Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. To obtain a complete understanding, you should read this section in conjunction with the chapters titled “Our Business” beginning on page 102, “Our Industry” beginning on page 97 and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 206 respectively, of this Draft Prospectus as well as other financial information contained herein.

The following factors have been considered for determining the materiality of Risk Factors:

- *Some events may not be material at present but may have material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, the financial information of the Company used in this section is derived from our financial statements under Indian GAAP, as restated in this Draft Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

A. INTERNAL RISK FACTORS

I. Business Risks/ Company specific Risk

1. Increase in the cost of, or a shortfall in the availability of our raw materials could have an adverse effect on our business, results of operations and financial condition.

The principal raw materials used by us for manufacturing steel wires and plastic sheets are steel billets and polythelene propylene granules respectively. Though the price of these raw materials have been almost constant which is evident from the cost of materials consumed to revenue ratio of 65.50%, 64.73% and 66.58% of our total revenues for the Fiscal Years 2016-17, 2015-16 & 2014-15, respectively. However, the fluctuation of price in future is not ruled out. The price and availability of these raw materials depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such materials, production and transportation cost, duties and taxes and trade restrictions. We usually do not enter into long term supply contracts with any of our raw material suppliers and typically place orders with them after firm-orders are received by us. The absence of long term contracts at fixed prices exposes us to volatility in the prices of raw materials that we require. If we are unable to compensate for or pass on our increased costs to end-customer, such price increases could have an adverse impact on our result of operations, financial condition and cash flows. We also face a risk that one or more of our existing suppliers may discontinue their supplies to us. Any inability on our part to procure raw materials from alternate suppliers in a timely fashion, or on terms acceptable us, may adversely affect our operations.

2. Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 87 of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 87 of the Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan and order position. We cannot assure that the current business plan will be implemented or order shall be executed in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. However, in accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the Shareholders’ approval through a special resolution. In the event of any such circumstance, where Board of Directors of our Company decides to do any variation in the utilisation of the Net Proceeds, we will follow the provisions of Companies Act, 2013.

3. We have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our working capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of working capital funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds could adversely affect our growth plans. We meet our working capital requirements through our owned funds, internal accruals and debt. Any shortfall in our net owned funds, internal accruals and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 87 of this Draft Prospectus.

4. Any delay or default in payment from our customers could result in the reduction of our profits and affect our cash flows.

Our operations involve extending credit, ranging typically from 60 to 90 days, to our customers in respect of our products. Consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. Accordingly, we had and may continue to have high levels of outstanding receivables. For the the Fiscal Years ended 2016-17, 2015-16 & 2014-15, our trade receivables were Rs. 3079.55 Lakhs, Rs. 2678.51 Lakhs and Rs. 2414.84 Lakhs respectively, which constituted 14.18%, 15.18% and 15.88% respectively of our gross revenues from operations for the same periods respectively as per restated financial statements.

The details of top 5 debtors as on March 31, 2017 are as under:

1	Larsen & Toubro Ltd	487.50
2	Gannon Dunkerley & Co. Ltd	383.03

5. Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Prospectus is based on certain assumptions and has been subjected to rounding off and future production and capacity utilization may vary.

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Prospectus is based on various assumptions and estimates of our management, including proposed size, assumptions relating to availability and quality of raw materials, assumptions relating to operational efficiencies of products manufactured by us. Actual production levels and utilization may differ significantly from the estimated production capacities or historical estimated capacity utilization of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Draft Prospectus. For further information, see the section titled “Our Business” on page 102 of this Draft Prospectus.

6. The products we manufacture deal with induction furnace for heat and tension which may catch fire during the process of manufacture.

The products we manufacture i.e. steel wires deals with the induction furnace for heat and tension which may catch fire during the process of manufacture. Though we have installed firefighting systems in the premises and covered ourselves with Insurance and we take all the care and precautionary measures but we cannot completely rule out every possibility of mishap or accident. Any such accident may result in manufacturing stoppage or other liability on our company.

7. Orders placed by customers may be delayed, modified, cancelled or not fully paid by our customers, which may have an adverse effect on our business, financial condition and results of operations.

