannot be an assurance that such retrospective changes will not happen again.

58. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

59. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Capital gains arising from the sale of our Equity Shares are generally taxable in India. Global Economy

As per International Monetary Fund (IMF) October 2015 World Economic Outlook (WEO), global growth, estimated at 3.1% in 2015, is projected to grow at 3.4% in 2016 and 3.6% in 2017. The pickup in global activity is projected to be more gradual especially in emerging market and developing economies.

In advanced economies, a modest and uneven recovery is expected to continue, with a gradual further narrowing of output gaps. The picture for emerging market and developing economies is diverse but in many cases challenging. The slowdown and rebalancing of the Chinese economy, lower commodity prices, and strains in some large emerging market economies will continue to weigh on growth prospects in 2016–17.

The projected pickup in growth in the next two years — despite the ongoing slowdown in China — primarily reflects forecasts of a gradual improvement of growth rates in countries currently in economic distress, notably Brazil, Russia, and some countries in the Middle East, though even this projected partial recovery could be hit by new economic or political shocks.

On the other hand, the World Bank is revising its 2016 global economic growth forecast down to 2.4 percent from the 2.9 percent pace projected in January. The move is due to sluggish growth in advanced economies, stubbornly low commodity prices, weak global trade, and diminishing capital flows. Commodity-exporting emerging market and developing economies have struggled to adapt to lower prices for oil and other key commodities. Growth in these economies is projected to advance at a meager 0.4 percent pace this year, whereas growth in commodity importers has been more resilient. In an environment of weak growth and eroding policy buffers, structural reforms have become even more urgent.

Emerging market and developing economies (EMDEs) are facing stronger headwinds, including weaker growth among advanced economies and low commodity prices. Significant divergences persist between commodity

exporters struggling to adjust to depressed prices and commodity importers showing continued resilience. Global growth is projected to pick up to 3% by 2018, as stabilizing commodity prices provide support to commodity exporting EMDEs.

As of 2015, Brazil, China, France, Germany, India, Indonesia, Italy, Japan, Mexico, Russia, the United Kingdom, the United States and the European Union, these countries or regions have reached an economy of at least the US\$ 2 billion for GDP in nominal terms or PPP.

Globally investment remains soft amid weaker growth prospects and high political uncertainty, while export growth has slowed due to moderate external demand. Despite the expected momentum of lower energy prices, and the ongoing improvement of labor markets, growth is projected to level off in 2016 rather than accelerate.

Investment growth has also slowed substantially, especially in commodity exporters, reflecting in part the tightening of domestic policies and weak capital flows. In China, a gradual rebalancing is taking place at the national level, with strong growth in services and policy support measures that mitigate the slowdown in industrial activity. Brazil and the Russian Federation are still in recession. Global merchandise trade remains subdued, reflecting rebalancing in China and weaker demand from commodity exporters, which together contributed to an outright contraction in overall EMDE merchandise imports in 2015.

Indian Economy:

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). According to the Economic Survey 2015-16, the Indian economy will continue to grow more than 7 per cent in 2016-17.

The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, RBI's inflation focus supported by benign global commodity prices.

India's Consumer Confidence score in the April-June 2016 quarter declined to 128 from the high of 134 in the January-March 2016 quarter. India was ranked the highest globally in terms of consumer confidence during October-December quarter of 2015, continuing its earlier trend of being ranked the highest during first three quarters of 2015, as per the global consumer confidence index created by Nielsen.

Market Size:

According to the IMF World Economic Outlook Update (January 2016), India's economy is forecast to grow between 7 and 7.75 percent during FY 2016-17, despite the uncertainties in the world market. The Economic Survey of 2015 – 16 predicts that India's economy will grow more than seven percent for the third consecutive year 2016-17 and may begin to grow to eight percent or more over the next two years.

As per industry inc., after the recent demonetisation of certain currency notes by the GoI, GDP growth rate in FY'17 may dip a little compared to the last two years, but even then India is likely to outpace most other major economies .

Further, India's foreign exchange reserves stood at US\$ 360 billion by end of March 2016, as compared with US\$ 342 billion at same time last year, according to data from the Reserve Bank of India (RBI).

The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2011-12) prices 2014-15 is Rs.106.4 trillion (US\$ 1.58 trillion), as against Rs.99.21 trillion (US\$ 1.47 trillion) in 2013-14, registering a growth rate of 7.3 per cent. The economic activities which witnessed significant growth were

'financing, insurance, real estate and business services' at 11.5 per cent and 'trade, hotels, transport, communication services' at 10.7 per cent.

According to some economists, India could grow at a potential 8 per cent on average during from fiscal 2016 to 2020 if powered by greater access to banking, technology adoption, urbanisation and other structural reforms.

Recent Developments across various sectors:

India Industrial Production:

Industrial production in India went up 0.7 percent year-on-year in September of 2016, following two straight months of falls (-0.7 percent in August and -2.5 percent in July) and slightly above market expectations of a 0.5 percent gain. Manufacturing rose 0.9 percent (-0.2 percent in August), also the first gain in three months and the strongest since October last year. Electricity increased 2.4 percent (0.1 percent in August) while mining shrank 3.1 percent (-5.8 percent). From April to September, industrial production declined 0.1 percent. Industrial Production in India averaged 6.22 percent from 1994 until 2016, reaching an all-time high of 20.00 percent in November of 2006 and a record low of -7.20 percent in February of 2009.

India's Gross Capital Formation:

Gross Fixed Capital Formation in India decreased to Rs.8,583.37 Billion in the third quarter of 2016 from Rs.8,639.56 Billion in the second quarter of 2016. Gross Fixed Capital Formation in India averaged Rs.4,951.59 Billion from 2001 until 2016, reaching an all-time high of Rs.9,091.17 Billion in the third quarter of 2015 and a record low of Rs.2,021.90 Billion in the first quarter of 2002.

With the improvement in the economic scenario, there have been various investments leading to increased M&A activity in the country. India has emerged as one of the strongest performers in terms of deals related to mergers and acquisitions (M&A). The total M&A deals involving Indian companies grew by 82 per cent to US\$ 27 billion during January to June 2016, which is the highest in the first six months in any year since 2011, led by a four and a half time increase of Indian acquisitions abroad at US\$ 4.5 billion.

Under the new National Mineral Exploration Policy (NMEP), the Government of India plans to conduct e-auction of 62 mineral blocks of minerals such as iron ore, limestone and gold located across several states to further open up the mining sector and increase output of minerals in 2016-17.

Steel Sector Overview

Introduction

India is the world's third-largest producer of crude steel (up from eighth in 2003) and is expected to become the second-largest producer by the end of FY 2016. The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

Indian Iron and steel industry, with its strong forward and backward linkages, contributes significantly to overall growth and development of the economy. As per official estimates, the Industry today directly contributes 2% of India's Gross Domestic Product (GDP) and its weightage in the official Index of Industrial Production (IIP) is 6.2%¹. The per capita consumption of total finished steel in the country has risen from 51 kg in 2009-10 to about 60 kg in 2014-15.

Being a core sector, steel industry tracks the overall economic growth in the long term. Also, steel demand, being derived from other sectors like automobiles, consumer durables and infrastructure, its fortune is dependent on the growth of these user industries. The Indian steel sector enjoys advantages of domestic availability of raw materials and relatively cheap labour. Iron ore is also available in abundant quantities. This provides major cost advantage to the domestic steel industry.

The Indian steel industry is largely iron-based through the blast furnace (BF) or the direct reduced iron (DRI) route. Indian steel industry is highly consolidated. About 60% of the crude steel capacity is resident with integrated steel producers (ISP). But the changing ratio of hot metal to crude steel production indicates the increasing presence of secondary steel producers (non-integrated steel producers) manufacturing steel through scrap route, enhancing their dependence on imported raw material.

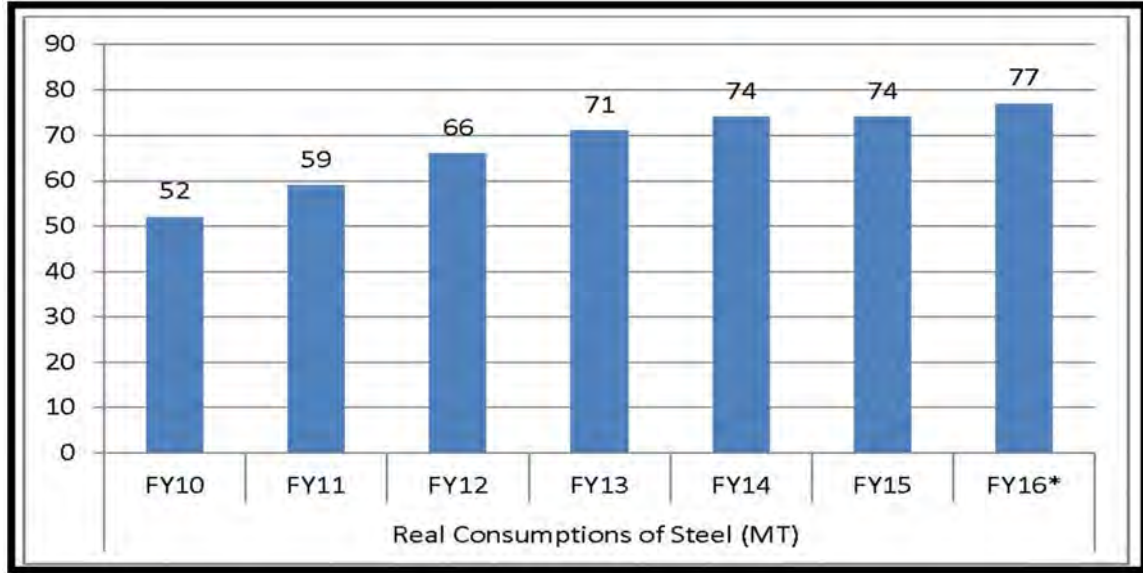

Market Size

In 2015 India produced 91.46 million tonnes (MT) of finished steel. Total finished steel production in the country increased at a CAGR of 7.45 per cent over FY11-15. During April-August 2016, crude steel production in the country grew by 7 per cent year-on-year to ~40 MT.

