SECTION II – RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. In making an investment decision prospective investors must rely on their own examination of our Company and the terms of this offer including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider as immaterial to our operations.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. To obtain a complete understanding, you should read this section in conjunction with the chapters titled “Our Business” beginning on page no 120 “Our Industry” beginning on page no 111 and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 248 respectively, of this Draft Prospectus as well as other financial information contained herein.

The following factors have been considered for determining the materiality of Risk Factors:

- *Some events may not be material individually but may be found material collectively;*
- *Some events may have material impact qualitatively instead of quantitatively;*
- *Some events may not be material at present but may have material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, the financial information of the Company used in this section is derived from our financial statements under Indian GAAP, as restated in this Draft Prospectus. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviations” beginning on page 03 of this Draft Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

A. INTERNAL RISK FACTORS

A. Business Risks/ Company specific Risk

- 1. Challenges in relation to immigration may affect our ability to compete for, and provide services to, clients in the United States and/or other countries, partly because we may be required to hire locals instead of using our existing work force, which could result in lower profit margins, delays in, or losses of, client engagements and otherwise adversely affect our ability to meet our growth, revenue and profit projections. We cannot assure you that we will not be subject to penalties in relation to employment visa violations in the future.**

Currently approx 99% of our revenue is generated from USA. Our employees who work onsite at client facilities or at our facilities in the United States on temporary or extended assignments typically must obtain visas. If United States immigration laws change and make it more difficult for us to obtain non-immigrant visas (i.e., H-1B and L-1 visas) for our employees, our ability to compete for and provide services to our clients in the United States could be impaired. In response to past terrorist attacks in the United States, the USCIS and the U.S. Department of State have increased their level of scrutiny in reviewing visa applications and work petitions and have decreased the number of such visas granted. Immigration laws in the United States and in other countries are subject to legislative changes, as well as to variations in the standards of application and enforcement due to political forces and economic conditions. It is difficult to predict the political and economic events that could affect immigration laws, or the restrictive impact they could have on obtaining or reviewing work visas for our technology professionals, despite the fact that there may be ongoing shortages of such professionals in some of the countries in which we do business.

The United States is currently considering further restrictive immigration reforms, which may have a substantial impact on our business model and practices, costs, hiring practices or capacity to complete client projects and which may result in an increase in the cost of us doing business in the United States as a result of having to recruit more local United States employees or paying higher wages to deputed personnel. We cannot be certain that we will continue to be able to obtain any or a sufficient number of H-1B and L-1 visas for our employees on the same timeframe as we currently maintain.

Besides the United States, immigration laws in other countries in which we seek to obtain visas or work permits may require us to meet certain other legal requirements as conditions to obtaining or maintaining entry visas, such as maintaining a defined ratio of local to foreign employees. The inability of project personnel to obtain necessary visas or work permits could delay or prevent our fulfilment of client projects, which could hamper our growth and cause our revenue and/or profits to decline.

Similarly, certain countries and organisations have expressed concerns about a perceived connection between outsourcing to offshore locations and the loss of jobs domestically. With high domestic unemployment levels in many countries and increasing political and media attention on the outsourcing of services internationally by domestic corporations, there have been concerted efforts in many countries to enact new laws to restrict offshore outsourcing or impose restrictions on companies that outsource. For example, periodically, restrictive outsourcing legislation has been considered by federal and state authorities in the United States. In the event that any of these measures become law, our ability to do business in these jurisdictions could be adversely impacted, which, in turn, could adversely affect our revenues and profitability. Moreover, from time to time, negative experiences associated with offshore outsourcing, such as theft and misappropriation of sensitive client data, have been publicised, including reports involving service providers based in India. Our current or prospective clients may elect to perform certain services themselves or may be discouraged from transferring services from onshore to offshore service providers to avoid harmful publicity or any negative perceptions that may be associated with using an offshore service provider. Any slowdown or reversal of existing industry trends towards offshore outsourcing would seriously harm our ability to compete effectively with competitors that provide services from within the countries in which our clients operate.

To the extent we experience delays due to immigration restrictions, we may encounter client dissatisfaction, project and staffing delays in new and existing engagements, project cancellations, project losses, higher project costs and loss of revenue, resulting in decreases in profits and a material adverse effect on our business, results of operations, financial condition and cash flows. Due to these immigration delays, we may also need to perform more work onsite, or hire more resources locally, thus reducing our gross margins and overall profitability.

2. ***Our business will suffer if we fail to anticipate and develop new services and enhance existing services in order to keep pace with rapid changes in technology and the industries on which we focus.***

The IT services market is characterised by rapid technological changes, evolving industry standards, changing client preferences, and new service introductions that could result in technology obsolescence. Our future success will depend on our ability to anticipate these advances, enhance our existing offerings or develop new service offerings to meet client needs, in each case, in a timely manner. We may not be successful in anticipating or responding to these advances on a timely basis, or at all. If we do respond, the services or technologies we develop may not be successful in the marketplace. We may also be unsuccessful in stimulating customer demand for new and upgraded services, or seamlessly managing new service introductions or transitions. Our failure to address the demands of the rapidly evolving IT environment, particularly with respect to emerging technologies, and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition. In addition, our success also depends on our ability to proactively manage our portfolio of technology alliances.

Additionally, during the regular course of operating our business, we may adjust our future plans as a result of our research, experience, technology evolution and market demand. Accepting unforeseen business opportunities may also result in a business model change. We cannot guarantee that any adjustment in our future plans will become successful or be more successful than our current business model. A shift in our plans may result in the use of other technologies. Other technologies may in the future prove to be more efficient and/or economical to us than our current technologies. We cannot guarantee that any change in technology will become successful or be more successful than our current technology.