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may result in the postponement of the delivery of products or cause its cancellation. Accordingly, it is difficult to predict with certainty that, when, and to what extent we may be able to deliver the orders placed. Further, we may be bound to certain terms in the contracts entered with the customers any non-adherence to the same may lead to breach of the contract, which may subject us to penalties and liquidated damages. Any failure to adhere to the conditions which may be beyond our control may subject us to liquidated damages which could have an effect on the

result of operation and cash flow. However, we have always followed policy of timely delivery of goods, execution of orders and ensuring customer satisfaction.

8. *We face foreign exchange risks, primarily in our import of raw material that could adversely affect our results of operations.*

We import raw materials for steel wires from China and Japan and for plastics from United Arab Emirates and other Middle East countries that are generally priced in foreign currency. Accordingly, any decrease in the value of the Rupee against the foreign currency would increase the Rupee cost of such raw material. Although we closely follow our exposure to foreign currencies and selectively enter into hedging transactions in an attempt to reduce the risks of currency fluctuations, these activities are not always sufficient to protect us against incurring potential losses if currencies fluctuate significantly. However, raw materials are imported only when they are price at lower rate as compared to the domestic market. Any such losses on account of foreign exchange fluctuations may adversely affect our results of operations. Total imports constitutes 35.44% of our total purchases for the year ending March 31, 2017.

9. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained all the requisite permits and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with.

There is no assurance that there are no other statutory/regulatory requirements which we are required to comply with. However, some of the approvals are granted for a fixed period of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with. Any default by our Company in complying with the same, may result in interalia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

For further details, please refer to section titled “Government and Other Statutory Approvals” beginning on page 223 of this Draft Prospectus.

10. *In case of our inability to obtain the statutory and regulatory licenses, permits and approvals in name of ‘D P Wires Limited’ required to operate our business it may have a material adverse effect on our business.*

Failure to obtain the required permits or approvals in name of ‘D P Wires Limited’ in time may result in the interruption of our operations and may have a material adverse effect on our business.

11. *Out industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

Our industry being labour intensive is dependent on labour force for carrying out its manufacturing operations. Shortage of skilled/ unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interest of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and termination of employees and work permits. Although our employees are not currently unionize, it may become difficult for us to maintain flexible labour policies and we may face threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

12. *We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.*

The industry, in which we are operating, is competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from

external resources. If we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

17. If we are unable to raise additional capital, our business prospects could be adversely affected.

We intend to fund our development plans through our internal accruals, borrowings and capital. We will continue to incur significant expenditure in maintaining and growing our existing manufacturing infrastructure. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our internal accruals and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, the inability to obtain sufficient financing could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on favourable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

18. Our indebtedness and the restrictive covenants imposed upon us in certain debt facilities could restrict our ability to conduct our business and grow our operations, which would adversely affect our financial condition and results of operations.

Any failure to comply with the financial or other covenants or obtain the consents necessary to take the actions may affect our business and operations. Further, any failure to service our Company's indebtedness and/or to comply with all of the terms of the said financing documents could have an adverse effect on the operations and/or profitability of our Company. However, we have always maintained financial discipline with Banks and there is no instance of not meeting financial obligations or non-compliance with the terms and condition as on the date of this Draft Prospectus. In such cases, the lender is empowered to require repayment of the facility at any point in time during the tenure. We may not be able to secure fresh funds or have internal accruals to repay those loans. As a result, our cash flow may be affected resulting in working capital constraints. However, since all of them belong to promoters, we do not foresee any such situation. For further details please refer chapter titled "Financial Information" beginning on page 174 of this Draft Prospectus.

20. We have entered into certain transactions with related parties. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.

There can be no assurance that compliance with such environmental laws and regulations will not result in a curtailment of operations, or a material increase in the costs of operations, or otherwise have a material adverse effect on the financial condition and results of our operations. Environmental laws and regulations in India have been increasing in stringency and it is possible that they will become significantly more stringent in the future. Stricter laws and regulations, or stricter interpretation of the existing laws and regulations, may impose new liabilities on us or result in the need for additional investment in pollution control equipment, either of which could adversely affect our business, financial condition or prospects. While as of the date of this Draft Prospectus, we are not subject to any environmental legal proceedings, we may be impleaded in such legal proceedings in the course of our business. Such legal proceedings could divert management time and attention, and consume financial resources in defense or prosecution of such legal proceedings or cause delays in the production, development or commencement of operations of our projects. No assurance can be given that we will be successful in all, or any, of such proceedings.

