The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

A. INTERNAL RISK FACTORS

I. Business Risks/ Company specific Risk

1. Our profitability and results of operations may be adversely affected in the event of increases in the carrier cost, price of fuel, labor or other inputs.

The logistics Industry historically has experienced cyclical fluctuations in financial results due to economic recession, downturn in business cycles of our customers, fuel shortage, price increases by carriers, interest rate fluctuations, and other economic factors beyond our control. The prices and supply of fuel and labor costs depend on factors not under our control, including but not limited to general economic conditions, global and domestic market prices, competition, production levels, transportation costs and import duties, and these prices are cyclical in nature, which would lead to increase in cost and eventually affect the profits of the Company. If economic recession or a downturn in our customers' business cycle cause a reduction in the volume of freight shipped by those customers, our operating results could also be adversely affected.

2. Our Company does not have CHA license in our name.

Our main business is of consolidation of cargo where the margins are there. We do not have any CHA license in our name which is used for entry or departure of a conveyance or the import or export of goods at any Customs Station as there are various third party license holders who can do the job on fixed price basis. We rely on third parties for CHA services. Any delay in the service by CHA Agency may affect delivery of our goods and we may have to compensate our customers for the loss if any. Any such event may affect our result of operations and future prospects.

3. We deal in transport of hazardous goods, in case of any accident involving hazardous goods; we may be liable for damages and subsequent litigations.

We depend on third party carriers for transportation of hazardous goods; any mishandling of hazardous substance by these carriers could affect our business adversely. These can cause personal injury as well as loss of life and destruction of property and equipment, environmental damage which may result in suspension of operation and imposition of civil and criminal liabilities upon us, which can have an adverse effect on our Company and its financial position.

4. Our Company has incurred losses in financial year 2015-16.

Our Company has incurred losses in financial year 2015-16 due to discontinued business activity. If any such circumstances occur in future our Company may incur losses and this may not be perceived positively by external parties such as customers, bankers, suppliers, etc. which may affect our credibility and business operations. For further information, see the section titled 'Financial Statements' beginning on page 181 of this Prospectus.

5. Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an adverse effect on our business, results of operations and financial condition.

Some of our strategic initiatives in the past have not resulted in the achievement of optimal growth and scale in our business and operations. For instance, our Company had entered into Strategic Alliance and Management Operator (SAMO) Agreement dated October 16, 2012 with Central Warehousing Corporation (CWC) for handling cargo at their CFS Distri Park, near JNPT. Due to container scanning problem and labor agitations, the business was disrupted frequently. Our Company had to pay fixed charges to CWC for using the facility and we were losing money. In April, 2016 we had withdrawn the

SAMO Agreement to stop losses. We booked losses to the tune of Rs. 2461.88 lakhs in the FY 2015-16. Our bank guarantee of Rs. 1557.00 was also encashed by CWC to recover dues. We cannot assure you that we will not sustain similar losses in future. We strive for enhancing shareholders value and work towards that goal, in view of that we will keep options open for strategic alliances. We have another agreement with CWC for Impex Park for handling cargo at this CFS which has been going smoothly.

- 6. *Our Company may not be able to deliver the cargo on timely basis due to which we could become liable to claims by customers, suffer adverse publicity and incur substantial cost as result of deficiency in our service which could adversely affect our results of operations.***

We often do not own or control the transportation assets that deliver our customers cargo and we often do not employ people directly involved in delivering the cargo. We are dependent on independent third parties to provide logistic services this could cause delay in reporting certain events, including recognizing revenue and claims.

Our contracts involve providing services that are vital to the customers' business such as timely delivery of goods to them. Any failure or defect in service could result in a claim against the Company for substantial damages, regardless of our responsibility for such failures.

Further, in certain instances we may also be required to provide performance bank guarantees to our clients and vendors and in case we are not able to perform as desired, the clients may invoke the bank guarantees to claim damages/dues. A successful assertion of one or more large claim(s) against us that exceeds available insurance coverage of our clients or the imposition of a demurrage, could adversely affect our financial condition and results of operations.

- 7. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.***

Our lease agreement for branch office in Kolkatta, Pune, Vadodara, Chennai and Belapur have not been stamped & registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

- 8. *Our freight forwarding business depends upon our network of overseas agents for fulfilment of logistics needs of our customers. Our inability to maintain our relationships with our overseas sales agents or deficiency in the service provided by such agents may adversely affect our revenues and profitability.***

We depend on our network of overseas agents for cargo handling, transportation, warehousing and timely delivery at the destination and load port for export cargo and import cargo respectively. For this purpose, we enter into agency agreements and co-operation agreements in the normal course of business with overseas agents. Any deficiency in the service levels of our overseas agents or termination of any such agency agreement can directly impact our business.