3. ***If we do not successfully anticipate market needs or develop and introduce new solutions that meet users' needs on a timely basis, we may not be able to compete effectively and our revenue, reputation, financial conditions, results of operations and cash flows may be adversely affected.***

We operate in a market that is characterised by rapidly changing technologies and business plans, which require users to adapt to increasingly complex IT infrastructures that incorporate a variety of hardware, software applications, operating systems and network protocols. As our users technologies and business plans grow more complex, we expect them to face new and increasingly sophisticated risks & threats. Although the market expects us to timely introduce improved solutions to respond to new threats, the development of these solutions can be challenging and time consuming. We may experience delays in the introduction of such new solutions, updates, enhancements and features. If we fail or are perceived to fail to respond to the rapidly changing needs of our end-users by developing upgraded solutions and introducing them on a timely, our competitive position, reputation and business prospects could be harmed.

4. ***Our investments in technology may not yield the intended results especially on our technical development.***

We invest in and intend to continue investing in human capital to enhance our technical capabilities, particularly with a view to enter into new areas. Our focus areas currently include developing integrated digital transformation framework for effecting change & developing intelligent enterprise model. We also engage with our customers in developing intellectual property combining their expert knowledge of the business with our technical expertise. Our choice of focus areas and investments in technology and human capital are based on the management's perception of the IT industry. We cannot assure you that such investments will yield the intended results. Inability of our Company to achieve intended results from its investments in technology and human capital may adversely impact our cash flows and results of operations.

5. ***Any inability to license or incorporate software and technology developed by third parties in our solutions may adversely impact our business, financial position, results of operations and cash flows.***

Our success depends to a great extent on the proprietary technology we use in our services. We primarily develop our technology in-house and also incorporate software and technology developed by third parties in our solutions. We may not be able to license or otherwise obtain rights to use and incorporate third party intellectual property in our services,

or such license or rights may only be available at a high cost. This may impact our ability to develop new services and/or our profitability.

6. *Our pricing structures do not accurately anticipate the cost and complexity of performing our work and if we are unable to manage costs successfully, then certain of our contracts could be or become unprofitable.*

We negotiate pricing terms with our clients utilising a range of pricing structures and conditions. Depending on the particular contract, we may use time-and-materials pricing, pursuant to which we typically invoice on a monthly basis for the services that we provide to our clients. We also enter into fixed-price arrangements, pursuant to which we provide a defined scope of work over a fixed timeline for a capped fee. In certain instances, we enter into time-and-materials pricing arrangements, but with the inclusion of fixed-price elements for certain specified services.

Our ability to improve or maintain our profitability is dependent on managing our costs successfully. Our cost management strategies include maintaining appropriate alignment between the demand for our services and our resource capacity, optimising the costs of service delivery through deployment of tools, and effectively leveraging our sales and marketing and general and administrative costs. We also have to manage additional costs to replace or upgrade our services in the event our clients are not satisfied in relation thereto and believe we have failed to properly understand their needs and develop solutions accordingly. Our pricing structure is highly dependent on our internal forecasts and predictions about our services and the potential demand for our services by our clients, which might be based on limited data and could be inaccurate. Although we use our specified software engineering processes and rely on our past project experience to reduce the risks associated with estimating, planning and performing fixed-price projects, we bear the risks of cost overruns, completion delays and wage inflation in connection with these projects. There is no guarantee that these, or other cost-management efforts, will be successful, that our efficiency will be enhanced, or that we will achieve desired levels of profitability.

If we do not accurately estimate the resources required, costs and timing for completing contracts, future rates of wage inflation and currency exchange rates, or if we fail to complete our contractual obligations within the contracted timeframe, our contracts could prove unprofitable for us or yield lower profit margins than anticipated. There is a risk that we will underprice our contracts, fail to accurately estimate the costs of performing the work or fail to accurately assess the risks associated with potential contracts. In particular, any increased or unexpected costs, or wide fluctuations compared to our original estimates or delays, or unexpected risks we encounter in connection with the performance of this work, including those caused by factors outside of our control, could make these contracts less profitable or unprofitable, which could adversely impact our profit margin.

7. *Intense competition in the market for technology services could affect our pricing, which could reduce our share of business from clients and decrease our revenues and profitability.*

We operate in an intensely competitive industry that experiences rapid technological developments, changes in industry standards, and changes in customer requirements. Our competitors include large IT consulting firms, captive divisions of large multinational technology firms, large Indian IT services firms, in-house IT departments of large corporations, in addition to numerous smaller local competitors in the various geographic markets in which we operate.

The technology services industry is experiencing rapid changes that are affecting the competitive landscape. We may face competition from companies that increase in size or scope as the result of strategic mergers or acquisitions, which may result in larger competitors with significant resources that benefit from economies of scale and scope. These transactions may include consolidation activity among global technology majors, hardware manufacturers, software companies and vendors, and service providers. The result of any such vertical integration may be the greater integration of services and a larger portfolio of services on offer, in each case, relative to what was previously offered by such independent vendors. Our access to such services may be reduced as a result of such an industry trend and we may otherwise become disadvantaged relative to our potentially more circumscribed service portfolio.

Such events could have a variety of negative effects on our competitive position and our financial results, including reducing our revenue, increasing our costs, lowering our gross margin percentage, and requiring us to recognise impairments on our assets.

If our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to offer services similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and client needs, our competitors may be more successful at selling their services. If we are unable to provide our clients with superior services and solutions at competitive prices or successfully market those services to current and prospective clients, our business, results of operations and financial condition may suffer. Further, a client may choose to use its own internal resources rather than engage an outside firm to perform the types of services we provide. We cannot be certain that we will be able to sustain our current levels of profitability or growth in the face of competitive pressures, including competition for skilled technology professionals and pricing pressure from competitors employing an on-site/ offshore business model.

We may face competition in countries where we currently operate, as well as in countries in which we expect to expand our operations and may have limited or no experience. Many of our competitors have significantly greater financial, technical and marketing resources, generate greater revenues, have more extensive existing client relationships and technology partners and have greater international brand recognition than we do. We may be unable to compete successfully against these competitors, or may lose clients to these competitors. There is a risk that increased competition could put downward pressure on the prices we can charge for our services and on our operating margins. Additionally, we believe that our ability to compete also depends in part on factors outside of our control, such as the price at which our competitors offer comparable services, and the extent of our competitors' responsiveness to their clients' needs.