29. *We do not own the land on which our manufacturing facility and registered office are located.*

We do not own the lands on which our manufacturing facility and registered office are located. We have taken the said lands on long term lease from Government of Madhya Pradesh having lease period between 30 to 99 years which can be renewed thereafter. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter and Promoter Group Members may be invoked and/ or the security may also be enforced, which could negatively impact the reputation and networth of the Promoters. Also, we may face certain impediments in taking decisions in relation to our Company,

which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoter and Promoter Group Members may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. However, we have following policy of complying with all terms and conditions of loan agreements and we ensure timely compliance of its terms. As a result, our Promoters and our Promoter Group will have the ability to control our business, including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company’s best interest. In addition, for so long as our Promoters and the members of our Promoter Group continue to exercise significant control over the Company they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations.

- 41. *Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.***

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

- 42. *Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

B. EXTERNAL RISK FACTORS

- 43. *Natural calamities and force majeure events may have an adverse impact on our business.***

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

- 44. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.***

The Issue Price of the Equity Shares will be determined by our Company in consultation with the LM and will be based on numerous factors. For further information, see the section titled "Basis for Issue Price" on page 92 of this Draft Prospectus. The Issue Price may not be indicative of the market price for the Equity

Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurances that applicants who are allotted Equity Shares through the Issue will be able to resell their Equity Shares at or above the Issue Price.

45. *The Goods and Services Tax (GST) regimes enacted by the Government of India may have material impact on our operations.*

The Government of India has enacted a comprehensive national Goods and Services Tax (GST) regime that will combine taxes and levies by the Central and State Governments into unified rate structure which has become effective from July 01, 2017. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Though the government is taking necessary steps to guide the impact of GST, We are unable to provide the impact of this tax regime on our operations.

46. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax (“STT”) is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For further details, see the section titled “Statement of Tax Benefits” on page 95 of this Draft Prospectus.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October, 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October, 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

47. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of -implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

48. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

49. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

50. *Economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

51. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

52. *Investors may be adversely affected due to retrospective tax law changes made by the GoI affecting us.*

Certain recent changes to the Income Tax Act provide that income arising directly or indirectly through the sale of a capital asset of an offshore company, including shares, will be subject to tax in India, if such shares derive indirectly or directly their value substantially from assets located in India. The term "substantially" has not been defined under the Income Tax Act and therefore, the applicability and implications of these changes are largely unclear. Due to these recent changes, investors may be subject to Indian income taxes on the income arising directly or indirectly through the sale of the Equity Shares. In the past, there have been

instances where changes in the Income Tax Act have been made retrospectively and to that extent, there cannot be an assurance that such retrospective changes will not happen again.

SECTION III- INTRODUCTION

SUMMARY OF OUR INDUSTRY

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

OVERVIEW OF INDIAN ECONOMY

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP AND OTHER INDICATORS

Demonetisation had negative impact on India's growth which slowed down to 7.1% in 2016-17, despite a very good showing by the agricultural sector. India also lost the tag of the fastest growing economy to China in the March quarter with a GDP growth of 6.1%. SECTION IV – ABOUT THE COMPANY

OUR INDUSTRY

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

OVERVIEW OF INDIAN ECONOMY

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP AND OTHER INDICATORS

Demonetisation had negative impact on India's growth which slowed down to 7.1% in 2016-17, despite a very good showing by the agricultural sector. India also lost the tag of the fastest growing economy to China in the March quarter with a GDP growth of 6.1%. The GDP, as per the new series with base year of 2011-12, had expanded by 8% in 2015-16. It was 7.9% as based on the old series.

According to the data released by the Central Statistics Office (CSO), the Gross Value Added (GVA) slipped sharply to 6.6% in 2017 ended March 31, from 7.9% growth in 2015-16. The demonetisation seems to have impacted the GVA in the third as well as fourth quarter of 2016-17 which slipped to 6.7% and 5.6% respectively, from 7.3% and 8.7% in the same quarter of 2015-16.

