A. INTERNAL RISK FACTORS

I. Business Risks/ Company specific Risk

- 1. Our operations are significantly dependent on our ability to successfully identify customer requirement and references and gain customer acceptance for our products. If we are unable to successfully identify customer requirements and preferences and gain customer acceptance for our products, our business may suffer.***

Our future success depends on our ability to ensure continued demand for our products in existing and proposed markets, which requires us to continuously anticipate and respond in a timely manner to customer requirements and preferences. Further, our success is dependent on our ability to gain customer acceptance for our current and future products. If we are unable to successfully anticipate customer requirements, or are unable to modify our current portfolio of products or develop new products, in a timely manner, we may lose customers or become subject to greater pricing pressures.

- 2. Our failure to correctly anticipate trends and adapt to the changing technological environment may result in obsolescence of and reduced demand for our products.***

Though we are committed to product innovation to respond to changing technology in the lighting industry, there can be no assurance that we would be successful in developing new products that respond to such changes or changes in customer requirements and preferences or that our products would gain acceptance in our existing or new markets. A decline in demand for our products, or an error in our forecasts for future demand, among other things, could lower our sales, increase inventory levels and may require us to sell our products at substantially marked-down prices. Moreover, failure to correctly anticipate trends and adapt to the changing technological environment may result in obsolescence of and reduced demand for our products.

- 3. We may be subject to risks associated with product warranty.***

We are subject to risks and costs associated with product warranties, supply of defective lights, or related after-sales services provided by us within the warranty periods stipulated for our products. Any defects in the finished products may result in invocation of such warranties or performance guarantees issued by us and may require repair or replacement resulting in additional costs for our Company. The defects in our products or any product liability claim against us could generate adverse publicity, leading to a loss of reputation, customers and/or increase our costs, thereby materially and adversely affecting our reputation, business, results of operations, financial condition and cash flows.

- 4. We rely on third parties for products traded by our Company.***

We rely on third parties for supply of products traded by our Company. Any decline in the quality of products or delay in delivery of products by such parties or rise in price may affect our operations. Our inability to source our products from our vendors in a timely manner, in sufficient quantities and/or at competitive prices could adversely affect our operations, financial condition and/or profitability.***

If our vendors are unable to supply the products that are marketed and sold by us which are sourced from third parties, in sufficient quantities, or there is a loss of one or more significant vendors, our ability to obtain products at competitive rates could be adversely affected. In such event, our cost of purchasing such products from alternate sources could be higher thereby adversely affecting our operating margins and our results of operations. Further we do not enter into long term agreements with the vendors for products marketed and sold by us. Any severance of our relations with our suppliers and/or vendors could adversely affect our operations and profitability. We have been buying approximately 70-80% of our products from M/s Shantilal & Bros. (Mfg Dept).

8. ***We face competition in relation to our offerings, including from competitors that may have greater financial and marketing resources. Failure to compete effectively may have an adverse impact on our business, financial condition, results of operations and prospects.***

We operate in an increasingly competitive market and our results of operations and financial condition are sensitive to, and may be materially and adversely affected by, competitive pricing and other factors. Increasing competition may result in pricing pressures and decreasing profit margins or lost market share or failure to improve our market position, any of which could substantially harm our business and results of operations. According to IMF World Economic Outlook Update (January 2017), Indian economy is expected to grow at 7.2% during FY 2016-17 and 7.7% in FY 2017-18, despite the uncertainties in the global market majorly in US and Europe. World economy is expected to grow at 3.4% during FY 2016-17 and 3.6% in FY 2017-18.

The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2011-12) prices 2015-16 is Rs 113.5 trillion (US\$ 1.668 trillion), as against Rs 105.5 trillion (US\$ 1.55 trillion) in 2014-15, registering a growth rate of 7.6%.