9. We have to update the name of our company in all our statutory approvals and certificates due to the conversion of our company.

All of our statutory approvals and certificates are in the name of Total Transport Systems Private Limited. Since our company was converted into a public limited company pursuant to shareholder's approval on March 23, 2017 vide fresh Certificate of Incorporation dated April 24, 2017. We have to update the name Total Transport Systems Limited on all of the statutory approvals and certificates. We have certain approvals on the address of previous registered office. Also, we are shifting our branch offices located at Kochi, Vadodara and are we in process of changing respective address on the statutory approvals and certificates. We cannot ensure that we will be able to update the said documents on timely manner.

10. Delay and non-filing of certain forms under Companies Act with RoC.

Under the provisions of Companies Act, certain forms are required to be filed within prescribed timelines. In past, our Company has exceeded such timeline for filing the forms and has paid additional fees. Our company fails to comply with the provisions for filing of forms under the provisions of the Companies Act, then the company and every officer of the company who is in default is punishable with fine.

Also Company had not filed certain forms in the past and for these forms it has now filed application for condonation of delay with RoC. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax (“STT”) is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For further details, see the section titled “Statement of Tax Benefits” on page 107 of this Prospectus.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

SUMMARY OF OUR INDUSTRY

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

Overview of Indian Economy

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP and Other Indicators

According to the Economic Survey 2016-17, India's economic growth has been pegged at 6.5% for the current fiscal, down from 7.6% recorded in the last financial year, but is expected to rebound in the range of 6.75-7.5% in 2017-18.

As per the Second Advance Estimate of National Income, 2016-17 released by Ministry of Statistics & Programme Implementation on February 27th, 2017, Annual GDP at constant (2011-12) prices is expected to grow at the rate of 7.1% for financial 2016-17. Annual growth of Gross Value Added (GVA) at constant (2011-12) prices is estimated to be 6.7% in FY2016-17 compared to 7.8% in FY15-16.

The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2011-12) prices 2015-16 is Rs 113.5 trillion (US\$ 1.668 trillion), as against Rs 105.5 trillion (US\$ 1.55 trillion) in 2014-15, registering a growth rate of 7.6%.

Better than expected post demonetisation Indian GDP (at 2011-12 prices) revived to 7.0% in Q3FY17 as compared to 7.4% in the Q2FY17 and 7.1% in Q3FY16. Gross Value Added -GVA at basic prices at constant (2011-12) prices in Q3 FY17 has grown by 6.6% compared to 7.0% in Q3FY16 and by 6.7% compared to Q2FY17.

While our tradition of leadership began with our NVOCC and consolidation services, we’ve evolved into an industry-leading 3PL with a comprehensive portfolio of consolidation and forwarding services. That’s why we endeavor to provide our customers with the highest quality and cost-effective services through constant innovations in the field, enabling us to accomplish successful, long run business relationships. We have a Multi-Modal Transport Operator’s License for servicing our customer’s requirements. We also have a Federal Maritime Commission (FMC) license. We have deliberately not taken a CHA license to avoid conflict of interest with other Custom Clearing Agents.

The services to customers are provided in two ways:

- a) Booking – The customer books his cargo through us but transportation, custom clearance etc provided by his designated CHA or custom Broker. We receive the cargo, consolidate it in container and ship it to destination.

The management of the company is mainly focusing on global networking by offering competitive & quality services and to provide a TOTAL LOGISTIC & CONSOLIDATION FREIGHT SERVICES to all its customers & overseas partners worldwide. The ongoing challenges of the freight & forwarding industry inspire us to innovate and search for new ideas that challenge limits and extend Beyond Brokerage. Our customers, contract carriers, and suppliers are the beneficiaries of this forward-thinking approach, because we believe they deserve nothing but the best from their 3PL.

Major Areas of Operation:

- Sea Freight Forwarding

We as a freight consolidator take full responsibilities of shipment from the point of receipt to the point of destination. Pricing is based on nature of goods, location, type of service and facility given to the customer. However, sector at which the goods are sent plays a very crucial role in deciding the price of the goods. About 60-70% of our business is thru consolidation of cargo.