Almost all sectors, with the exception of agriculture, showed deceleration in the aftermath of demonetisation. While the manufacturing sector output in the fourth quarter slowed to 5.3% versus 12.7% in the same period of last year, the construction sector slipped into the negative territory.

INDEX OF INDUSTRIAL PRODUCTION

The IIP registered a growth of 2.7% in March 2017 over the index of March 2016. The growth of index of manufacturing, mining, and electricity was 1.2%, 9.7% and 6.2% respectively during the month.

Cumulatively, the IIP registered a growth of 5.0% during April to March, 2016 -17 over corresponding period of previous year. The index of Manufacturing, Mining and Electricity sector grew by 4.9%, 5.3% and 5.8% respectively during April to March, 2016 – 17 over corresponding period of previous year.

OVERVIEW OF STEEL AND STEEL WIRE INDUSTRY

India was the third-largest steel producer in the world in 2016 according to data released by World Steel Association. In 2014-15, India surpassed United States of America (USA) to become the third largest steel producer in the world. India continued with this position in 2015-16 as well. The country produced 88.97 million tonnes and 89.79 million tonnes of crude steel during 2014-15 and 2015-16, respectively. Steel production in the world is dominated by China followed by Japan. During 2015-16, crude steel output in China stood at 789.04 million tonnes and that in Japan stood at 104.23 million tonnes.

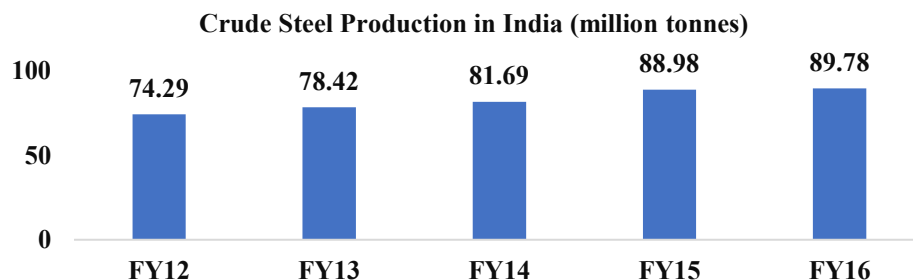

(Source: <https://www.ibef.org/industry/steel-presentation>)

Driven by rising infrastructure development and growing demand for automotive, steel consumption is expected to reach 104 MT by 2017. India's steel production is expected to increase from 100 MTPA to 300 MTPA by 2025. The Government of India has allowed 100 % foreign direct investment (FDI) in the steel sector under the automatic route. Nearly 301 MoUs have been signed with various states for planned capacity of about 486.7 MT. As per the report of the Working Group on Steel for the 12 th Five Year Plan, there exist many factors which carry the potential of raising the per capita steel consumption in the country. These include among others, an estimated infrastructure investment of nearly a trillion dollars, a projected growth of manufacturing from current 8% to 11-12%, increase in urban population to 600 million by 2030 from the current level of 400 million, emergence of the rural market for steel currently consuming around 11 kg per annum buoyed by projects like Bharat Nirman, Pradhan Mantri Gram Sadak Yojana, Rajiv Gandhi Awaas Yojana among others.

(Source: <http://steel.gov.in/overview-steel-sector>)

During 2015-16, among the top six crude steel producers in the world, crude steel production of only India increased on a y-o-y basis. However, it grew marginally by 0.9% to 89.79 million tonnes during the year while it fell for the other five countries in the range of 1.9% -5.1%. Steel production has grown for the period of 2012 to 2016 at CAGR of 4.8%.

(Source: <http://steel.gov.in/overview-steel-sector>)

Scenario in 2016-17

In the financial year 2016-17, production of these top five steel producing countries (excluding India) remained subdued even during April-December 2016 on a y-o-y basis. While crude steel output in China, Japan and Russia grew by mere 0.5%-3%, output in USA remained flat and that in Korea Republic (South) declined by 1.3%. In contrast, crude steel production in India rose by 8.8% to 72.35 million tonnes during this period. This was on account of higher output by the major Indian steel companies. The imposition of Minimum Import Price (MIP) encouraged the producers to increase their output.