INDEX OF INDUSTRIAL PRODUCTION

Industrial production contracted in December 2016 due to a sharp decline in production of consumer goods, confirming a demonetisation led contraction in demand. Index of Industrial Production (IIP) was 0.4% lower in December 2016 from the same period a year ago, data released on Friday showed. FOREIGN DIRECT INVESTMENTS

According to Department of Industrial Policy and Promotion (DIPP), the total FDI investments India received in FY 2015-16 (April 2015-March 2016) was US\$ 40 billion, indicating that government's effort to improve ease of doing business and relaxation in FDI norms is yielding results.

Data for FY 2015-16 indicates computer hardware and software segment attracted the highest FDI equity inflow of US\$ 6.9 billion, followed by the computer hardware and software sector (US\$ 5.9 billion).

During FY2015-16, India received the maximum FDI equity inflows from Singapore at US\$ 13.69 billion, followed by Mauritius (US\$ 8.35 billion), USA (US\$ 4.19 billion), Netherlands (US\$ 2.64 billion) and Japan (US\$ 2.61 billion). Healthy inflow of foreign investments into the country helped India's balance of payments (BoP) situation and stabilised the value of rupee.

Global Economy

Stagnant global trade, subdued investment, and heightened policy uncertainty marked another difficult year for the world economy. Global growth in 2016 is estimated at a post-crisis low of 2.3% and is projected to rise to 2.7% in 2017. Growth in emerging market and developing economies (EMDEs) is expected to pick up in 2017.

EMDE growth is expected to accelerate to 4.2% in 2017 and to an average of 4.7% in 2018-19. EMDEs are forecast to contribute 1.6%age points to global growth in 2017, accounting for about 60% of global growth for the first time since 2013.

Growth in the United States slowed markedly, from 2.6% in 2015 to an estimated 1.6% in 2016, 0.3%age point below previous projections. The U.S. economy was held back in 2016 by soft exports, a continued drawdown in inventories, and a deceleration in private investment. In the run-up to the U.S. elections in November, activity had picked up again, and a further tightening of labor markets had led to slowly rising wage growth. This supported continued gains in real disposable income, which could help deliver a further reduction in poverty rates, following a drop in 2015.

Euro Area growth slowed from 2% in 2015 to 1.6% in 2016, as both domestic demand and exports lost momentum. Confidence in the Euro Area has been resilient following the United Kingdom's vote to exit the European Union (EU) in June 2016 (Figure 1.5). The U.S. election results could also heighten policy uncertainty in Europe. A rebound in oil prices, from their trough in early 2016, implies diminished support to real income and private consumption growth relative to the 2014-15 period.

Growth in China is estimated to have slightly decelerated to 6.7% in 2016. As part of ongoing economic rebalancing, growth has been concentrated primarily in services, while industrial production has stabilized at moderate levels. The internal rebalancing is also evident on the demand side: consumption growth has been strong, while investment growth has continued to moderate from the post-crisis peak.

Global Economy

Stagnant global trade, subdued investment, and heightened policy uncertainty marked another difficult year for the world economy. Global growth in 2016 is estimated at a post-crisis low of 2.3% and is projected to rise to 2.7% in 2017. Growth in emerging market and developing economies (EMDEs) is expected to pick up in 2017.

EMDE growth is expected to accelerate to 4.2% in 2017 and to an average of 4.7% in 2018-19. EMDEs are forecast to contribute 1.6%age points to global growth in 2017, accounting for about 60% of global growth for the first time since 2013.

Growth in the United States slowed markedly, from 2.6% in 2015 to an estimated 1.6% in 2016, 0.3%age point below previous projections. The U.S. economy was held back in 2016 by soft exports, a continued drawdown in inventories, and a deceleration in private investment. In the run-up to the U.S. elections in November, activity had picked up again, and a further tightening of labor markets had led to slowly rising wage growth. This supported continued gains in real disposable income, which could help deliver a further reduction in poverty rates, following a drop in 2015.