Over April-August 2016, steel imports fell 34.5 per cent year-on-year to 3.01 MT, while steel exports rose 23.6 per cent year-on-year to 2.38 MT.

¹Erstwhile Planning Commission Report

Steel consumption in the country is expected to grow 5.3 per cent year-on-year to ~ 85 MT during FY 2016-17, led by growth in the construction and capital goods sector.

Galvanising

Galvanising is the process of coating zinc on the surface of steel for preventing corrosion. The zinc coating renders zinc iron alloy on the surface which is stable and protects the parent metal from corrosion. The hot dip galvanizing process is the oldest and most used in the steel industry. The steel is first dipped in the flux solution to prepare the surface for zinc adherence and good bonding between the steel and zinc. The steel is dipped into molten zinc at 450 C, and reaction is initiated between steel and zinc. The quantum of free zinc on the alloy layer depends on the wire speed, wiping methodology and zinc temperature.

Quality Testing

Our Company is in strict adherence to its ISO 9001:2015, ISO 14001:2015 & OHSAS 18001:2007 accreditation, and has an in-house QAP (Quality Assurance Plan) to provide quality products both in manufacturing and services. Global Economy

As per International Monetary Fund (IMF) October 2015 World Economic Outlook (WEO), global growth, estimated at 3.1% in 2015, is projected to grow at 3.4% in 2016 and 3.6% in 2017. The pickup in global activity is projected to be more gradual especially in emerging market and developing economies.

In advanced economies, a modest and uneven recovery is expected to continue, with a gradual further narrowing of output gaps. The picture for emerging market and developing economies is diverse but in many cases challenging. The slowdown and rebalancing of the Chinese economy, lower commodity prices, and strains in some large emerging market economies will continue to weigh on growth prospects in 2016–17.

The projected pickup in growth in the next two years — despite the ongoing slowdown in China — primarily reflects forecasts of a gradual improvement of growth rates in countries currently in economic distress, notably Brazil, Russia, and some countries in the Middle East, though even this projected partial recovery could be hit by new economic or political shocks.

On the other hand, the World Bank is revising its 2016 global economic growth forecast down to 2.4 percent from the 2.9 percent pace projected in January. The move is due to sluggish growth in advanced economies, stubbornly low commodity prices, weak global trade, and diminishing capital flows. Commodity-exporting emerging market and developing economies have struggled to adapt to lower prices for oil and other key commodities. Growth in these economies is projected to advance at a meager 0.4 percent pace this year, whereas growth in commodity importers has been more resilient. In an environment of weak growth and eroding policy buffers, structural reforms have become even more urgent.

Emerging market and developing economies (EMDEs) are facing stronger headwinds, including weaker growth among advanced economies and low commodity prices. Significant divergences persist between commodity exporters struggling to adjust to depressed prices and commodity importers showing continued resilience. Global growth is projected to pick up to 3% by 2018, as stabilizing commodity prices provide support to commodity exporting EMDEs.

As of 2015, Brazil, China, France, Germany, India, Indonesia, Italy, Japan, Mexico, Russia, the United Kingdom, the United States and the European Union, these countries or regions have reached an economy of at least the US\$ 2 billion for GDP in nominal terms or PPP.

Globally investment remains soft amid weaker growth prospects and high political uncertainty, while export growth has slowed due to moderate external demand. Despite the expected momentum of lower energy prices, and the ongoing improvement of labor markets, growth is projected to level off in 2016 rather than accelerate.

Investment growth has also slowed substantially, especially in commodity exporters, reflecting in part the tightening of domestic policies and weak capital flows. In China, a gradual rebalancing is taking place at the national level, with strong growth in services and policy support measures that mitigate the slowdown in industrial activity. Brazil and the Russian Federation are still in recession. Global merchandise trade remains subdued, reflecting rebalancing in China and weaker demand from commodity exporters, which together contributed to an outright contraction in overall EMDE merchandise imports in 2015.

Major Economies – Recent Developments and Outlook:

Major advanced economies are at different stages of their post-crisis recovery but are expected to stabilize around a weak growth trajectory. Rising or high public debt and monetary policy rates at or near the zero lower bound could reduce the effectiveness of counter-cyclical policies, leaving these economies more vulnerable to domestic and external shocks. At the same time, declining productivity growth and aging populations exert a more fundamental drag on potential growth.

United States – Growth Stabilising:

Softer-than-expected activity since the start of 2016 has led to downward revisions to growth projections. Sectors that rely on oil-related activities or exports have faced increasing headwinds. Low oil prices, and associated financial stress, has led to a collapse of capital expenditure in the energy sector. As for external trade, a strong U.S. dollar and weakening demand from emerging markets contributed to stalling exports.

In the United States, first-quarter growth was weaker than expected, triggering a downward revision of 0.2 percentage points to the 2016 growth forecast. High-frequency indicators point to a pickup in the second quarter and for the remainder of the year, consistent with fading headwinds from a strong U.S. dollar and lower energy sector investment. The impact of Brexit is projected to be muted for the United States, as lower long-term interest rates and a more gradual path of monetary policy normalization are expected to broadly offset larger corporate spreads, a stronger U.S. dollar, and some decline in confidence.

With the new government slated to change in the country after the recent election, according to various industry experts, it is expected that new government would be able to implement the Keynesian fiscal stimulus that current outgoing government often proposed but was unable to deliver.

In all, U.S. GDP growth is expected to step back to 1.9 percent in 2016, 0.8 percentage point lower than projected in January, and to remain only slightly above 2 percent for the rest of the forecast period, providing modest support to global growth.

Euro Area – Modest Momentum:

In the euro area, growth was higher than expected at 2.2 percent in the first quarter of 2016, supported by an increased level of monetary policy accommodation, low oil prices, and slightly expansionary fiscal policies,

reflecting strong domestic demand— including some rebound in investment. While high-frequency indicators point to some moderation ahead, the growth outlook would have been revised up slightly relative to April for both 2016 and 2017 were it not for the fallout from the U.K. referendum (Brexit).

As per International Monetary Fund (IMF), in light of the potential impact of increased uncertainty on consumer and business confidence (and potential bank stresses), 2017 growth was revised down by 0.2 percentage points relative to April, while 2016 growth is still projected to be slightly higher, given outcomes in the first half of the year.

Notwithstanding some progress since 2015, the ongoing recovery in the Euro Area is subdued in comparison with the recoveries following systemic banking crises in other advanced economies, such as the United States, the United Kingdom, and Sweden in 2008-09. Problems associated with structural rigidities and persistent imbalances, although being gradually addressed, are still significant. After a long period of consolidation that dampened activity, fiscal policy is also expected to be slightly expansionary this year, reflecting in part additional public spending associated with the refugee crisis, which is projected to add about 0.2 percentage point to 2016 GDP growth. Rising flows of migrants to the European Union are creating notable challenges. E.U. countries have agreed to a relocation plan to help countries most affected by the influx, but implementation has been very slow.

Japan – Continued Stagnation:

Japan continues to fluctuate between periods of modest growth and contraction. Private consumption remains weak, falling short of the gains in real income, which have themselves been modest. Exports are also subdued, dampened by weak external demand and limited benefits of past yen depreciation. Despite weak growth, labor market conditions continue to show signs of tightening against the backdrop of an aging population. The unemployment rate remains slightly above 3 percent, the active job openings-to-applicants ratio has risen steadily, and the perception of labor shortages has heightened.

Because of growth disappointments and persistently low consumer price and wage inflation, the Bank of Japan continued to ease monetary policies in 2016, introducing a negative interest rate policy in January this year. A decision by the government to postpone the consumption tax hike to 10 percent, scheduled for April 2017, could lead to stronger growth in the short term but slow fiscal consolidation. Japan's growth in 2017 could be higher if, as expected, a supplementary budget for fiscal year 2016 is passed, providing more fiscal support.

China – Ongoing Rebalancing:

Growth in China decelerated further, to 6.9 percent in 2015, and to 6.7 percent in the first quarter of 2016, reflecting weak exports and slowing investment. A sharp slowdown in industrial activity has thus far been mitigated by steady growth in the services sector. In 2015, the services sector accounted for half of GDP and the majority of new urban jobs. This helped to offset layoffs in shrinking industrial sectors and kept urban labor markets tight (Lardy 2016). In addition, consumption growth continued to be robust, contributing 4.6 percentage points to GDP growth in 2015, compared to a contribution of 2.5 percentage points from investment.