8. *Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business.*

Since we provide services to clients in USA, Germany & UAE, we are subject to numerous, and sometimes conflicting, legal requirements on matters as diverse as import/export controls, content requirements, trade restrictions, the environment (including electronic waste), tariffs, taxation, sanctions, government affairs, anti-corruption, whistle blowing, internal and disclosure control obligations, data protection and privacy and labour relations and certain regulatory requirements that are specific to our clients' industries. Non-compliance with these regulations in the conduct of our business could result in fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business and have an adverse impact on our reputation. Gaps in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and/or criminal prosecution, unfavourable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient to defend us and preserve our rights. We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees, partners or other related individuals.

We have a number of employees located outside of India. We are subject to risks relating to compliance with a variety of national and local laws, including multiple tax regimes, labour laws, and employee health, safety, wages and benefits laws. We may, from time to time, be subject to litigation or administrative actions resulting from claims against us by current or former employees individually or as part of class actions, including claims of wrongful terminations, discrimination, misclassification or other violations of labour law or other alleged conduct. We may also, from time to time, be subject to litigation resulting from claims against us by third parties, including claims of breach of non-compete and confidentiality provisions of our employees' former employment agreements with such third parties or claims of breach by us of their intellectual property rights. Our failure to comply with applicable regulatory requirements could have a material adverse effect on our business, financial condition and results of operations.

9. *We propose to utilize part of the Net Proceeds to undertake an acquisition for which the target has not beenfinalised.*

We propose to utilize our Net Proceeds towards acquisitions and other strategic investments. We propose to use these Net Proceeds to acquire the target is yet to be finalised. We shall comply with the provisions of Companies Act, 2013 with respect to utilization of issue proceeds. As on date of filing this Draft Prospectus, we have not entered into any

definitive agreements towards such Acquisitions. The estimates are based solely on management estimates of the amounts to be utilised towards an acquisition and other relevant considerations. The actual deployment of funds will depend on a number of factors, including the timing, nature, size and number of strategic initiatives undertaken, as well as general factors affecting our results of operation, financial condition and access to capital. In the interim, the Net Proceeds proposed to be utilized towards this object shall be deposited only in the scheduled commercial banks included in the Second Schedule of the Reserve Bank of India Act, 1934. For further details in relation to this object, please see section titled “Objects of the Issue” on page 99 of this Draft Prospectus.

10. *Failure to offer customer support in a timely and effective manner may adversely affect our relationships with our customers.*

From time to time, our customers require our customer support team to assist them in using our services, help them in resolving post-deployment issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our customers effectively, it could adversely affect our ability to retain existing customers and could prevent prospective customers from adopting our services. We may be unable to respond quickly enough to accommodate short-term increases in demand for customer support. We also may be unable to modify the nature, scope and delivery of our customer support to compete with changes in the support services provided by our competitors. Increased demand for customer support, without corresponding revenue, could increase costs and adversely affect our business, results of operations and financial condition.

Our sales are highly dependent on our business reputation and on positive recommendations from our customers. Any failure to maintain high-quality customer support, or a market perception that we do not maintain high-quality customer support, could adversely affect our reputation, business, results of operations and financial condition.

11. *We are subject to risks associated with expansion into new markets.*

Expansion into new markets, including in India and overseas, subjects us to various challenges, including those relating to our lack of familiarity with the culture, legal regulations and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations, and the lack of brand recognition and reputation in such regions.

The risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets.

By expanding into new markets, we could be subject to additional risks associated with establishing and conducting operations, including: compliance with a wide range of laws, regulations and practices, including uncertainties associated with changes in

- laws, regulations and practices and their interpretation; local preferences and service requirements;
- fluctuations in foreign currency exchange rates;
- inability to effectively enforce contractual or legal rights and adverse tax consequences;
- differing accounting standards and interpretations;
- stringent as well as differing labour and other regulations;
- differing domestic and foreign customs, tariffs and taxes;
- exposure to expropriation or other government actions; and
- political, economic and social instability.

Our Company intends to expand into existing markets. For further details, please refer to section titled "Objects of the Issue" beginning on page 99 of this Draft Prospectus. By expanding, we may be exposed to significant liability and could lose some or all of our investment in such regions, as a result of which our business, financial condition and results of operations could be adversely affected.

12. *If our services do not effectively inter-operate with our users existing or future IT infrastructures, installations could be delayed or cancelled, which would harm our business.*

Our services must effectively inter-operate with our users existing or future IT infrastructures, which often have different specifications are based on different platforms, deploy products/services from multiple vendors, use various

devices, and contain multiple generations of products/services that have been added over time. If we find errors in the existing software and defects in the hardware used in our user’s infrastructure or problematic or incompatible network configurations or settings, we may have to modify our software so that our services can effectively inter-operate with our users infrastructure and business processes. In addition, to stay competitive within certain markets or to comply with new statutory or regulatory requirements, we may be required to make software modifications in future releases of our offerings. These issues could result in longer sales cycles for our services which may adversely affect our business, financial condition, results of operations and cash flows.

13. We may be liable to our clients for damages caused by system failures, disclosure of confidential information or data security breaches, which could harm our reputation and cause us to lose clients

Many of our contracts involve contracts that are critical to the operations of our clients’ businesses and provide benefits to our clients that may be difficult to quantify. Any failure in a client’s system could result in a claim for substantial damages against us, regardless of our responsibility for such failure. In addition, we often have access to, or are required to collect and store, confidential client data. We face a number of threats to our data centres and networks such as unauthorised access, security breaches and other system disruptions. It is critical to our business that our infrastructure remains secure and is perceived by customers to be secure.