Euro Area growth slowed from 2% in 2015 to 1.6% in 2016, as both domestic demand and exports lost momentum. Confidence in the Euro Area has been resilient following the United Kingdom's vote to exit the European Union (EU) in June 2016 (Figure 1.5). The U.S. election results could also heighten policy uncertainty in Europe. A rebound in oil prices, from their trough in early 2016, implies diminished support to real income and private consumption growth relative to the 2014-15 period.

Growth in China is estimated to have slightly decelerated to 6.7% in 2016. As part of ongoing economic rebalancing, growth has been concentrated primarily in services, while industrial production has stabilized at moderate levels. The internal rebalancing is also evident on the demand side: consumption growth has been strong, while investment growth has continued to moderate from the post-crisis peak.

INDIAN LIGHTING INDUSTRY

Overview

The National Government's mandate of rural electrification along with usage of energy efficient formats is the core driver of the lighting market space on the long-term basis (especially CFL variant). Rajiv Gandhi Grameen Vidyutikaran Yojana and BYL programs have been implemented for the past 4-5 years, with approximately 53% households receiving electricity and subsidized replacement of US\$8.5 million ICL technology with CFL variants.

On the other hand, the National Government of India is the largest customer of the lighting product portfolio for urban housing, airports, railways, and highways (NHAI). India's lighting market is slightly consolidated, with the three largest manufacturers controlling 46% of the market share (2011). Philips is the biggest manufacturer and distributor of lighting products with market share of 26% (2010-2011).

In his Budget speech, Jaitley said that 100 per cent electrification of villages will be achieved by May 1, 2019. The government has allocated Rs 4,843 crore for electrification in financial year 2017-18.

Lighting consumes around 17% of the overall power and as the thus creating a need for energy efficient lighting. India's LED market is predicted to reach \$1,457.8 million by 2019, at an annual growth rate of 35.9%, during 2014-19. As the gap between demand and supply of energy is increasing very fast Government need to take some steps to minimise this difference. One of the initiative taken by the government is to replace incandescent bulbs with LED bulbs, LED bulbs uses 50% less energy than CFL .Energy companies are also distributing LED bulbs at very nominal price to promote the use of LED bulbs to save energy.

Declining prices are also one of the factors driving the growth of LED lighting in India. As the power consumption is increasing everyday there is a desperate need of switching to energy efficient appliances. As the lighting industry is growing at very rapid pace light exhibition specifically LED Expo are need of the hour. Various LED exhibitions such as LED expo, Light India, 2nd Smart Cities 2016 expo provide a platform to LED industry to show case latest technology in the field of LED lighting.

MARKET SIZE

India's lighting market is worth US\$1.75 billion, with year-on-year growth of 7.5%, and is stipulated to reach US\$2.75 billion. CFL is the biggest and fastest growing segment across the Indian lighting marketplace, accounting for 27.5% of total sales value. The CFL segment is stipulated to reach US\$760 million, contributing to 28% of the total domestic market. Luminaires is the second leading segment constituting 22% of the total. India's Government initiatives to replace incandescent bulbs with LED bulbs, increasing energy demand supply gap and declining prices have been leading to an increase in India's LED market, which is stipulated to reach \$ 1,457 million by 2019, with a CAGR of 35,9% between 2014 and 2019.

Sources: Emkay Global Financial Services and ELCOMA

LED lighting market in India is projected to register a CAGR of over 30%, during 2016-2021, on account of rising personal disposable income, growing government initiatives encouraging use of LED lights and increasing focus on smart city projects. For instance, Delhi-Mumbai Industrial Corridor Development Corporation (DMICDC) announced plans to develop 7 smart cities in Gujarat, Haryana, Maharashtra, Rajasthan, Uttar Pradesh and Madhya Pradesh in the near future. These projects are expected to further increase government emphasis on energy efficient lighting products such as LEDs in the coming years. Favorable government initiatives and policies such as state specific and national level programs that offer LED lighting products at subsidized rates is contributing in a huge way towards boosting LED adoption in the country. Additionally, with increasing consumer awareness, demand for LED lights from the residential as well as commercial sectors in the country is growing at a fast pace. Rising adoption of LED lighting in the residential sector can be attributed to low power consumption and long product lifecycle of these lighting solutions.