As a response to the pronounced slowdown in the industrial sectors and in real estate, a range of expansionary policy measures were implemented in the second half of 2015. These included cuts in reserve requirements and interest rates, increased public spending on infrastructure projects, and tax cuts for small businesses.

Fiscal support measures and tax cuts widened the central government deficit to a six-year high of 2.3 percent of GDP in 2015 and to an expected 3 percent of GDP in 2016.

The direct impact of the U.K. referendum will likely be limited, in light of China's low trade and financial exposure to the United Kingdom as well as its likely respond to achieve their growth target range. Hence, as per industry estimates China's growth outlook is broadly unchanged relative to April (with a slight upward revision for 2016).

Other Emerging Economies Outlook

The outlook in other large emerging markets has changed slightly. Consumer and business confidence appears to have bottomed out in Brazil, and the GDP contraction in the first quarter was milder than anticipated. Consequently, the 2016 recession is now projected to be slightly less severe, with a return to positive growth in 2017.

Higher oil prices are providing some relief to the Russian economy, where the decline in GDP this year is now projected to be milder, but prospects of a strong recovery are subdued given longstanding structural bottlenecks and the impact of sanctions on productivity and investment.

Indian Economy:

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). According to the Economic Survey 2015-16, the Indian economy will continue to grow more than 7 per cent in 2016-17.

The improvement in India’s economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, RBI’s inflation focus supported by benign global commodity prices.

India’s Consumer Confidence score in the April-June 2016 quarter declined to 128 from the high of 134 in the January-March 2016 quarter. India was ranked the highest globally in terms of consumer confidence during October-December quarter of 2015, continuing its earlier trend of being ranked the highest during first three quarters of 2015, as per the global consumer confidence index created by Nielsen.

Market Size:

According to the IMF World Economic Outlook Update (January 2016), India’s economy is forecast to grow between 7 and 7.75 percent during FY 2016-17, despite the uncertainties in the world market. The Economic Survey of 2015 – 16 predicts that India’s economy will grow more than seven percent for the third consecutive year 2016-17 and may begin to grow to eight percent or more over the next two years.

As per industry inc., after the recent demonetisation of certain currency notes by the GoI, GDP growth rate in FY’17 may dip a little compared to the last two years, but even then India is likely to outpace most other major economies .

Further, India’s foreign exchange reserves stood at US\$ 360 billion by end of March 2016, as compared with US\$ 342 billion at same time last year, according to data from the Reserve Bank of India (RBI).

The steps taken by the government in recent times have shown positive results as India’s gross domestic product (GDP) at factor cost at constant (2011-12) prices 2014-15 is Rs.106.4 trillion (US\$ 1.58 trillion), as against Rs.99.21 trillion (US\$ 1.47 trillion) in 2013-14, registering a growth rate of 7.3 per cent. The economic activities which witnessed significant growth were

‘financing, insurance, real estate and business services’ at 11.5 per cent and ‘trade, hotels, transport, communication services’ at 10.7 per cent.

According to some economists, India could grow at a potential 8 per cent on average during from fiscal 2016 to 2020 if powered by greater access to banking, technology adoption, urbanisation and other structural reforms.

Recent Developments across various sectors:

India Industrial Production:

Industrial production in India went up 0.7 percent year-on-year in September of 2016, following two straight months of falls (-0.7 percent in August and -2.5 percent in July) and slightly above market expectations of a 0.5 percent gain. Manufacturing rose 0.9 percent (-0.2 percent in August), also the first gain in three months and the strongest since October last year. Electricity increased 2.4 percent (0.1 percent in August) while mining shrank 3.1 percent (-5.8 percent). From April to September, industrial production declined 0.1 percent. Industrial Production in India averaged 6.22 percent from 1994 until 2016, reaching an all-time high of 20.00 percent in November of 2006 and a record low of -7.20 percent in February of 2009.

India's Gross Capital Formation:

Gross Fixed Capital Formation in India decreased to Rs.8,583.37 Billion in the third quarter of 2016 from Rs.8,639.56 Billion in the second quarter of 2016. Gross Fixed Capital Formation in India averaged Rs.4,951.59 Billion from 2001 until 2016, reaching an all-time high of Rs.9,091.17 Billion in the third quarter of 2015 and a record low of Rs.2,021.90 Billion in the first quarter of 2002.

With the improvement in the economic scenario, there have been various investments leading to increased M&A activity in the country. India has emerged as one of the strongest performers in terms of deals related to mergers and acquisitions (M&A). The total M&A deals involving Indian companies grew by 82 per cent to US\$ 27 billion during January to June 2016, which is the highest in the first six months in any year since 2011, led by a four and a half time increase of Indian acquisitions abroad at US\$ 4.5 billion.

Under the new National Mineral Exploration Policy (NMEP), the Government of India plans to conduct e-auction of 62 mineral blocks of minerals such as iron ore, limestone and gold located across several states to further open up the mining sector and increase output of minerals in 2016-17.

Government Initiative:

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Government has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy. This initiative is expected to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors.

Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy. Government is looking at a number of reforms and resolution of pending tax disputes to attract investments.

Currently, the manufacturing sector in India contributes over 15 per cent of the GDP. The Government of India, under the Make in India initiative, is trying to raise the weightage contribution of manufacturing sector and aims to take it up to 25 per cent of the GDP.

The Government of India has also launched an initiative to create 100 smart cities as well as Atal Mission for Rejuvenation and Urban Transformation (AMRUT) for 500 cities with an outlay of Rs.48,000 crore (US\$ 7.47 billion) and Rs.50,000 crore (US\$ 7.34 billion) crore respectively. Smart cities are satellite towns of larger cities which will consist of modern infrastructure and will be digitally connected.

Road Ahead:

The International Monetary Fund (IMF) and the Moody's Investors Service have forecasted that India will witness a GDP growth rate of 7.5 per cent in 2016, due to improved investor confidence, lower food prices and better policy reforms. Besides, according to the World Bank, the Indian economy will likely grow at 7.6 per cent in 2016-17, followed by further acceleration to 7.7 per cent in 2017-18 and 7.8 per cent in 2018-19.

According to GoI, Indian economy would continue to grow at 7 to 9 per cent and would double in size to US\$ 4–5 trillion in a decade, becoming the third largest economy in absolute terms.

Steel Sector Overview**Introduction**

India is the world's third-largest producer of crude steel (up from eighth in 2003) and is expected to become the second-largest producer by the end of FY 2016. The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

Indian Iron and steel industry, with its strong forward and backward linkages, contributes significantly to overall growth and development of the economy. As per official estimates, the Industry today directly contributes 2% of India's Gross Domestic Product (GDP) and its weightage in the official Index of Industrial Production (IIP) is 6.2%¹. The per capita consumption of total finished steel in the country has risen from 51 kg in 2009-10 to about 60 kg in 2014-15.

Being a core sector, steel industry tracks the overall economic growth in the long term. Also, steel demand, being derived from other sectors like automobiles, consumer durables and infrastructure, its fortune is dependent on the growth of these user industries. The Indian steel sector enjoys advantages of domestic availability of raw materials and relatively cheap labour. Iron ore is also available in abundant quantities. This provides major cost advantage to the domestic steel industry.

The Indian steel industry is largely iron-based through the blast furnace (BF) or the direct reduced iron (DRI) route. Indian steel industry is highly consolidated. About 60% of the crude steel capacity is resident with integrated steel producers (ISP). But the changing ratio of hot metal to crude steel production indicates the increasing presence of secondary steel producers (non-integrated steel producers) manufacturing steel through scrap route, enhancing their dependence on imported raw material.

Market Size

In 2015 India produced 91.46 million tonnes (MT) of finished steel. Total finished steel production in the country increased at a CAGR of 7.45 per cent over FY11–15. During April-August 2016, crude steel production in the country grew by 7 per cent year-on-year to ~40 MT.

Over April-August 2016, steel imports fell 34.5 per cent year-on-year to 3.01 MT, while steel exports rose 23.6 per cent year-on-year to 2.38 MT.

¹Erstwhile Planning Commission Report

Steel consumption in the country is expected to grow 5.3 per cent year-on-year to ~ 85 MT during FY 2016-17, led by growth in the construction and capital goods sector.

(Source: IBEF)

Government support and regulatory framework

The steel sector has often been supported by favorable regulatory frameworks, not only during initial phases of development but also during times of economic downturn. These benefits range from easier loans, tax incentives and subsidized land availability to tariff protection measures.

The Government of India has allowed 100 per cent foreign direct investment (FDI) in the steel sector under the automatic route. Nearly 301 MoUs have been signed with various states for planned capacity of about ~480 MT.

A new scheme, 'The scheme for the promotion of R&D in the iron and steel sector', has been approved with budgetary provision of US\$ 24.6 million to initiate and implement the provisions of the scheme as per the 11th Five-Year Plan which has continued in the 12th Five Year Plan. The development of technology for Cold-Rolled Grain Oriented (CRGO) steel sheets and other value-added products is also included under the policy purview and is allocated US\$ 6.7 million.