We seek to rely on encryption and authentication technology licensed from third parties to provide the security and authentication necessary to effect secure online transmission of confidential client information. Despite our security measures, advances in computer capabilities, new discoveries in the field of cryptography or other events or developments may result in a compromise or breach of the algorithms that we use to protect sensitive customer transaction data. Breaches of our security measures or the accidental loss, inadvertent disclosure or unapproved dissemination of confidential customer data could expose us, our customers or the individuals affected to a risk of loss or misuse of this information, or cause interruptions in our operations. We may be required to expend significant capital and other resources to protect against such security breaches, to alleviate problems caused by or to investigate such breaches, all of which could subject us to liability, damage our reputation and diminish the value of our brand name.

Although we attempt to limit our contractual liability for consequential damages in rendering our services, many of our client agreements do not limit our potential liability for breaches of confidentiality and we cannot be assured that such limitations on liability will be enforceable in all cases, or that they will otherwise protect us from liability for damages. Moreover, if any person, including any of our employees or former employees or subcontractors, penetrates our network security or misappropriates sensitive data, we could be subject to significant liability from our clients or from our clients’ customers for breaching contractual confidentiality provisions or privacy laws. Unauthorised disclosure of sensitive or confidential client and customer data, whether through breach of our computer systems, systems failure, loss or theft of assets containing confidential information or otherwise, could render us liable to our clients for damages, damage our reputation and cause us to lose clients.

A successful assertion of one or more large claims against us could adversely affect our revenues and results of operations. We may also be liable to our clients for damages or termination of contract if we are unable to address disruption in services to them with adequate business continuity plans and/or for non-compliance with our clients’ information security policies and procedures.

14. The average cost of acquisition of Equity shares by our Promoters is lower than the Issue price.

Our promoters average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below:

Name of the Promoters	No. of Shares held	Average cost of Acquisition (in Rs.)
Avinash Sethi	58,90,150	0.35
Siddharth Sethi	58,91,200	0.35
Mitesh Bohra	50,15,850	0.01

For Further details regarding average cost of acquisition of Equity Shares by our promoters in our Company, please refer to the chapters “Capital Structure” beginning on page 64 of this Draft Prospectus.

15. *If there is a change in tax regulations, our tax liabilities may increase and thus adversely affect our financial position and results of operations. We would indeed realise lower tax benefits if the special tax holiday scheme for units set up in special economic zones is substantially modified.*

Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, value added tax, income tax, service tax and other taxes, duties, surcharges and cess introduced from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability. Currently, we claim certain tax benefits under the Income Tax Act, relating to various business activities, which decrease our overall effective tax rates. There can be no assurance that these tax incentives will continue to be available to us in the future. The non-availability of these tax incentives could adversely affect our financial condition and results of operations.

Currently, we qualify for a deduction from taxable income on profits attributable to our status as an exporter from SEZs or from the operation of units located in SEZs. The tax deduction for the export of software development services from SEZs is available for 15 years, commencing from the year in which the SEZ commences its operations. The tax deduction for a unit in a SEZ is equal to 100% of profits from the export of services for the first five years from the commencement of operations in the SEZ, and thereafter is equal to 50% of profits from the export of services for a subsequent period of five years, and 50% for the remaining five years subject to meeting specified re-investment conditions and earmarking of specified reserves in the last five years. These tax benefits will not be available if our operations are no longer located in a SEZ, or if we fail to comply with the conditions specified under the SEZ Rules, 2006 or the Income Tax Act. As per the SEZ Rules, 2006, SEZ units are required to generate positive net foreign exchange within five years of the commencement of our operations in the SEZ. If we fail to generate positive net foreign exchange within five years, or thereafter fail to maintain it, we will be subject to penalties under the Indian Foreign Trade (Development and Regulation) Act, 1992 or the Indian Foreign Trade Act, 1992. The maximum penalty that may be imposed is equal to five times the gross value of the goods and services that we purchase with duty exemptions. We are subject to a MAT at a fixed rate as prescribed from time-to-time on our net profits as adjusted by certain prescribed adjustments. Where any tax is paid under MAT, such tax will be eligible for adjustment against regular income tax liability computed under the Income Tax Act, for the following ten years as MAT credit. We cannot assure you that the Indian central government will continue these special tax exemptions or that we will continue to qualify for such tax benefits and other incentives. If we no longer receive these tax benefits and other incentives, or if the MAT rate of taxation is increased, our financial results may be adversely affected.

The Government has proposed two major reforms in Indian tax laws, namely the goods and services tax, and provisions relating to GAAR. As regards the implementation of the goods and service tax, the Government has proposed that it will be applicable on or after April 01, 2017. The goods and services tax would replace the indirect taxes on goods and services, such as central excise duty, service tax, customs duty (excluding basic customs duty), central sales tax, state VAT, entertainment tax, luxury tax, purchase tax and surcharge currently being collected by the central and state governments. As regards GAAR, the provisions have been introduced in the Finance Act, 2012 and will apply (as per the Finance Act, 2015) in respect of any assessment year beginning on or after April 01, 2018. The GAAR provisions intend to catch arrangements declared as “impermissible avoidance arrangements”, which includes any arrangement, the main purpose or one of the main purposes of which is to obtain a tax benefit and which satisfies at least one of the following tests: (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, which are not ordinarily employed for bona fide purposes. If GAAR provisions are invoked, then the tax authorities have wide powers, including denial of tax benefit or a benefit under a tax treaty. As the taxation system is intended to undergo significant overhaul, its consequent effects on our Company cannot be determined at present and there can be no assurance that such effects would not adversely affect our Company’s business and future financial performance.

16. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

We have in the course of our business entered into, and will continue to enter into, several transactions with our related parties. For details, please refer to the Statement of Related Party Transactions under chapter “Financial Statement” beginning on page 179 of this Draft Prospectus. We cannot assure you that we will receive similar terms in our related party transactions in the future. We cannot assure you that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties. The transactions we have entered into and any further transactions with our related parties have involved or could potentially involve conflicts of interest which may be detrimental to our Company. Further, the Companies Act, 2013 has brought into effect significant changes to the Indian company law framework including specific compliance requirements such as obtaining prior approval from the audit committee, board of directors and shareholders for certain related party transactions. We cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on business and financial results, including because of potential conflicts of interest or otherwise.