Outdoor lighting applications garnered a revenue share of over 60% in India LED lighting market in 2015 and the trend is expected to continue through 2021. Philips, Surya Roshni, Havells, Syska and Osram are few of the leading players operating in India LED lighting market. The adoption of LED lighting products has been recorded highest from Southern and Northern states due to higher literacy rate, rising disposable income levels and rising awareness about the benefits of LED lighting products. Rising urban population of the country, which stood at 31% of the total population in 2011, and rose to over 33% in 2015, is expected to further drive demand for LED lighting in India during next five years.

The construction activities aimed at improving the infrastructure and real estate sectors are increasing rapidly. This is directly contributing to the demand for lighting source across the country. In addition, the growing automotive market and increasing penetration of high end lighting products are also contributing to the industry growth. The market for lighting sources can be divided on the basis of its technology. Traditional technology includes Incandescent lamps, Fluorescent lamp tubes, Compact fluorescent lamps and special lamps, whereas, modern lighting source technologies include LEDs. Even though the market is dominated by incandescent lamps, its share in the lighting source industry is likely to reduce in the near future as a result of increasing awareness regarding more energy efficient alternatives such as CFLs.

The market for lighting sources is likely to be benefitted by the phase out of incandescent bulbs under the “Bachat Lamp Yojna” carried out by Bureau of Energy Efficiency; Ministry of Power as the phase out will drive the growth for LEDs and CFLs. The market for lighting sources in India is expected to grow at a CAGR of 28% over the next five years. The low penetration of LEDs in India holds ample opportunities for the manufacturers to tap this nascent market. With growing number of households in India along with increasing income, the market for lighting source is poised for growth. The average prices of LEDs are expected to decline which will boost its market share over the coming years.

CHALLENGES IN LIGHTING INDUSTRY

LED Lighting in India has indeed expanded and grown by over 50% annually over the last few years. India has the unique strength of excellent world-class R&D technologists in electronics which is the base for LED lighting industry. This is helping the Indian Lighting Industry to continuously incorporate new innovative improvements in performance of the LED Lights manufactured in India. However, the most critical hurdle in the growth of LED manufacturing in India is on account of inadequate development in manufacturing of LED chips and micro chips, as they still have to be imported at high cost resulting in constraints in developing larger variety, colors and performance and innovations in LED Lights.

OPPORTUNITIES IN LIGHTING INDUSTRY

Owing to several measures taken by the government the lighting industry is witnessing a structural shift. Major initiatives of the government for instance replacing conventional streetlights by LED Street Lights provide a significant opportunity for the players in the segments. Eon Electric has an extensive experience of exporting Feeder Pillars for Street Light controls to Power Distribution companies in Middle East and African countries. At Eon, we are now focusing on introducing Street Lights to Municipal Corporations and Power Distribution companies for efficient, cost effective installation and usage of Street Lights.

EMPLOYEES STATE INSURANCE ACT, 1948 (ESI Act)

The promulgation of Employees' State Insurance Act, 1948(ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi-dimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act, 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

The SHWW Act makes it mandatory for every employer of a workplace to constitute an Internal Complaints Committee which shall always be presided upon by a woman. It also provides for the manner and time period within which a complaint shall be made to the Internal Complaints Committee i.e. a written complaint is to be made within a period of 3 (three) months from the date of the last incident. If the establishment has less than 10 (ten) employees, then the complaints from employees of such establishments as also complaints made against the employer himself shall be received by the Local Complaints Committee. Operating Cycle:

Operating cycle is the time between the acquisition of assets for processing and their realization in cash or cash equivalent.