The Government of India faces several challenges in providing support to the sector. The most significant so far have been challenges in land acquisition and infrastructure access. Major steel players have shelved or abandoned projects worth crore of rupees primarily due to problems in acquiring land and delays in obtaining environmental and forest clearances. With multiple users struggling for limited resources, national and state governments have become more stringent around environmental regulations and compliance. The work completion rate in general has fallen in the country from 64% in 2012–13 to 26% in 2013–14, thereby, locking in large capital and not achieving its economic multiplier effect.

Growth Factors

As per the report of the Working Group on Steel for the 12th Five Year Plan, there exist many factors which carry the potential of raising the per capita steel consumption in the country. These include among others, an estimated infrastructure investment of nearly a trillion dollars, a projected growth of manufacturing from current 8% to 11-12%, increase in urban population to 600 million by 2030 from the current level of 400 million, emergence of the rural market for steel currently consuming around 10 kg per annum buoyed by projects like Bharat Nirman, Pradhan Mantri Gram Sadak Yojana, Rajiv Gandhi Awaas Yojana among others.

At the time of its release, the National Steel Policy 2005 had envisaged steel production to reach 110 million tonnes (mt) by 2019-20. However, based on the assessment of the current ongoing projects, both in greenfield and brownfield, the Working Group on Steel for the 12th Five Year Plan has projected that domestic crude steel capacity in the country is likely to be 140 mt by 2016-17 and has the potential to reach 149 mt if all requirements are adequately met.

As per the Ministry of Steel, GoI, The National Steel Policy 2005 is currently being reviewed keeping in mind the rapid developments in the domestic steel industry (both on the supply and demand sides) as well as the stable growth of the Indian economy since the release of the Policy in 2005.

Protectionist Measures by the Government of India

An Inter-Ministerial Group (IMG) is functioning in the Ministry of Steel, under the Chairmanship of Secretary (Steel) to monitor and coordinate major steel investments in the country. As a facilitator, the Government monitors the steel market conditions and adopts fiscal and other policy measures based on its assessment.

Currently, basic excise duty for steel is set at 12.5% and there is no export duty on steel items. The government has also imposed export duty of 30% on all forms of **iron ore** except low grades which carry a duty of 10% while iron ore pellets have an export duty of 5% in order to control ad-hoc exports of the items and conserve them for long term requirement of the domestic steel industry. It has also raised import duty on most steel imports by 2.5%, taking the import duty on carbon steel flat products to 10% and that on long products to 7.5%.

For ensuring quality of steel several items have been brought under a quality control order issued by the Government.

Investments

Steel industry and its associated mining and metallurgy sectors have seen a number of major investments and developments in the recent past.

According to the data released by Department of Industrial Policy and Promotion (DIPP), the Indian metallurgical industries attracted Foreign Direct Investments (FDI) to the tune of US\$ 8.89 billion, respectively, in the period April 2000–March 2016.

Some of the major investments in the Indian steel industry are as follows:

- Tidfore Heavy Equipment Group, the China-based infrastructure giant, is looking to enter the Indian market by signing an investment agreement worth US\$ 150 million with Uttam Galva Metallics, to expand its Wardha, Maharashtra unit along with South Korean steel major Posco.
- Arcelor Mittal SA is looking to set up a joint venture (JV) factory in India with state-owned Steel Authority of India Ltd (SAIL), to manufacture high-end steel products which could be used in defence and satellite industries.
- National Mineral Development Corporation (NMDC) has planned to invest Rs.40,000 crore (US\$ 5.96 billion) in the next eight years to achieve mining capacity of 75 Million Tonnes Per Annum (MTPA) by FY2018-19 and 100 MTPA by FY2021-22, compared to 48 MTPA current capacity.
- Public sector mining giant NMDC Ltd will set up a greenfield 3-million tonne per annum steel mill in Karnataka jointly with the state government at an estimated investment of Rs 18,000 crore (US\$ 2.67 billion).
- JSW Steel has announced to add capacity to make its plant in Karnataka the largest at 20 MT by 2022.

Road Ahead

India is expected to become the world's second largest producer of crude steel in the next 10 years, moving up from the third position, as its capacity is projected to increase to about 300

MT by 2025. Huge scope for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

Segments

As steel demand emanates from the various end using segments, category wise estimates of steel demand is best related to the activity levels in segments that account for a major share of consumption of steel in that category for instance, in construction, automobile, railway transport, transportation of oil & gas, ship building, capital goods (heavy machinery equipment), consumer durables, agricultural equipment, etc. would by and large account for a significant portion of steel consumption.

Current Indian steel demand by sector

The major steel-consuming sectors in India are construction and infrastructure, capital goods and automotive.

Steel consumption pattern in India

Overview of the Focus Sectors of the Salasar Techno Engineering Limited :

Infrastructure

Development and growth of Infrastructure sector is critical for rapid growth of domestic steel industry in the country. Steel industry is a major user of infrastructural facilities especially of Railways, roads, power, and ports. Besides, the competitiveness of domestic steel industry depends heavily on the expansion and provision of efficient infrastructural facilities.

As per the working group projections, the steel production in the country will nearly double within the next five years. This requires rapid growth of railways, roads, ports and power facilities. The existing infrastructural facilities are not adequate.

SALASAR

There is immediate need for substantial up gradation of infrastructural facilities to meet the increasing steel requirements of the steel industry. Investments to the tune of US \$ 1 Trillion are proposed in the infrastructure sector in the 12th plan. An investment of this scale and size is likely to generate higher domestic demand for steel and at the same time help build necessary infrastructure required for the steel industry.

Growth in the infrastructure and construction segment is expected to be driven by power, roads, irrigation and urban infrastructure. To support infrastructure in the country, the Government has identified infrastructure as a priority sector to bolster the GDP growth rate. In line, more sectors have been added as eligible sectors for Viability Gap Funding under the scheme “Support to PPP in infrastructure.”

Telecom Tower

The Indian telecom industry has witnessed significant growth in subscriber base over the last decade, with increasing network coverage and a competition-induced decline in tariffs. The growth story and the future potential have also served to attract newer players in the industry, with the result that the intensity of competition has kept increasing, forcing the telecom operators (telcos) to look for cost-cutting measures.

Telecommunications in India has grown from a fledgling to a large industry over the last decade, reporting a compounded annual growth rate (CAGR) of around 70% in wireless subscriber base between March 1999 and September 2010. During this period, the size of the wireless subscriber base has increased from 0.12 crore to 68.77 crore, taking wireless tele-density up from 10% to 54%. The growth in subscriber base has been facilitated mainly by the increase in network coverage and decline in tariffs and handset prices. The Government of India’s auction of 2G licenses in January 2008 also gave an impetus to the telecom industry’s growth by providing more spectrum and allowing new players to enter the arena.

Growth in Wireless Subscriber Base in India (in crores)

The growth in subscriber base has necessitated expansion of network coverage, which in turn has driven the telcos to make sizeable investments in active and passive infrastructure. Over the last few years, driven by the need for more towers and increasing tower sharing, many independent telecom tower companies (ITTCs) have also emerged, although these remain much smaller in relation to the telecom operator-owned tower companies.

Rapid growth in the sector has also prompted tower companies to invest heavily in capital expenditure (capex). The aggregate capex spend increased from Rs.8,000 crore in 2013-14 to Rs.10,200 crore in 2014-15. Net tower additions were also significantly higher at 6,300 in 2014-15 vis-à-vis 3,200 in 2013-14. One of the key emerging trends in the last few years is the emergence of towers running on green energy. In line with the trend, 15 per cent of the total capex spends were incurred by towers running on green energy.

Projected Smartphone Penetration and Mobile Data Consumption for India

As per industry sources, telecom tower companies in India will post a revenue growth of about 10 percent over the next two years, as mobile operators are expanding their 3G and 4G footprint and will seek to lease more tower space. Considering India is at the cusp of a rolling out 4G and other high end services, industry estimates significant growth and bright future of the Indian Tower Industry. With the increasing proliferation of smartphones among the Indian masses, data will grow exponentially, requiring a significant number of additional data sites over the next few years. An amalgamation of coepetition and competition among telecom operators and tower companies will be required to cater to this next phase of growth. An ASSOCHAM-KPMG joint study has predicted that the telecom tower sector in India is set to see a higher growth in next few years as its tenancy ratio will increase from 1.95 times (as on March 2015) to 2.9 times by March 2020 due to the expansion of 3G and onset of 4G technologies.

The growth in telecom sector has helped India emerge as a trendsetter in the tower infrastructure segment. Around 70 per cent of India’s 4,00,000 towers are owned and operated by tower companies. The advent of new technologies, such as 4G by Telecom Service Providers (TSPs), along with expansion in the rural areas, is expected to be key drivers for the telecom infrastructure industry over the next five years.

Transmission Towers

India's Power Transmission networks constitute the vital part of the entire power value chain. The growth of power sector is contingent to development of a robust and a reliable transmission network. The country has been demarcated into five transmission regions viz. Northern, Eastern, Western, Southern and North Eastern. In the country over the past decades, the total power capacity has witnessed commendable growth, with more than 232 GW of generation capacity currently installed in India. However, India's peak load supply is only 141 GW, and aggravating this situation further is that some of India's power surplus regions do not have adequate power evacuation infrastructure which could alleviate the recurring supply shortages in other parts of the nation.