17. *Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 99 of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

18. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of capital funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds could adversely affect our growth plans. We meet our capital requirements through our owned funds, internal accruals and debt. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 99 of this Draft Prospectus.

We cannot assure you that our Directors or our Key Management Personnel would

always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

20. *Our success depends largely upon the services of our Promoters and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain key managerial personnel may adversely affect the operations of our Company.*

SECTION III- INTRODUCTION

SUMMARY OF OUR INDUSTRY

Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

Overview of Indian Economy

India, a South Asian nation, is the seventh-largest country by area, the second-most populous country with over 1.25 billion people, and the most populous democracy in the world. India is the fourth largest economy in the world in terms of purchasing power parity (PPP). India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). According to the Economic Survey 2016-17, India's economic growth has been pegged at 6.5% for the current fiscal, down from 7.6% recorded in the last financial year, but is expected to rebound in the range of 6.75-7.5% in 2017-18.

According to IMF World Economic Outlook Update (January 2017), Indian economy is expected to grow at 7.2% during FY 2016-17 and 7.7% in FY 2017-18, despite the uncertainties in the global market majorly in US and Europe. World economy is expected to grow at 3.4% during FY 2016-17 and 3.6% in FY 2017-18.

The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2011-12) prices 2015-16 is Rs 113.5 trillion (US\$ 1.668 trillion), as against Rs 105.5 trillion (US\$ 1.55 trillion) in 2014-15, registering a growth rate of 7.6%.

Indian GDP (at 2011-12 prices) revived to 7.3% in Q2FY17 as compared to 7.1% in the previous quarter and 7.7% in Q2FY16. The acceleration in the GDP growth was driven by the marked improvement in the agriculture sector, while this growth momentum is not likely to sustain in the coming quarter due to the disruption in the economy caused by government's latest move to abolish high-denomination notes.

Gross value added (GVA), which is adjusted for subsidies and taxes to arrive at GDP, grew at 7.1% v/s 7.3% (each) in Q2FY17 and Q1FY17 respectively. Within the three broad sectors of the economy, growth in industry and services sectors eased compared to previous quarter, while agriculture showed the significant improvement. Agriculture sector output at 3.3% Q2FY17 in the v/s 1.8% in Q1FY17 and 2.0% in Q2FY16 as near normal monsoon this season has

boosted kharif crops production. Financial services sector GVA eased to 8.2% (9.4% in Q1FY17 and 11.9% in Q2FY16) on the bank of low growth in trade, hotel and restaurants segment and financial services. Meanwhile, Construction GVA for Q2FY17 reported at 3.5% v/s 1.5% and 0.8% in Q1FY17 and Q2FY16 respectively. GVA at manufacturing in Q2FY17 came out at 7.1% v/s 9.1% and 9.2% in Q1FY17 and Q2FY16 respectively. Mining&quarrying in Q2FY17 came out at (-)1.5% v/s (-)0.4% and 5.0% in Q1FY17 and Q2FY16 respectively.

Index of Industrial Production

As per the first advance estimates of the CSO, growth rate of the industrial sector comprising mining & quarrying, manufacturing, electricity and construction is projected to decline from 7.4% in 2015-16 to 5.2% in 2016-17. Industrial production contracted in December 2016 due to a sharp decline in production of consumer goods, confirming a demonetisation led contraction in demand. Index of Industrial Production (IIP) was 0.4% lower in December 2016 from the same period a year ago, data released on Friday showed. The cumulative IIP growth for April-December 2016 is 0.3% against 3.2% for the same period in 2015.

Foreign Direct Investments

According to Department of Industrial Policy and Promotion (DIPP), the total FDI investments India received in FY 2015-16 (April 2015-March 2016) was US\$ 40 billion, indicating that government's effort to improve ease of doing business and relaxation in FDI norms is yielding results.

Data for FY 2015-16 indicates computer hardware and software segment attracted the highest FDI equity inflow of US\$ 6.9 billion, followed by the computer hardware and software sector (US\$ 5.9 billion).

During FY2015-16, India received the maximum FDI equity inflows from Singapore at US\$ 13.69 billion, followed by Mauritius (US\$ 8.35 billion), USA (US\$ 4.19 billion), Netherlands (US\$ 2.64 billion) and Japan (US\$ 2.61 billion). Healthy inflow of foreign investments into the country helped India's balance of payments (BoP) situation and stabilised the value of rupee.

According to Department of Industrial Policy and Promotion (DIPP), Foreign direct investment (FDI) into the country grew by over 27 per cent to USD 27.82 billion during April-October this fiscal. The FDI stood at USD 21.87 billion in April-October 2016, according to the Department of Industrial Policy and Promotion (DIPP).

Global Economy

Stagnant global trade, subdued investment, and heightened policy uncertainty marked another difficult year for the world economy. Global growth in 2016 is estimated at a post-crisis low of 2.3% and is projected to rise to 2.7% in 2017. Growth in emerging market and developing economies (EMDEs) is expected to pick up in 2017.

EMDE growth is expected to accelerate to 4.2% in 2017 and to an average of 4.7% in 2018-19. EMDEs are forecast to contribute 1.6 percentage points to global growth in 2017, accounting for about 60% of global growth for the first time since 2013.

Growth in the United States slowed markedly, from 2.6% in 2015 to an estimated 1.6% in 2016, 0.3 percentage point below previous projections. The U.S. economy was held back in 2016 by soft exports, a continued drawdown in inventories, and a deceleration in private investment. In the run-up to the U.S. elections in November, activity had picked up again, and a further tightening of labor markets had led to slowly rising wage growth. This supported continued gains in real disposable income, which could help deliver a further reduction in poverty rates, following a drop in 2015.