Consumption of steel

Consumption of steel, on the other hand, grew by just 3.2% to 73.75 million tonnes during April-December 2016. Post demonetization, steel consumption is expected to remain under pressure in the coming few months to a certain extent. This is because it is likely that the demand for steel from the user industries like construction, real estate will take some time to strengthen. However, government push towards infrastructure will compensate for this reduction in demand.

Demand for steel wire is driven along with infrastructure development

Steel wires are used for various infrastructure projects such as construction of bridge, roads. Infrastructure sector is a key driver for the Indian economy. Infrastructure sector includes power, bridges, dams, roads and urban infrastructure development. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure creates lots of demand for products from non-core industries, like plastic sheets, steel wire, electrical equipment, engineering equipment's and many more.

In the Union Budget 2017-18, the Government of India has increased total infrastructure outlay and defence capital expenditure by 10% and 20.6 per cent to Rs 3,96,135 crore (US\$ 59.18 billion) and Rs 86,488 crore (US\$ 13.1 billion) respectively, over FY17 revised estimate. A total of 6,604 km out of the 15,000 km of target set for national highways in 2016-17 has been constructed by the end of February 2017, according to the Minister of State for Road, Transport & Highways, Government of India.

The Government of India has announced highway projects worth US\$ 93 billion, which include government flagship National Highways Building Project (NHDP) with total investment of US\$ 45 billion over next three years.

These developments in new projects creates huge demand for steel wire and gabion sheets, steel wire nets for preventing rock sliding.

Global plastic market overview and outlook

Global HDPE market is forecast to show growing trend in coming years. HDPE is one of the major polyethylene material consumed globally. The density of HDPE is from 0.93g/cm³ to 0.97g/cm³. The higher density with stronger intermolecular force provides High-Density Polyethylene (HDPE) resins excellent physical properties such as toughness, rigidity & strength. This makes High-Density Polyethylene (HDPE) resins in demand for various application of blow molding, injection molding, film and extruded products. High-Density Polyethylene (HDPE) resins are being widely used in end-use industry such as automotive, construction, consumer goods, packaging, agriculture, pipe industries etc.

According to Markets and Markets, the Global HDPE Market will be worth \$85.19 bn approx. in 2019. It is expected that the industry will show robust CAGR of 10% during the forecast period 2014 – 2019. According to Transparency

Market Research, the Global HDPE Market will be worth \$84.79 bn in 2023 from \$56.13 bn in 2014. The CAGR during this period 4.5%. The highest market worth is in the year 2019 of \$91.32 bn expected by Micro Market Monitor at the CAGR of 7.9%.

Global plastics market was worth USD 381.83 billion in 2013. Plastics are synthetic or semi-synthetic organic solids which are cast or changed to various valuable products. Plastics are generally organic polymers which occur naturally or sometimes, are derivatives of petrochemicals. The global industry is administered by the application of end-use industry.

Forthcoming technologies which recycle plastics are projected to be the major driving force behind the growth of global market. Key manufacturers of plastics are investing into joint ventures and pooling resources with biotechnology companies so as to produce bio-based plastics.

Polyethylene was the largest plastic type which accounted for over 30% of the market in 2013. Growing demand from several end-use sectors including injection molding, food & beverage packaging, film/sheet and pipes led to the high market share. Several disposal norms and environmental regulations are projected to create major hindrances for the global polyethylene market. Polyethylene terephthalate (PET) plastic type is likely to witness significant gains at a CAGR of 8.5% from 2014 to 2020.

Wire Division:

Production Process:

Wire Rod

Wire rod is a rolled alloy or non alloy product, made from high carbon steel billets in a hot rolling process. It is usually from 5.5 mm to 15 mm in diameter. Wire rod is wound into coils and transported in this form, depending on the wire rod manufacturer's process.

Surface Treatment/Pickling

All wire rods must be de-scaled to remove the mill scale present on the steel surface. This descaling process is done chemically. After the mill scale has been removed the wire rod is then coated with a textured carrier coating that promotes lubricant adherence during the subsequent wire drawing process. The most commonly carrier coating is Zinc Phosphate but other coatings are sometimes used borax, lime, etc.