Despite having installed power generation capacity of ~225 GW and power demand of 135 GW (as of May 2013), India faced a peak power deficit of 9% (12 GW). One of the major reasons for this situation is the inadequate transmission capacity, not matching the generation capacities and load requirements. Unlike infrastructure sectors like the road network, where substitutes like rail, ship, waterways, airways, etc. are available, no such alternative to the transmission lines exist in the power sector. With the sole exception of captive power, cross country transmission lines ferry every unit of the power generated in the country. In 2012-13, domestic power exchanges

Indian Energy Exchange and Power Exchange of India failed to consummate sales-purchase deals worth crores of rupees, amounting to ~15% of total traded volume of power, due to transmission constraints.

Power evacuation is turning out to be a bigger problem than power generation for the country. Plants supplying electricity to state electricity boards (SEBs) under long term power purchase agreements (PPA), lost millions of units of generation due to transmission capacity bottlenecks.

Power shortages have and are adversely affected the country's economy. Power shortages cause significant GDP loss, impacting multiple industries like agriculture, manufacturing, services etc. Improvement of this sector is essential for the economic well-being of the country and enhancement of the quality of life of citizens. In the last 5 years, power generation capacity has grown by ~50%, whereas transmission capacity has increased by ~30% .

As per the 12th Five Year Plan, the future expansion in power generation capacity in India is planned around 88GW. In order to meet this capacity, investment in the transmission sector needs to be increased. Overall, an addition of 90,000 ckm of 765-220 kV lines, 154,000 MVA of substation capacity and 27,350 MW of national grid capacity is required in order to meet the 12th Five Year Plan.

For this purpose, an investment of USD 35 billion is planned in the power transmission sector. Of this, about USD 19 billion is planned to 10 come from Power Grid Corporation of India Limited. The remaining USD 16 billion, ~46% of the total investments, needs to be secured from private players.

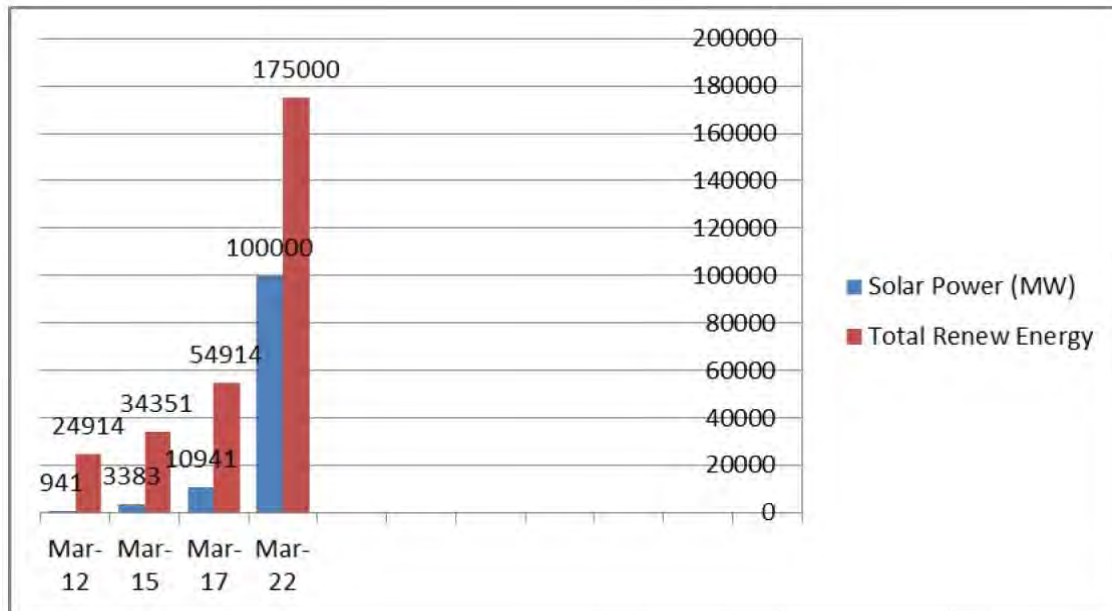

Planned Generation Capacity Additions

India is one of the few countries where Transmission Sector has been opened up for private participation & has garnered significant interest from private players. The bidding framework is fairly comprehensive with provisions for majority of situations which may occur during the term.

Growth of the power sector and hence transmission lines network are directly linked to the growth of GDP. Both central and state governments are responsible for the development of electricity sector in India. Powergrid is the Central Transmission Utility (CTU) and is responsible for wheeling of power generated by Central Generating Utilities (CGUs) and inter-state Mega Independent Power Producers.

Solar and Total Renewable Energy Capacity in India

As many as 120 transmission projects have faced delays because of the developer's inability to acquire land and get timely clearances from all stakeholders. There have been instances of transmission lines being forced to take a different route than planned, resulting in the entire project budget going out of control. Power transmission constraints have also made it difficult to evacuate excess power and channel it to regions that face shortages. Projects have had to purchase power from costlier sources while others remained under-utilized. Hence, there is an urgent need to timely address underlying issues in the transmission sector to ensure power demand is effectively met in the future.

Future Investments

Despite billions of dollars investments being planned for the next couple of years, the investments in the transmission sector are still not adequate. As per the industry norm, for every rupee invested in power generation, at least half should be invested in power transmission. In India the ratio is very low from the standard. To make up for this investment deficit, India needs to invest more than 0.5 times of the future investments made in generation into transmission.

Currently, the Indian transmission sector is in the early stages of globalization compared to other sectors like ITES, Telecom etc. Many private players, ranging from power generation companies like Adani, GMR, etc. to EPC and infrastructure companies like KEC, Isolux, etc. are entering the sector. However, progress in the sector is hampered by various challenges. Going forward, the demand side capacity is expected to further increase with the industry moving towards Open Access. Open access will allow every end-user of electricity in the country to choose from all available transmission lines, thereby increasing transmission load across the country. If India's transmission capacity is not timely augmented, this problem is expected to further aggravate.

The power transmission sector in the country has seen robust capacity addition in 2014-15, with around 18,000 ckt. km of lines being added at the 220 kV and above voltage levels (as of February 2015). In comparison, the line length addition during the same period in 2013-14 was around 13,600 ckt. km.

The transformer capacity added was also much higher at 55,000 MVA during 2014-15 (as of February 2015) as compared to 45,600 MVA during the same period in 2013-14. Progress in transmission capacity addition at higher voltage levels continues to remain steady.

SALASAR

More than 50 per cent of the transformer capacity addition and one-third of the line length addition during 2014-15 has been at the 765 kV level. Work on the development of 1,200 kV UHVAC and 800 kV HVDC lines has also made good progress.

Integration of renewable energy is another key focus area for transmission planners. With the government's ambitious plans to install 100 GW of solar power capacity by 2022 and 10 GW of wind power every year, evacuation of this power will be a challenge.

Realising this, the central transmission utility, Powergrid, is developing nine high capacity green transmission corridors. The CTU has also announced a Desert Power Plan, which outlines the transmission capacity needed to evacuate solar and wind power from the desert regions of India by 2050.

Recently, the company has been assigned the construction of transmission lines and pooling substations for solar parks in seven states. Further, 11 high capacity power transmission corridors (HCPTCs) being implemented by Powergrid are making swift progress. Transmission lines and substation packages have been awarded for most of the HCPTCs and are under implementation. Most of these are expected to be commissioned in 2015-16.

The state sector has contributed a significant 42 per cent of the line length addition and 46 per cent of the transformer capacity addition during 2014-15 (as of February 2015). Most of this addition has been at the 400 kV and 220 kV level. However, the growth in intrastate transmission network has lagged behind that in the interstate transmission system. India is planning to construct several cross-border interconnections with its neighboring countries to boost power trade.

These links are part of the country's larger plan of creating an integrated SAARC power market. The most recent cross-border transmission line constructed was the 400 kV Baharampur (India) – Bheramara (Bangladesh) line, commissioned by Powergrid in September 2013. Four more interconnections – one each with Bhutan and Sri Lanka and two with Nepal – are also expected.

The changing requirements of the transmission system are driving technology developments in the area. High performance conductors (HPCs) are already being used, while R&D is being carried out on superconducting cables.

Sub Station Structure

GoI is looking to transform India's electricity sector. This push is driven by the longstanding need to reform the ailing finances of India's power-generation and electricity-distribution sectors which augurs well for setting up of sub-station structure which will be required for smooth transmission of the power from generation side. According to official estimates, India is undertaking a sustained heavy capital-expenditure program that is running at US\$4-5bn annually to cover grid-transmission line and substation expansions and upgrades while expanding inter-regional capacity. The Indian grid has an installed generation capacity of ~250GW. In next 5 years, that figure is expected to approach 500GW, requiring an investment of more than US\$20bn.

Estimated Power Requirement as per Central Electricity Authority

As per CEA, 175 GW Renewable Energy (RE) will contribute to 18.9% of the entire power consumption in India in 2022. Below is the projected percentage contribution by RE in the entire energy mix of India.