Euro Area growth slowed from 2% in 2015 to 1.6% in 2016, as both domestic demand and exports lost momentum. Confidence in the Euro Area has been resilient following the United Kingdom's vote to exit the European Union (EU) in June 2016 (Figure 1.5). The U.S. election results could also heighten policy uncertainty in Europe. A rebound in oil prices, from their trough in early 2016, implies diminished support to real income and private consumption growth relative to the 2014-15 period.

Growth in China is estimated to have slightly decelerated to 6.7% in 2016. As part of ongoing economic rebalancing, growth has been concentrated primarily in services, while industrial production has stabilized at moderate levels. The internal rebalancing is also evident on the demand side: consumption growth has been strong, while investment growth has continued to moderate from the post-crisis peak.

Indian IT Industry

India is the world's largest sourcing destination for the information technology (IT) industry, accounting for approximately 67% of the US\$ 124-130 billion market. The industry employs about 10 million workforces. More importantly, the industry has led the economic transformation of the country and altered the perception of India in the global economy. India's cost competitiveness in providing IT services, which is approximately 3-4 times cheaper than the US, continues to be the mainstay of its Unique Selling Proposition (USP) in the global sourcing market. However,

India is also gaining prominence in terms of intellectual capital with several global IT firms setting up their innovation centres in India.

The IT industry has also created significant demand in the Indian education sector, especially for engineering and computer science. The Indian IT and ITeS industry is divided into four major segments – IT services, Business Process Management (BPM), software products and engineering services, and hardware.

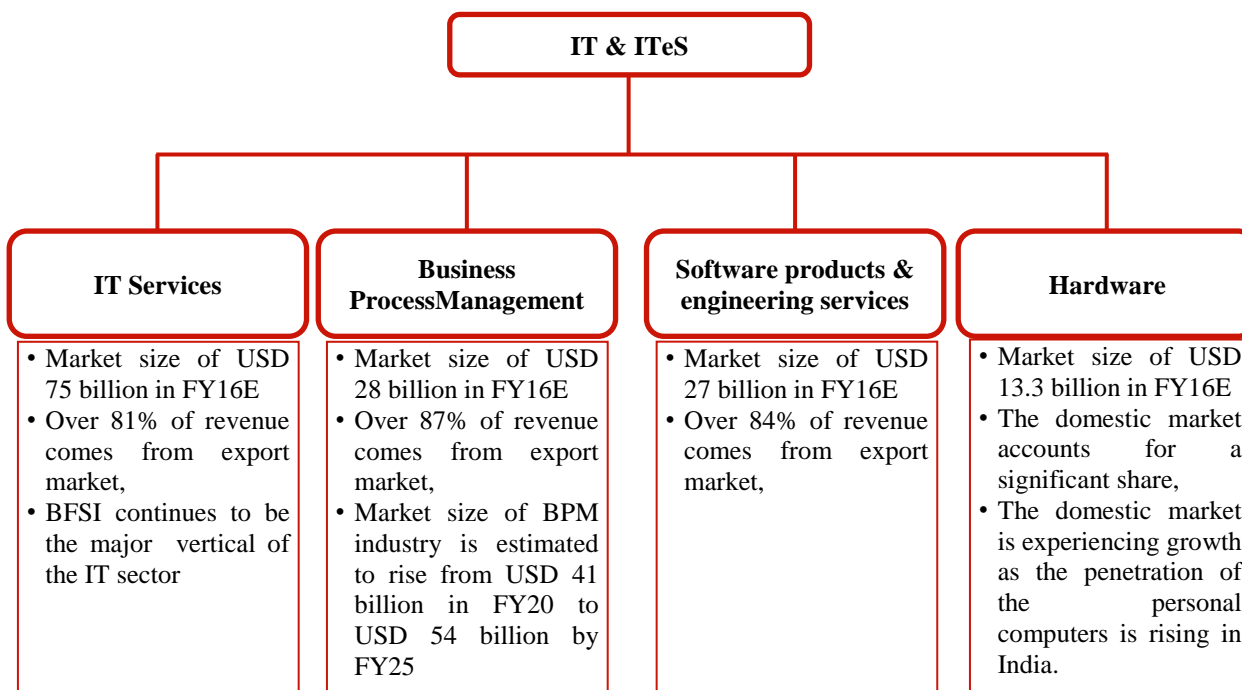

The IT-BPM sector which is currently valued at US\$ 143 billion is expected to grow at a Compound Annual Growth Rate (CAGR) of 8.3% year-on-year to US\$ 143 billion for 2015-16. The sector is expected to contribute 9.5% of India’s Gross Domestic Product (GDP) and more than 45% in total services export in 2015-16.

India’s highly qualified talent pool of technical graduates is one of the largest in the world and is available at a cost saving of 60-70% to source countries. This large pool of qualified skilled workforce has enabled Indian IT companies to help clients to save US\$ 200 billion in the last five years.

India’s IT industry amounts to 12.3% of the global market, largely due to exports. Export of IT services accounted for 56.12% of total IT exports (including hardware) from India. The Business Process Management (BPM) segment accounted for 23.46% of total IT exports during FY15. The IT-BPM sector is estimated to expand at a CAGR of 9.5% to US\$ 300 billion by 2020.

The Government of India has extended tax holidays to the IT sector for software technology parks of India (STPI) and Special Economic Zones (SEZs). Further, the country is providing procedural ease and single window clearance for setting up facilities.