There has been a fall in the turnover as compared to previous years because of glut in shipping industry and overall shortfall in exports from India last year. The oversupply of vessels in the world container shipping market has heralded severe effects on this industry, forcing big players like Hanjin into bankruptcy in August 2016. Hanjin had been one of our major customer at CWC- Impex Park. The shipping industry as on date has consolidated by way of Mergers, acquisitions and strategic alliances and going forward the business looks normal.

SECTION IV – ABOUT THE COMPANY

OUR INDUSTRY

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

Overview of Indian Economy

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP and Other Indicators

According to the Economic Survey 2016-17, India's economic growth has been pegged at 6.5% for the current fiscal, down from 7.6% recorded in the last financial year, but is expected to rebound in the range of 6.75-7.5% in 2017-18.

As per the Second Advance Estimate of National Income, 2016-17 released by Ministry of Statistics & Programme Implementation on February 27th, 2017, Annual GDP at constant (2011-12) prices is expected to grow at the rate of 7.1% for financial 2016-17. Annual growth of Gross Value Added (GVA) at constant (2011-12) prices is estimated to be 6.7% in FY2016-17 compared to 7.8% in FY15-16.

The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2011-12) prices 2015-16 is Rs 113.5 trillion (US\$ 1.668 trillion), as against Rs 105.5 trillion (US\$ 1.55 trillion) in 2014-15, registering a growth rate of 7.6%.

Better than expected post demonetisation Indian GDP (at 2011-12 prices) revived to 7.0% in Q3FY17 as compared to 7.4% in the Q2FY17 and 7.1% in Q3FY16. Gross Value Added - GVA at basic prices at constant (2011-12) prices in Q3 FY17 has grown by 6.6% compared to 7.0% in Q3FY16 and by 6.7% compared to Q2FY17.

Indian Logistic Industry gaining the traction

Indian logistic segment The Indian logistic sector is primarily categorized into four segments comprising Transportation (rail, road, air, water-ways), warehousing (Container freight stations and Inland Container Depots), freight forwarding and value-added logistics. The transportation contributes maximum (60%) to the whole pie of logistic sector which comprises of various means such as road, rail, air and water. India being emerging country is primarily dependent upon transportation through land, ie, road and rail. The transportation through road and rail together contributes about 56% followed by Warehousing 24.5% comprising industrial and agricultural storage in the entire pie of logistics segment.

During last five years, the Government of India has been taking various initiatives in order to develop road infrastructure. The net road projects awarded by NHAI during FY16 have increased to 4368 km in comparison with 3250 km level of FY12. 24% 10% 5% 36% 19% 5% 1% 60.% Transportation Warehousing Freight forwarding Value added logistic Road Rail Water Air Source: Compiled by CARE NHAI plans to increase both awards and execution of road projects in FY17 by four times over FY16 levels, ie, with target execution of 8000 km (@21.92 km/day) and target awards at 15,000 km. Furthermore, on account of various government initiatives, focus on hybrid annuity as well as EPC contracts and structural changes in the concession agreement

Infrastructure Snapshot

Roads:

- 2nd Largest in world with a total of more than 3.34 mn Km road length
- National Highways/Expressway of 0.10 mn
- 0.15 mn Km of state highways and 4.98 mn Km of major & other district roads

Rail:

- Covers almost all parts of the country with routes covering a total length of 67,312 km

Air:

- 18 international airports 7 custom airports, 78 domestic airports and 26 civil enclaves at Military fields

Sea:

- 6000 km of natural peninsular coastline
- 12 major ports and 187 minor ports.

Government Initiatives

- As per the railway budget for the year 2017-18, the capital plan has been pegged at Rs.1.31 lakh crore. The railway ministry has given emphasis on rapid expansion of freight business to take up freight corridors .
- As a part of reviving the existing ports of the country, the Indian government has developed 10 coastal economic regions which led to improvement in the capacity of all the major ports to 892.92 MMT as on

January 31, 2016 (871.52 MMT as on March 31, 2015). Furthermore, the government is taking up various initiatives such as investing Rs. 70,000 crore under ‘Sagarmala project’ in 12 major ports in the next five years, allowing upto 100% FDI under automatic route for port development projects and providing income tax incentives

- India, although gearing towards logistic friendly on its performance index, has been facing inhibitions that primarily include higher logistic costs and complex tax structure. The implementation of Goods and Service Tax (GST) bill is expected to trim the logistic costs upto 20% from the current levels

Benefits derived from the introduction of Goods & Service Tax (GST)

Goods and service tax is a colligation of multiple taxes levied by both Central (ie, excise duty, countervailing duty and service tax) and state (value-added tax, Octroi and entry tax, luxury tax, etc) governments when an end user purchases goods or services. It means same level of taxation would be charged on a specific product or service across the entire country irrespective of being manufactured and sold in different states. The planned dual GST model (central GST and state GST) proposes to replace around 29 state and federal taxes and tariffs for a single tax at the point of sale. The current combined Centre and State statutory rate works out to be 26.5% (Cenvat of 14%, and VAT of 12.5%), whereas post GST implementation the same is expected to reduce to standard rate of about 18-28% which will be levied on most goods and all services.