Solar Energy Sector

India has the fifth largest power generation portfolio in the world and its current renewable energy contribution stands at 44.81 GW which includes 27.44 GW of Wind power and 8.06 GW of Solar power installed capacity in the country (as on 31.07.2016). It has fourth largest installed capacity of wind power and third largest installed capacity of concentrated solar power (CSP).

Renewable energy contributes 14.7% of the total installed capacity in the country (as on 31.07.2016). India has ambitious target of 175 GW of renewable power by 2022 which includes 100 GW of Solar power, 60 GW from wind power, 10 GW from biomass power and 5 GW from small hydro power.

Economic growth, increasing prosperity, a growing rate of urbanisation and rising per capita energy consumption has led to increased demand for energy in the country. The target of National Solar Mission has been up-scaled to 100 GW from 20 GW of grid connected solar power by 2022, which creates a positive environment among investors keen to tap into India’s renewable energy potential. It may be noted that Foreign Direct Investment (FDI) up to 100% is permitted under the automatic route for renewable energy generation and distribution projects subject to provisions of The Electricity Act, 2003.

Grid Connected Rooftop

India is one of the lowest per capita consumers of electricity in the world. Over 200 million people remain unconnected to the electricity grid, and those who are, continue to face frequent disruptions. Power shortages also affect industrial output with many industries and manufacturers relying on expensive and polluting diesel-based back-up power supplies.

Solar grid connected rooftop power plant provides solutions to these problems. According to a study conducted by TERI, a potential of 124 GWp SPV Rooftop plants has been estimated in the country. GoI has ambitious target of installing 40GW of rooftop solar plant across the country. The details of same are as follows:

Status	358 MW Projects sanctioned and 41 MW installed [Potential for 124 GW exists
Target	40,000 MW by 2022 of which 10 GW during 2015-16 to 2017-18
Current Support	Financial assistance of 15% of the benchmark (Reduced from 30% earlier)

Major growth factors for solar power sector

- India is the fourth largest importer of oil and the 15th largest importer of petroleum products and Liquefied Natural Gas (LNG) globally. The increased use of indigenous renewable resources is expected to reduce India’s dependence on expensive imported fossil fuels.
- The government of India through Ministry of New and Renewable Energy (MNRE) is playing a proactive role in promoting the adoption of renewable energy resources by offering various incentives such as generation-based incentives (GBIs), capital and interest subsidies, viability gap funding (VGF), concessional finance, fiscal incentives etc.
- The National Solar Mission aims to promote the development and use of solar energy for power generation and other uses, with the ultimate objective of making solar energy compete with fossil-based energy options.
- The objective of the National Solar Mission is to reduce the cost of solar power generation in the country through long-term policy, large scale deployment goals, aggressive R&D and the domestic production of critical raw materials, components and products.
- The government has created a liberal environment for foreign investment in renewable energy projects. The establishment of a dedicated financial institution – the Indian Renewable Energy Development Agency (IREDA), makes for renewed impetus on the promotion, development and extension of financial assistance for renewable energy and energy efficiency/conservation projects.
- Renewable energy is becoming increasingly cost-competitive as compared to fossil fuel-based generation, like the prices of solar modules have declined by almost 80% since 2008.
- Reserve Bank of India (RBI) has revised the guidelines for all scheduled commercial banks including renewable energy in the categories priority sector, in addition to existing categories making significant

inroads for renewable energy in the priority sector lending, also bank loans for solar rooftop systems to be treated as a part of home loan/ home improvement loan with subsequent tax benefits.

According to industry estimates, with expected new capacity addition of 5.4 gigawatt (GW) in 2016, India will become the fourth largest solar market globally this year, overtaking the UK, Germany and France.

Galvanized Steel Sector

As per industry estimates global steel demand is expected to continue to grow at 2 - 4% p.a. for the next decade before leveling out. Developing regions like India would continue to drive steel demand growth, increasingly away from China and to other developing regions.

Actual and anticipated finished steel demand in India

(Source: Industry data)

After a decade of high growth, steel growth in India has slowed down considerably in the last 2 years. However, India’s low per capita steel consumption and robust GDP growth forecast indicates a good potential for steel demand growth.

As per industry estimates, India has a low share of galvanised steel products compared to developed economies, which presents an opportunity for growth. The share is almost constant (between 4% - 6%) since 1995. Going forward, demand is expected to grow at a steady rate given the positive outlook of major end use sectors of galvanizing steel.

Main use of galvanized steel is mainly into construction and infrastructure sector. Infrastructure sector includes power, bridges, dams, roads and urban infrastructure development. 50% of the demand for construction activity in India comes from the infrastructure sector; while the rest comes from industrial activities, residential and commercial development etc. Currently the Indian construction industry is valued at over USD 126 Billion.

It may be noted that Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India’s overall development and gets focus from Government for initiating policies for creation of world class infrastructure in the country.

As per industry estimates, India needs USD 1 trillion to be spend on infrastructure development over the next five years, with 70 per cent of funds needed for power, roads and urban infrastructure segments. The Indian power sector itself has an investment potential of US\$ 250 billion in the next 4-5 years, providing immense opportunities in power generation, distribution, transmission and equipment.

SALASAR

The Indian construction equipment industry is reviving after a gap of four years and is expected to grow to US\$ 5 billion by FY2019-20 from current size of US\$2.8 billion, according to a report released by the Indian Construction Equipment Manufacturers' Association (ICEMA). Further, according to the Department of Industrial Policy and Promotion (DIPP), Foreign Direct Investment (FDI) received in construction development sector from April 2000 to March 2016 stood at US\$ 24.19 billion.

The Government of India has made a record allocation Rs.221,246 crore (US\$ 33.07 billion) for several infrastructure projects in Union Budget 2016-17, which is expected to provide significant boost to Indian infrastructure sector.

As per industry sources, global galvanized steel market to grow at a CAGR of 5.18% during the period 2016-2020. One of the primary drivers in the market is upgrading of existing transmission and distribution networks. Global investments in transmission and distribution infrastructure will amount approximately \$8.4 trillion by 2040. Galvanized steel has wide applications such as equipment buildings, platforms, stairs, and handrails. Piping and its fittings consume massive amounts of galvanized steel in water reticulation, cooling water, and fire protections systems.

Asia & Pacific is the fastest-growing region in the galvanized steel market and is anticipated to occupy around 68% of the overall market revenue by 2020. The primary reason for this region's growth is the high demand for galvanized steel flat-rolled products coming from the automobile and construction sectors. Moreover, with China, being the largest producer of galvanized steel market, especially metal-coated steel sheets, will accelerate steel production in the region in the coming years.

Galvanized sheets and strips dominated the galvanized steel market and accounted for around 61% of the total market share in 2015. Much of the segment's growth can be attributed to the growing demand coming from the construction and infrastructure industry, which accounts for around 38% of the overall market share. Galvanized sheets and strips are used for several construction purposes including doors, sashes, walls, shutters, fences, beams, columns, partitions, under-ceiling units, carports, verandas, and storerooms.

Cold Formed Steel

Cold-formed steel (CFS) is the common term for products made by rolling or pressing steel into semi-finished or finished goods at relatively low temperatures (cold working). Cold-formed steel goods are created by the working of steel billet, bar, or sheet using stamping, rolling (including roll forming), or presses to deform it into a usable product.

Cold-worked steel products, such as cold-rolled steel (CRS) bar stock and sheet, are commonly used in all areas of manufacturing of durable goods, such as appliances or automobiles, but the phrase cold-formed steel is most prevalently used to describe construction materials.

Galvanising

Galvanising is the process of coating zinc on the surface of steel for preventing corrosion. The zinc coating renders zinc iron alloy on the surface which is stable and protects the parent metal from corrosion. The hot dip galvanizing process is the oldest and most used in the steel industry. The steel is first dipped in the flux solution to prepare the surface for zinc adherence and good bonding between the steel and zinc. The steel is dipped into molten zinc at 450 C, and reaction is initiated between steel and zinc. The quantum of free zinc on the alloy layer depends on the wire speed, wiping methodology and zinc temperature.

Quality Testing

Our Company is in strict adherence to its ISO 9001:2015, ISO 14001:2015 & OHSAS 18001:2007 accreditation, and has an in-house QAP (Quality Assurance Plan) to provide quality products both in manufacturing and services. The focus on supreme quality standards right from the procurement of raw materials to delivering the end product is observed thereby making quality improvement and adherence a continuous process.

PRODUCT PORTFOLIO

A. Customized Galvanized and Non-galvanized steel structures

Steel fabrication is the building of steel structures by cutting, bending, and assembling processes. It is a value added process that involves the construction of machines and structures from various raw materials. Galvanization is the process of applying a protective zinc coating to steel or iron, to prevent rusting. The most common method is hot-dip galvanizing, in which parts are submerged in a bath of molten zinc. Galvanizing protects in three ways:

It forms a coating of zinc which, when intact, prevents corrosive substances from reaching the underlying steel or iron.

The zinc serves as a sacrificial anode so that even if the coating is scratched, the exposed steel will still be protected by the remaining zinc.