Structure of IT & ITeS Sector

Market Size

- The Indian IT sector is expected to grow at a rate of 12-14% for FY2016-17 in constant currency terms. The sector is also expected triple its current annual revenue to reach US\$ 350 billion by FY 2025#.
- India ranks third among global start-up ecosystems with more than 4,200 start-ups. India's internet economy is expected to touch Rs 10 trillion (US\$ 146.72 billion) by 2018, accounting for 5% of the country's GDP. India's internet user base reached over 400 million by May 2016, the third largest in the world, while the number of social media users grew to 143 million by April 2015 and smartphones grew to 160 million.
- Public cloud services revenue in India is expected to reach US\$ 1.26 billion in 2016, growing by 30.4% year-on-year (y-o-y). The public cloud market alone in the country was estimated to treble to US\$ 1.9 billion by 2018 from US\$ 638 million in 2014^ . Increased penetration of internet (including in rural areas) and rapid emergence of e-commerce are the main drivers for continued growth of data centre co-location and hosting market in India. The Indian Healthcare Information Technology (IT) market is valued at US\$ 1 billion currently and is expected to grow 1.5 times by 2020^^. India's business to business (B2B) e-commerce market is expected to reach US\$ 700 billion by 2020 whereas the business to consumer (B2C) e-commerce market is expected to reach US\$ 102 billion by 2020.
- India's technology and BPM sector (including hardware) is likely to generate revenues of USD160 billion during FY16 compared to USD146.5 billion in FY15, implying a growth rate of 9.2%.
- The contribution of the IT sector to India's GDP rose to approximately 9.5% in FY15 from 1.2% in FY19. The top five IT firms contribute over 25% to the total industry revenue, indicating the market is competitive.

7. On the first day of the listing, there will be pre-opening session (call auction) and there after the trading will happen as per the equity market hours. The circuits will apply from the first day of the listing on the discovered price during the pre-open call auction.
8. The Market Maker may also be present in the opening call auction, but there is no obligation on him to do so.
9. There will be special circumstances under which the Market Maker may be allowed to withdraw temporarily/fully from the market – for instance due to system problems, any other problems. All controllable reasons require prior approval from the Exchange, while force-majeure will be applicable for non-controllable reasons. The decision of the Exchange for deciding controllable and non-controllable reasons would be final.
10. The Market Maker(s) shall have the right to terminate said arrangement by giving one month notice or on mutually acceptable terms to the Merchant Banker, who shall then be responsible to appoint a replacement Market Maker(s).

Indian GDP (at 2011-12 prices) revived to 7.3% in Q2FY17 as compared to 7.1% in the previous quarter and 7.7% in Q2FY16. The acceleration in the GDP growth was driven by the marked improvement in the agriculture sector, while this growth momentum is not likely to sustain in the coming quarter due to the disruption in the economy caused by government’s latest move to abolish high-denomination notes.

Gross value added (GVA), which is adjusted for subsidies and taxes to arrive at GDP, grew at 7.1% v/s 7.3% (each) in Q2FY17 and Q1FY17 respectively. Within the three broad sectors of the economy, growth in industry and services sectors eased compared to previous quarter, while agriculture showed the significant improvement. Agriculture sector output at 3.3% Q2FY17 in the v/s 1.8% in Q1FY17 and 2.0% in Q2FY16 as near normal monsoon this season has boosted kharif crops production. Financial services sector GVA eased to 8.2% (9.4% in Q1FY17 and 11.9% in Q2FY16) on the bank of low growth in trade, hotel and restaurants segment and financial services. Meanwhile, Construction GVA for Q2FY17 reported at 3.5% v/s 1.5% and 0.8% in Q1FY17 and Q2FY16

respectively. GVA at manufacturing in Q2FY17 came out at 7.1% v/s 9.1% and 9.2% in Q1FY17 and Q2FY16 respectively. Mining&quarrying in Q2FY17 came out at (-)1.5% v/s (-)0.4% and 5.0% in Q1FY17 and Q2FY16 respectively.

Index of Industrial Production

As per the first advance estimates of the CSO, growth rate of the industrial sector comprising mining & quarrying, manufacturing, electricity and construction is projected to decline from 7.4% in 2015-16 to 5.2% in 2016-17. Industrial production contracted in December 2016 due to a sharp decline in production of consumer goods, confirming a demonetisation led contraction in demand. Index of Industrial Production (IIP) was 0.4% lower in December 2016 from the same period a year ago, data released on Friday showed. The cumulative IIP growth for April-December 2016 is 0.3% against 3.2% for the same period in 2015.

Foreign Direct Investments

According to Department of Industrial Policy and Promotion (DIPP), the total FDI investments India received in FY 2015-16 (April 2015-March 2016) was US\$ 40 billion, indicating that government's effort to improve ease of doing business and relaxation in FDI norms is yielding results.

Global Economy

Stagnant global trade, subdued investment, and heightened policy uncertainty marked another difficult year for the world economy. Global growth in 2016 is estimated at a post-crisis low of 2.3% and is projected to rise to 2.7% in 2017. Growth in emerging market and developing economies (EMDEs) is expected to pick up in 2017.

EMDE growth is expected to accelerate to 4.2% in 2017 and to an average of 4.7% in 2018-19. EMDEs are forecast to contribute 1.6 percentage points to global growth in 2017, accounting for about 60% of global growth for the first time since 2013.

Growth in the United States slowed markedly, from 2.6% in 2015 to an estimated 1.6% in 2016, 0.3 percentage point below previous projections. The U.S. economy was held back in 2016 by soft exports, a continued drawdown in inventories, and a deceleration in private investment. In the run-up to the U.S. elections in November, activity had picked up again, and a further tightening of labor markets had led to slowly rising wage growth. This supported continued gains in real disposable income, which could help deliver a further reduction in poverty rates, following a drop in 2015.

Euro Area growth slowed from 2% in 2015 to 1.6% in 2016, as both domestic demand and exports lost momentum. Confidence in the Euro Area has been resilient following the United Kingdom's vote to exit the European Union (EU) in June 2016 (Figure 1.5). The U.S. election results could also heighten policy uncertainty in Europe. A rebound in oil prices, from their trough in early 2016, implies diminished support to real income and private consumption growth relative to the 2014-15 period.

Growth in China is estimated to have slightly decelerated to 6.7% in 2016. As part of ongoing economic rebalancing, growth has been concentrated primarily in services, while industrial production has stabilized at

moderate levels. The internal rebalancing is also evident on the demand side: consumption growth has been strong, while investment growth has continued to moderate from the post-crisis peak.