Unfavourable modal mix

There is an unfavourable modal mix that is skewed toward roads as a major mode of transportation, along with underutilization of other modes — rail, air, shipping and coastal shipping. Despite being inefficient mode, road transportation has the highest goods traffic share in India, whereas railways being economic mode of goods transport has lost market share in India due to under investments leading to capacity constraints. Air is the quickest possible way but shares just about 1% of the means of logistics. Even though India lags behind its global peers it is increasing its spending in airport infrastructure through various air projects across the country. The freight travel although is more suitable through rail and waterways but due to high tariffs, less flexibility in wagons, uncertain transit times and poor terminal quality in railways and inadequate infrastructure for coastal shipping and inadequate depths at ports in India has led to high reliance on road transport.

The following table illustrates the logistics flow through various means such as Air, Water, Road and Rail in India, China, US and Europe

Higher logistic cost:

India’s outgo on logistic cost/GDP is about 13-14% of value of goods, whereas for other developed/developing economies the average cost stands at 10-11% value of goods as shown in the figure. The key reasons for this is

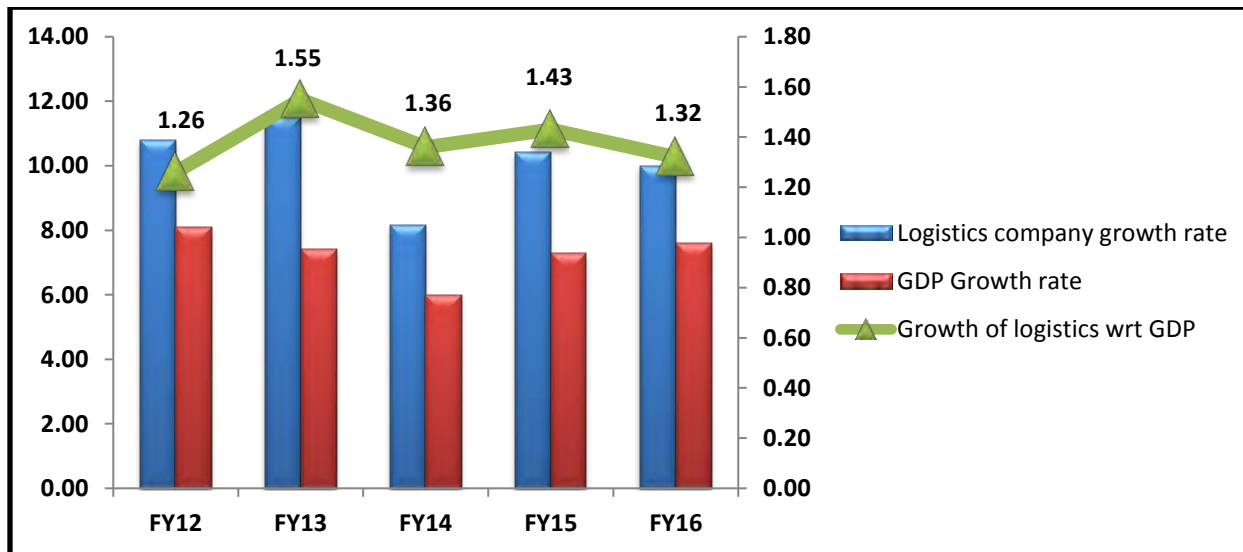

higher transit time due to infrastructural bottlenecks across different modes (Road, Rail, and Water), administrative delays, extra indirect taxes levied for inter-state transport and inefficiencies in the system.

Logistics Cost as a percentage of GDP

Furthermore, with respect to India's GDP growth the logistics industry is expected to grow at 1-1.5x as logistics business is directly correlated with economic activity. Considering the aforementioned aspect the Indian logistic industry is projected to grow at a CAGR of 15-20% during FY16~FY20.