The zinc protects its base metal by corroding before iron. For better results, application of chromates over zinc is also seen as an industrial trend.

Currently, our Steel structures predominantly includes:

1. Telecommunication Towers-

Telecommunication Towers have several applications in different sectors such as mobile, internet, television, navigation, and radio signal transmissions. Telecom towers are structures that house the antennae, dishes and receivers required for wireless communication and data transfer.

A Telecommunications Tower is a first touch point for service and information (signals, calls, data for browsing, etc.) for getting a Mobile service. It sends and receives information to and from cell phones. The Rectangular slab you see near the top in the picture is an antenna, there can be multiple such antennae to receive

and send information at different angles (also called sections in Telecom jargon). Our Company manufactures 4 different types of Telecom Towers, which are listed below:

a) Angular

Angular sections are preferred for most small towers with relatively light loads, mainly because of the wide range of sizes, simple connections and low manufacturing cost. The square angular telecom tower offered is four legged, self-supporting tower that is made of square angular elements.

What makes this design unique is the tower is designed on a square base pattern. This telecom tower design is especially ideal for medium or heavy loads. It is also suitable for primary cellular sites, MW backbone sites, or central communication hubs. It comes with a variety of accessories which can be used to customize specific design modifications. This model of telecom tower is the most popular and versatile design used worldwide. There are triangular angular towers (type E) and Towers made of tubular legs and angular braces.

b) Tubular

Lattice towers are usually made of bolted angles. Tubular legs and bracings can be economic, especially when the stresses are low enough to allow relatively simple connections. Towers with tubular members may be less than half the weight of angle towers because of the reduced wind load on circular sections.

However, the extra cost of the tube and the more complicated connection details can exceed the saving of steel weight and foundations. The difference between the angular tower and the tubular telecom tower is the tubular construction of the tower members. These tubular footing members and bracing members are designed for especially heavy loads or for telecom towers in areas with strong, even hurricane level winds. The Tubular tower is designed for heights of 20 to 80m, and can be easily shipped in a standard 40' ISO container. The modular design of triangular tubular also allows for in the field modifications. The modules can also be easily interchanged according to the specific site design.

c) Hybrid

Hybrid towers are built for large sites that require independence from the grid and employ an independent source of energy such as solar or wind power.

d) Monopoles

Monopole towers work well when space is limited, zoning is difficult or harsh weather conditions need to be considered. Designed as a single-pole that can be a tubular section design or a formed, tapered pole, they are the least intrusive – making them the most popular tower types in the wireless communication industry.

Because of the single-pole design, it advantageously reduces visual impact and results in a shorter construction time (and typically cost) compared to traditional lattice structures. Many monopoles can also be designed as stealth or camouflage towers. A popular telecom tower model is the Flange Monopole Tower, this tower is an 18-sided monopole that reaches heights of up to 60m. The flange monopole tower is made of 7.5m tapered hollow steel sections. These individual sections are bolted together with circular flanges, and are able to efficiently handle medium to heavy loads.

This model of telecom tower is which is offered is generally suitable for standard single or multi operator cellular sites. The monopole telecom tower is designed for heights of 15 to 60m and can be shipped in an OT 40' ISO container. Another monopole telecom tower that is very popular is the slip-joint monopole design. The slip-joint monopole is made of 7.5m tapered hollow steel sections which are connected in the slip joint method. This telecom tower design is ideal for light to medium loads and heights up to 40m. It is equipped with a number of accessories including lights, lighting protection kits, and antenna mounts. This telecom tower can be customized to fit specific installation specifications.

We manufacture both type of monopoles and also offer camouflaging solutions.

2. Transmission Towers and Substation Structures

A transmission line tower or power tower is a tall structure, usually a steel lattice tower, used to support an overhead power line. They are used in high-voltage AC and DC systems, and come in a wide variety of shapes and sizes. Typical height ranges from 15 to 55 m (49 to 180 ft). In addition to steel, other materials may be used, including concrete and wood.

There are four major categories of transmission towers: suspension, terminal, tension, and transposition. Some transmission towers combine these basic functions. Transmission towers and their overhead power lines are often considered to be a form of visual pollution. Methods to reduce the visual effect include undergrounding.

3. Solar Module Mounting Structures

Solar module racking (also called Photovoltaic mounting systems) are used to fix solar panels on surfaces like roofs, building facades, or the ground. These mounting systems generally enable retrofitting of solar panels on roofs or as part of the structure of the building. The solar array of a PV system can be mounted on rooftops, generally with a few inches gap and parallel to the surface of the roof.

Our Company undertakes complete EPC for module mounting structures offering a variety of mount types, namely, ground, roof, pole, carport or custom, and different types of tracking like fixed type, season tilt-controlled, and single axis daily tracking.

4. Feeder Segregation and Rural Electrification

Our Company is also carrying out Rural Electrification projects under the government through route mapping, feeder segregation and installation of transmission lines and substations. Rural electrification is the process of bringing electrical power to rural and remote areas. Electricity is used not only for lighting and household purposes, but it also allows for mechanization of many farming operations,

such as threshing, milking, and hoisting grain for storage. In areas facing labour shortages, this allows for greater productivity at reduced cost.

5. Lighting Poles for Smart Cities

A lighting Pole is a raised source of light on the edge of a road or walkway to provide visibility in darkness. The pole is made of steel and our Company has been manufacturing lighting poles for quite some time. However, under the initiative of the government to develop smart cities around India, there is a demand for “Smart” lighting poles equipped with LED lights, CCTV camera, charging stations, pollution sensors and WiFi routers.

DETAILS OF INSTALLED CAPACITY

The following table illustrates the increase of production capacity for two plants in the last five financial years:

(Unit- MTPA)

Particulars	2015-16	2014-15	2013-14	2012-13	2011-12
Installed Capacity	50,000	50,000	50,000	50,000	50,000
Production	39,398	36,332	30,992	22,237	11,720
Utilisation (%)	78.80	72.66	61.98	44.47	23.44

From a mere 44% capacity utilisation in FY 2012-13, we reached a level of 79% capacity utilisation in FY 2015-16. This necessitated us to increase our capacity further and therefore we successfully completed the expansion plan in our subsidiary by adding another 50000 MTPA.

BUSINESS STRATEGY

Our corporate mission is to become the leading customised steel fabrication and infrastructure solutions provider with the highest market share in India. Towards this goal, we are committed to increase our market shares across our product verticals and to diversify our product offerings, customer base, and geographical footprint by following numerous growth strategies:

1. Increasing Installed Capacity and Expanding the Product Portfolio

Even after the addition of the 50000 MT Galvanizing plant, pushing our installed capacity to 1,00,00 MT per annum, we will continue to expand our capacity so as to be able to serve more customer needs and leverage economies of scale. This will be achieved through continuous process optimization and enhancing existing units by adding more and better equipment.

Additionally, we will continue to expand our product portfolio by upgrading existing products and introducing new ones to maintain market share and engage new customers. Our flawless project execution capabilities and technically skilled employee pool will enable this expansion. Not only will this allow customer retention and addition, but will also allow targeting higher margin opportunities and reduce the risk of dependency on existing products which may become outdated. Continuous improvement will be the only way forward. Recently, we have also invested in a bending machine to automate the process of monopole manufacturing allowing it to offer high quality monopoles of any size, from the thinnest to the fattest, in record time and according to strictest industry standards. This is not only a good move in terms of continuous improvement but a smart one as the telecom industry is steadily leaving behind the traditional tower in favor of the monopole. Similarly, when the government announced its plans to develop “Smart Cities” in India, our Company quickly seized the opportunity to supply smart light poles for these projects, and has already supplied its poles to Lucknow and Indore. This market has just opened up and a lot is yet to be done. In short, we will keep making strides to stay relevant, and hence grow.

2. Expanding Design and Engineering Capabilities

Our Company intends to invest in its design and engineering services to provide added value to its customers and concentrate on receiving big orders from domestic markets. This will be done both organically and inorganically. Emphasis will be placed on process, product innovation and value engineering solutions in order to meet the requirements of a wider range of products, applications, geographies and customization requests, in order to diversify the customer base, address emerging demand, and provide unique value-added services.

3. Targeting New Customer Accounts and Expanding Existing Ones

Our Company plans to increase its sales and customer penetration by targeting new customers and securing larger orders from existing ones. We will continue to consolidate relationships with large and renowned corporate groups whose product portfolios are spread across industries and develop our design and engineering capabilities so as to be able to enter new markets. While the existing clients will provide the necessary drivers to generate growth, getting new clients will establish growth.

4. Developing Camouflaging Capabilities for Monopoles

The Indian telecom industry is witnessing a surge in demand for data services, which calls for an increase in network coverage and given the high frequency spectrum on which data technology operates, there is a need to bridge network coverage gaps. This calls for new tower deployments while also bringing with it challenges such as land acquisition and tower aesthetics. Tower aesthetics have become a primary concern due to government policies becoming stricter and groups protesting against unsightly towers depreciating the character of neighbourhoods. Increasingly, all Telecom companies are asking for camouflaged monopole towers to be installed in new projects in place of regular ones to make getting permits easier. However, while there is a great market for camouflaged monopoles, currently no good camouflaging solutions provider exists in the country. The solutions available are either unappealing or of bad quality. Which is why we plan to provide the solution itself.