Drawing

The wire is deformation process in which the work piece in form of rod is pulled through a die, the stress applied is tensile. The rod is drawn down in order to reduce its diameter. In general, drawing results in reduction in area of cross section. During the wire drawing, the wire rod is pulled through a series of carbide dies, which gradually decrease in

size. The rod and dies are flooded with a coolant and a lubricant to increase the life of the dies and keep the wire from overheating.

Stranding

The stranding machine pulls the wire off the spool while maintaining a specified rate of wrapping. This rate controls the lay of the strand to comply with IS specification. After the wires have been wound into strand, the strand is subjected to a thermo mechanical process in which the strands are continuously heated and under tension of the minimum ultimate tensile strength of the strand, increase the yield strength and reduce relaxation losses. This combination of factors gives the strand a very consistent modulus of elasticity.

After one mother coil of strand is produced in the stander, the mother coil is rewound into the desired packing size.

Inspection

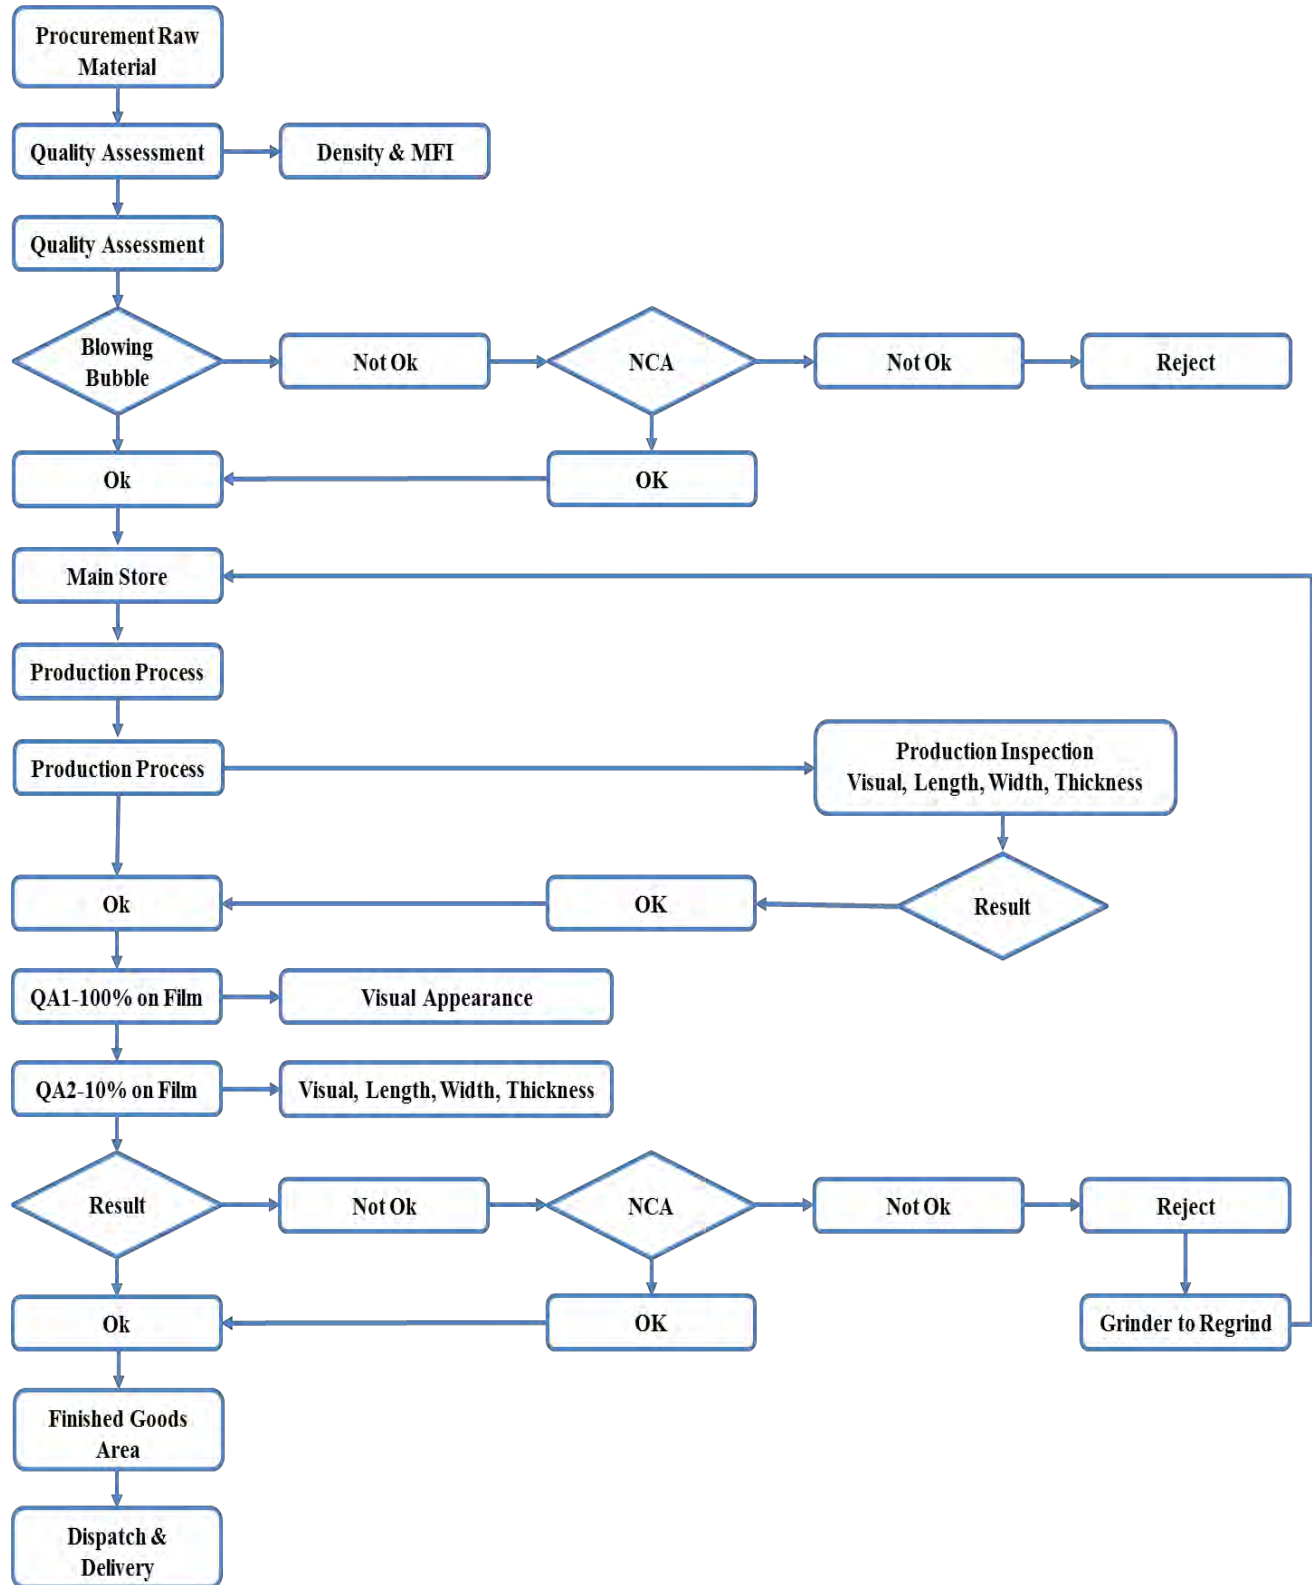

Finish coil is tested for compliance to IS specification and STI. These tested include:

1. lay length
2. Diameter of strand
3. Area of strand
4. Yield point at 1% Extension under load
5. Ultimate tensile strength
6. Total elongation
7. Modulus of elasticity.

Relaxation testing is also performed as per STI and IS specification.

EMPLOYEES STATE INSURANCE ACT, 1948

The promulgation of Employees' State Insurance Act, 1948(ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi-dimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act, 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury,

resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

It also provides for the manner and time period within which a complaint shall be made to the Internal Complaints Committee i.e. a written complaint is to be made within a period of 3 (three) months from the date of the last incident. If the establishment has less than 10 (ten) employees, then the complaints from employees of such establishments as also complaints made against the employer himself shall be received by the Local Complaints Committee. The preparation of financial statements in conformity with GAAP in India requires the management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent liabilities at the date of financial statements, and the reported amount of revenues and expenses during the reporting period. Actual results could differ from these estimates. On an ongoing basis, estimates are evaluated based on historical experience and on various other assumptions that are believed to be reasonable, the results of which forms the basis for making judgments about the carrying value of assets and liabilities. Actual results could

differ from those estimates. Any revision to estimates or difference between the actual result and estimates are recognized in the period in which the results are known/ materialized.