Indian IT Industry

India is the world's largest sourcing destination for the information technology (IT) industry, accounting for approximately 67% of the US\$ 124-130 billion market. The industry employs about 10 million workforces. More importantly, the industry has led the economic transformation of the country and altered the perception of India in the global economy. India's cost competitiveness in providing IT services, which is approximately 3-4 times cheaper than the US, continues to be the mainstay of its Unique Selling Proposition (USP) in the global sourcing market. However, India is also gaining prominence in terms of intellectual capital with several global IT firms setting up their innovation centres in India.

The IT industry has also created significant demand in the Indian education sector, especially for engineering and computer science. The Indian IT and ITeS industry is divided into four major segments – IT services, Business Process Management (BPM), software products and engineering services, and hardware.

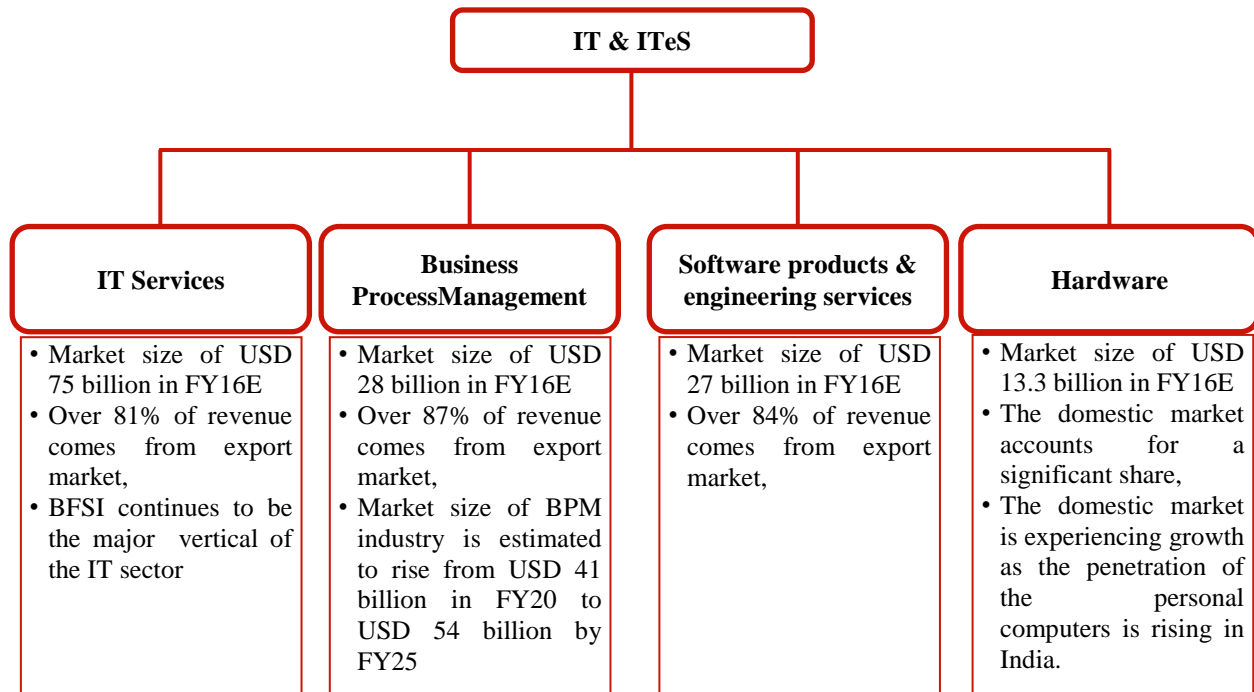

The IT-BPM sector which is currently valued at US\$ 143 billion is expected to grow at a Compound Annual Growth Rate (CAGR) of 8.3% year-on-year to US\$ 143 billion for 2015-16. The sector is expected to contribute 9.5% of India's Gross Domestic Product (GDP) and more than 45% in total services export in 2015-16.

India's highly qualified talent pool of technical graduates is one of the largest in the world and is available at a cost saving of 60-70% to source countries. This large pool of qualified skilled workforce has enabled Indian IT companies to help clients to save US\$ 200 billion in the last five years.

India's IT industry amounts to 12.3% of the global market, largely due to exports. Export of IT services accounted for 56.12% of total IT exports (including hardware) from India. The Business Process Management (BPM) segment accounted for 23.46% of total IT exports during FY15. The IT-BPM sector is estimated to expand at a CAGR of 9.5% to US\$ 300 billion by 2020.

The Government of India has extended tax holidays to the IT sector for software technology parks of India (STPI) and Special Economic Zones (SEZs). Further, the country is providing procedural ease and single window clearance for setting up facilities.

Structure of IT & ITeS Sector

Market Size

- The Indian IT sector is expected to grow at a rate of 12-14% for FY2016-17 in constant currency terms. The sector is also expected triple its current annual revenue to reach US\$ 350 billion by FY 2025#.
- India ranks third among global start-up ecosystems with more than 4,200 start-ups. India's internet economy is expected to touch Rs 10 trillion (US\$ 146.72 billion) by 2018, accounting for 5% of the country's GDP. India's internet user base reached over 400 million by May 2016, the third largest in the world, while the number of social media users grew to 143 million by April 2015 and smartphones grew to 160 million.
- Public cloud services revenue in India is expected to reach US\$ 1.26 billion in 2016, growing by 30.4% year-on-year (y-o-y). The public cloud market alone in the country was estimated to treble to US\$ 1.9 billion by 2018 from US\$ 638 million in 2014[^]. Increased penetration of internet (including in rural areas) and rapid emergence of e-commerce are the main drivers for continued growth of data centre co-location and hosting market in India. The Indian Healthcare Information Technology (IT) market is valued at US\$ 1 billion currently and is expected to grow 1.5 times by 2020^{^^}.