ENVIRONMENTAL LAWS AND REGULATIONS

Environment Protection Act, 1986 (“Environment Act”)

The Environment Act is an umbrella legislation designed to provide a framework for the Central Government to coordinate activities of various state and central authorities established under previous environmental laws. The Environment Act specifies that no person carrying on any industry, operation or process shall discharge or emit or permit to be discharged or emitted any environment pollutants in excess of such standards as may be prescribed. The Environment Act empowers the Central Government to make rules for various purposes viz., to prescribe:

- (i) the standards of quality of air, water or soil for various areas;
- (ii) the maximum allowable limits of concentration of various environmental pollutants for different areas;
- (iii) the procedures and safeguards for the prevention of accidents which may cause environmental pollution and remedial measures for such accidents.

Environment (Protection) Rules, 1986 (“Environment Rules”)

In exercise of powers conferred under the Environment Act, the Central Government notified the Environment Rules. Pursuant to Environment Rules, every person who carries on an industry, operation or process requiring consent under Water (Prevention and Control of Pollution) Act, 1974 or Air (Prevention and Control of Pollution) Act, 1981 or shall submit to the concerned Pollution Control Board (“PCB”) an environmental statement for that financial year in the prescribed form.

Air (Prevention and Control of Pollution) Act, 1981 (“Air Act”)

The Air Act requires any individual, industry or institution responsible for emitting smoke or gases by way of use as fuel or chemical reactions, apply in a prescribed form and obtain consent from the Pollution Control Board (“PCB”) prior to commencing any activity. The PCB is required to grant, or refuse, consent within four months of receipt of the application. The consent may contain conditions relating to specifications of pollution control equipment to be installed. Within a period of four months after the receipt of the application for consent the PCB shall, by order in writing and for reasons to be recorded in the order, grant the consent applied for subject to such conditions and for such period as may be specified in the order, or refuse consent.

Water (Prevention and Control of Pollution) Act, 1974 (“Water Act”)

The Water Act aims at prevention and control of water pollution as well as restoration of water quality through the establishment of a central Pollution Control Board (“PCB”) and state PCBs. Under the provisions of the Water Act, any individual, industry or institution discharging industrial or domestic wastewater or establishing any treatment or disposal system or the using of any new or altered outlet for the discharge of sewage is required to obtain the consent of the applicable state PCB, which is empowered to establish standards and conditions that are required to be complied with. The consent to operate is granted for a specific period after which the conditions stipulated at the time of granting consent are reviewed by the state PCB. Even before the expiry of the consent period, the state PCB is authorized to carry out random checks on any industry to verify if the standards prescribed are being complied with by the industry. In the event of non-compliance, the state PCB after serving notice to the concerned industry may close the mine or withdraw water supply to the industry or cause magistrates to pass injunctions to restrain such polluters.

Hazardous and Other Wastes (Management and Trans-boundary Movement) Rules, 2016 (“Hazardous Wastes Rules”)

The Hazardous Wastes Rules impose an obligation on every occupier to prevent, minimize, reuse, recycle, co-process and safely dispose hazardous and other wastes, as defined under the Hazardous Wastes Rules. An occupier has been defined as any person who has control over the affairs of a factory or premises or any person in possession of hazardous waste. Every occupier engaged, inter alia, in the handling, generation, collection, storage, packaging, transportation, use, treatment, processing, recycling, recovery, pre-processing, co-processing, utilization, transfer or disposal of the hazardous waste and other wastes is required to obtain an authorization from the relevant state Pollution Control Board (“PCB”).

Laws relating to employment

FACTORS AFFECTING OUR RESULTS OF OPERATIONS

A developing country such as India needs to invest heavily on key sectors such as Power & Transmission, Roads, Telecommunication, Ports etc. The new Government has not just maintained investments into these sectors but has increased manifold, the short, medium and long term investments for these sectors. The company is clearly aligned with these parameters in Power & Telecommunications sectors and has therefore increased its production capacity to cater to any demand. Not just domestically but also globally the developing economies have increased their investments on their Power and infrastructures development.

Furthermore, some of our overseas customers to whom we export galvanized products to South Africa, Myanmar etc., some of them were adversely impacted by the recession in some of these economies, disruption in banking and financial systems, economic instability, unfavorable government policies, rising inflation, lowering spending

power, customer confidence and political uncertainty. While the global economy has recovered to some extent, we are unable to predict with any degree of certainty the pace or sustainability of economic recovery, the volumes of federal or central, state and local government investment, or the effects of regulatory intervention

Economy & Government policy Risk :-

CHANGES IN GOVERNMENT POLICIES AND BUDGETARY ALLOCATIONS FOR INVESTMENTS IN POWER AND TELECOMMUNICATION SECTOR

Demand for our products is often affected by the Government's policies and our business relies on projects awarded or funded by the Government or State Governments. We believe that with policy and regulatory reforms continuing, there will be a positive impact on our growth, financial condition and results of operations. Our ability to benefit from the considerable investments proposed in the power and telecommunication in the medium and long term will be important factors affecting our results of operations.

OUR BIDDING AND EXECUTION CAPABILITY

Development for large projects in India involves a process of pre-qualifying interested companies based on their technical and financial strengths. The nature of the process is such that prequalification obtained on the basis of past projects and financial ability, based on net worth, cash accruals and bid capacity, are important elements in allowing us to bid for new projects. Also, project management capability (including our management of sub-contractors' performance) affects our profitability. As a result, these projects have greater working capital needs that increase our financial costs. We believe that we have established a good track record and a reputation for efficient project management and execution.

INFLATION

In recent years, India has experienced relatively high rates of inflation. While we believe inflation has not had any material impact on our business and results of operations, inflation generally impacts the overall economy and business environment and hence could affect us.

BUSINESS COMPETITORS

A business risk is imposed by the competition from the competitors. There is always as possibility of the new entrants into this sector and predatory pricing by them to get the orders. All the decisions by the Company are taken only after taking into consideration, these dynamic and issue specific factors.

TIMELY EXECUTION

Most of the projects that the company undertakes are by their nature long term and, consequently involves a variety of implementation risks, including construction delays, delay or disruption in supply of raw materials, delays in arranging the right of way, Managing locational issues, availability of timely skilled manpower, this can lead to cost overruns., Bank guarantee encashment may also impact Company's reputation. The Company deploys a well-defined standard operating procedure – from project planning to delivery – and adheres to rigorous internal checks and balances with regard to every Projects

5.6 BASIS OF ALLOCATION

- (a) The SEBI ICDR Regulations specify the allocation or Allotment that may be made to various categories of Bidders in an Issue depending on compliance with the eligibility conditions. Certain

details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP/ Prospectus. For details in relation to allocation, the Bidder may refer to the RHP/ Prospectus.

- (b) Under-subscription in any category (except QIB Category) is allowed to be met with spillover from any other category or combination of categories at the discretion of the Issuer and in consultation with the Lead Managers and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations. Unsubscribed Category in QIB Category is not available for subscription to other categories.
- (c) In case of under subscription in the Net Issue, spill-over to the extent of such under subscription may be permitted from the Reserved Category to the Net Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/ Applicants may refer to the RHP.

(d) Illustration of the Book Building and Price Discovery Process

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of Rs. 20 to Rs. 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (In Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of equity shares is the price at which the book cuts off, i.e., 22.00 in the above example. The issuer, in consultation with the Lead Managers, may finalise the issue price at or below such cut-off price, i.e., at or below 22.00. All Bids at or above this issue price and cut-off bids are valid Bids and are considered for allocation in the respective categories.

(e) Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of bidding (“Alternate Book Building Process”).

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIBs, NIBs are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted

to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/ or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the application form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated SCSB Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Issue Opening Date.

In a fixed price Issue, allocation in the net issue to the public category is made as follows: minimum fifty percent to Retail Individual Bidders; and remaining to (i) individual investors other than Retail Individual Bidders; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Bidders may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

However, in case the Issue is in the nature of Issue for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIBs

Bids received from the RIBs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIBs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIBs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIBs by the minimum Bid Lot (“**Maximum RIB Allottees**”). The Allotment to the RIBs will then be made in the following manner:

- (a) In the event the number of RIBs who have submitted valid Bids in the Issue is equal to or less than Maximum RIB Allottees, (i) all such RIBs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIBs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).

- (b) In the event the number of RIBs who have submitted valid Bids in the Issue is more than Maximum RIB Allottees, the RIBs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIBs

Bids received from NIBs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIBs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIBs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Portion.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Bidders may refer to the SEBI ICDR Regulations or RHP / Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- (a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Portion, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Portion; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- (b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

Anchor Investors are then required to pay any additional amounts, being the difference between the Issue Price and the Anchor Investor Issue Price, as indicated in the revised CAN within the pay-in date referred to in the revised CAN. Thereafter, the Allotment Advice will be issued to such Anchor Investors.
- (d) **In the event the Issue Price is lower than the Anchor Investor Issue Price:** Anchor Investors who have been Allotted Equity Shares will directly receive Allotment Advice.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIBs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- (a) Bidders may be categorized according to the number of Equity Shares applied for;
- (b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