3.2 Fixed Assets

(i) Fixed assets are accounted for on historical cost basis (inclusive of the cost of installation and other incidental costs till commencement of commercial production) net of recoverable taxes, less accumulated depreciation and impairment loss, if any.

(ii) Expenditure on renovation/ modernization relating to existing fixed assets is added to the cost of such assets where it increases its performance/life significantly.

3.3 Depreciation

(i) Depreciation on fixed assets is provided on written down value basis over the useful life of the assets estimated by the management, in the manner prescribed in Schedule II of the Companies Act, 2013.

3.4 Revenue Recognition

(i) All known income and expenditure quantifiable till the date of signing of report are accounted on accrual basis when virtual certainty is established.

(ii) Sales Revenue is recognised when property in the goods with all risk rewards and effective control of goods usually associated with ownership are transferred to buyer.

(iii) Export incentive is recognized on post export basis on the basis of their entitlement rates.

(iv) Interest income is recognised on time proportion basis.

(v) Insurances claims are recognised to the extent the Company is reasonably certain of their ultimate receipt.

(vi) Sales are recorded net of Excise duty, trade discounts, rebates and VAT Tax. Purchases are recorded net of Input credit for taxes that are subsequently eligible for Input Credit / Refund.

3.5 Provisions and contingent liabilities

(i) The Company creates a provision when there is a present obligation arising as result of past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation, at the balances sheet date and are not discounted to its present value.

(ii) A disclosure for a contingent liability is made when there is a present obligation arising as a result of past event that probably will not require an outflow of resources or where a reliable estimate of the obligation cannot be made.

3.6 Inventory Valuation

(i) Inventories are valued at the lower of cost and net realisable value.

(ii) In respect of raw material, packing material and stores & spares, cost is computed on first in first out basis.

(iii) Finished goods and stock-in-process include cost of input conversion and other costs including manufacturing overheads incurred in bringing them to their present location and condition.

(iv) Obsolete, defective and unserviceable stocks are provided for, wherever required.

(v) Excise duty on finished goods manufactured is accounted for on clearance of goods from factory premises.

3.7 Impairment of Assets

The management periodically assesses using, external and internal sources, whether there is an indication that an asset may be impaired. An impaired loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is the higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed, if and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized, the carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss being recognized for the asset in prior year/s.

3.8 Borrowing costs

Borrowing costs attributable to the acquisition and/or construction of qualifying assets are capitalized as a part of the cost of such assets, upto the date when such assets are ready for intended use. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. Other borrowing costs are charged to the Statement of Profit and Loss.

3.9 Foreign Currency Transactions

Foreign currency transactions are recorded at the exchange rate prevailing on the date of transaction. Monetary assets and liabilities in foreign currency existing at balance sheet date are translated at the year end exchange rates. Exchange rate differences arising on settlement of transaction and translation of monetary items are recognized as income or expenses in the year in which they arise. Premium or discount on forward exchange contract is amortised as income or expense over the life of the contract. Exchange difference on such contract is recognized in the Statement of Profit and Loss in the reporting period in which the exchange rate changes. Any profit or loss arising on cancellation or renewal of forward contract is recognized as income or expenditure during the period.

3.12 Taxation

Provision for current taxes is made after taking into consideration benefits admissible under the provisions of Income Tax Act, 1961. Deferred Tax resulting from "timing differences" between taxable and accounting income is accounted for using the tax rates and laws that have been substantially enacted as of the balance sheet date. Deferred tax assets arising from timing differences are recognized to the extent there is reasonable certainty that these would be realized in future.

3.15 Earnings per Share:

Basic earnings per share is calculated by dividing net profit of the year by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

The above should necessarily be read with the 'Statement of Material Adjustments to the Restated Financial Statements' appearing in Annexure – V and 'Notes to the Restated Financial Statements' appearing in Annexure – VI.