Company Growth vs GDP	FY12	FY13	FY14	FY15	FY16
Logistics Companies Growth Rate	10.80	11.49	8.15	10.41	10.00
GDP Growth Rate	8.10	7.40	6.00	7.30	7.60
Growth of Logistics wrt GDP	1.26	1.55	1.36	1.43	1.32

Current Issues and challenges

India, despite being a low-cost country, has higher logistics cost due to various issues and challenges faced by the industry. Apart from being entangled in complex tax structure the industry is also affected by poor rate of customs efficiency of clearance processes and procedures thus affecting the international export logistics stratum. Furthermore, sub-optimal comfort provided by the existing Indian infrastructure combined with lack of implementation of efficient IT-enabled tracking and tracing mechanisms has affected the performance of logistics. A country's competitiveness is measured by the ease of doing business. India stands at 35th position in the logistics

performance index (LPI) amongst 160 countries around the world, with Germany on top, Singapore, China and United States of America in 5th, 9th, and 10th positions, respectively, as per the World Bank report 2016.

India's logistics performance has seen a rise in all the six key performance indicators used to compute international LPI. The factors which led to growth in improvement of LPI includes increase in infrastructure (especially Road, Railways and Ports) spending along with their successful commissioning, growth in investments and participation of international logistics players in Indian firms which attracted better technology along with rise in international shipments coupled with leveraging the established network of the investor and implementation of effective IT systems used for tracking and tracing the goods.

Outlook:

The long-term outlook of the companies operating in Indian logistics industry is favorable on expectation of implementation of proposed (remove) GST, successful commissioning of the infrastructure projects (especially in road, railways and ports), increase in participation and investment of international logistics players and adoption to global standards of tracking and tracing mechanism. The near-term outlook for the logistics companies is expected to be stable on back of steady growth in consumer durables, FMCG, pharmaceutical, engineering and other industries

There has been a fall in the turnover as compared to previous years because of glut in shipping industry and overall shortfall in exports from India last year. The oversupply of vessels in the world container shipping market has heralded severe effects on this industry, forcing big players like Hanjin into bankruptcy in August 2016. Hanjin had been one of our major customer at CWC- Impex Park. The shipping industry as on date has consolidated by way of Mergers, acquisitions and strategic alliances and going forward the business looks normal.

EMPLOYEES STATE INSURANCE ACT, 1948 (ESI Act)

The promulgation of Employees' State Insurance Act, 1948(ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi-dimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socioeconomic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act, 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

Dividends are recorded when the right to receive payable is established. Interest income is recognized on time proportion basis taking into account the amount outstanding and the rate applicable.

3. Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities on the date of the financial statements and the results of operations during the reporting periods. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from those estimates and revisions, if any, are recognized in the current and future periods.

4. Fixed Assets

Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax after the tax holiday period. Accordingly, MAT is recognized as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will fructify. Deferred tax expenses or benefit is recognized on timing differences being the difference between taxable income and accounting income tax originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

In the event of unabsorbed depreciation and carry forward of losses, deferred tax assets are recognized only to the extent that there is virtual certainty that sufficient future taxable income will be available to release such assets. In other situations, deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available to realize these assets.

Advance taxes and provisions for current income taxes are presented in the balance sheet after offsetting advance taxes paid and income tax provisions arising in the same tax jurisdiction for relevant taxpaying units and where the Company is able to and intends to settle the asset and liability on a net basis.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

8. Borrowing Cost

As per Accounting Standard -16, borrowing cost attributable to the acquisition of fixed assets is capitalized as part of the cost of fixed assets till the date it is put to use. Other borrowing cost is recognized as expenditure in the period in which they are accrued.

9. Impairment of Assets

At each balance sheet date, the management reviews the carrying amounts of its assets included in each case generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset.

Reversal of impairment loss is recognized immediately as income in the statement of profit and loss.

10. Earnings per share

Diluted earnings per equity share are computed by using the weighted average number of equity shares and dilutive potential equity shares outstanding during the period.

Assets and liabilities denominated in foreign currency are converted at the exchange rates prevailing as at the balance sheet date. Exchange differences other than those relating to acquisition of fixed assets are recognized in the statement of profit and loss. Exchange differences relating to purchase of fixed assets are adjusted to the carrying cost of fixed assets

12. Provisions, Contingent liabilities and Contingent assets

A provision is recognized when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Foreign investment is allowed up to 100% under automatic route in our Company.

India's current Foreign Direct Investment ("FDI") Policy issued by the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, GoI ("DIPP") by circular of 2016 with effect from June 07, 2016 ("Circular of 2016"), consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP. The Government usually updates the consolidated circular on FDI Policy once every Year and therefore, this circular of 2016 will be valid until the DIPP issues an updated circular.