3. Significant Accounting Policies:

3.1 Use of Estimates

The preparation of financial statements in conformity with GAAP in India requires the management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent liabilities at the date of financial statements, and the reported amount of revenues and expenses during the reporting period. Actual results could differ from these estimates. On an ongoing basis, estimates are evaluated based on historical experience and on various other assumptions that are believed to be reasonable, the results of which forms the basis for making judgments about the carrying value of assets and liabilities. Actual results could differ from those estimates. Any revision to estimates or difference between the actual result and estimates are recognized in the period in which the results are known/ materialized.

3.2 Fixed Assets

(i) Fixed assets are accounted for on historical cost basis (inclusive of the cost of installation and other incidental costs till commencement of commercial production) net of recoverable taxes, less accumulated depreciation and impairment loss, if any.

(ii) Expenditure on renovation/ modernization relating to existing fixed assets is added to the cost of such assets where it increases its performance/life significantly.

3.3 Depreciation

(i) Depreciation on fixed assets is provided on written down value basis over the useful life of the assets estimated by the management, in the manner prescribed in Schedule II of the Companies Act, 2013.

3.4 Revenue Recognition

(i) All known income and expenditure quantifiable till the date of signing of report are accounted on accrual basis when virtual certainty is established .

(ii) Sales Revenue is recognised when property in the goods with all risk rewards and effective control of goods usually associated with ownership are transferred to buyer.

(iii) Export incentive is recognized on post export basis on the basis of their entitlement rates.

(iv) Interest income is recognised on time proportion basis.

(v) Insurances claims are recognised to the extent the Company is reasonably certain of their ultimate receipt.

(vi) Sales are recorded net of Excise duty, trade discounts, rebates and VAT Tax. Purchases are recorded net of Input credit for taxes that are subsequently eligible for Input Credit / Refund.

3.5 Provisions and contingent liabilities

(i) The Company creates a provision when there is a present obligation arising as result of past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation, at the balances sheet date and are not discounted to its present value.

(ii) A disclosure for a contingent liability is made when there is a present obligation arising as a result of past event that probably will not require an outflow of resources or where a reliable estimate of the obligation cannot be made.

3.6 Inventory Valuation

(i) Inventories are valued at the lower of cost and net realisable value.

(ii) In respect of raw material, packing material and stores & spares, cost is computed on first in first out basis.

(iii) Finished goods and stock-in-process include cost of input conversion and other costs including manufacturing overheads incurred in bringing them to their present location and condition.

(iv) Obsolete, defective and unserviceable stocks are provided for, wherever required.

(v) Excise duty on finished goods manufactured is accounted for on clearance of goods from factory premises.

3.7 Impairment of Assets

The management periodically assesses using, external and internal sources, whether there is an indication that an asset may be impaired. An impaired loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is the higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed, if and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized, the carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior year/s.

3.8 Borrowing costs

Borrowing costs attributable to the acquisition and/or construction of qualifying assets are capitalized as a part of the cost of such assets, upto the date when such assets are ready for intended use. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. Other borrowing costs are charged to the Statement of Profit and Loss.

3.9 Foreign Currency Transactions

Foreign currency transactions are recorded at the exchange rate prevailing on the date of transaction. Monetary assets and liabilities in foreign currency existing at balance sheet date are translated at the year end exchange rates. Exchange rate differences arising on settlement of transaction and translation of monetary items are recognized as income or expenses in the year in which they arise. Premium or discount on forward exchange contract is amortised as income or expense over the life of the contract. Exchange difference on such contract is recognized in the Statement of Profit and Loss in the reporting period in which the exchange rate changes. Any profit or loss arising on cancellation or renewal of forward contract is recognized as income or expenditure during the period.

3.12 Taxation

Provision for current taxes is made after taking into consideration benefits admissible under the provisions of Income Tax Act, 1961. Deferred Tax resulting from "timing differences" between taxable and accounting income is accounted for using the tax rates and laws that have been substantially enacted as of the balance sheet date. Deferred tax assets arising from timing differences are recognized to the extent there is reasonable certainty that these would be realized in future.

3.15 Earnings per Share:

Basic earnings per share is calculated by dividing net profit of the year by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.
