A. INTERNAL RISK FACTORS

I. Business Risks/ Company specific Risk

1. ***Changes in market trends, fashion and consumer preferences that are largely beyond our control could adversely affect our business, financial condition, results of operations.***

Fashion industry is very sensitive to change as per market trend. Factors such as change in trend, fashion and customer preference are generally beyond our control. Any change in the latest fashion can render the old stock obsolete. Some of our products may become less attractive in light of changing consumer preferences or trends, and we may be unable to respond to such changes in a timely manner. Any change in consumer preferences that decreases demand could adversely affect our business, financial condition, results of operations. However, we try to get minimum order quantity manufactured by the factories based on the demand of our denim fabric which makes the risk of our stock rendering obsolete low.

2. ***Our Company's failure to maintain the quality standards of Denim fabric could adversely impact our business, results of operations and financial condition.***

We cannot assure that our products will always be of exactly same quality as required by our customer's quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality or any other unforeseen events could adversely affect our reputation and our operations which may adversely affect our business, result of operations and financial condition. However, we have the process of quality check before the denim fabric is dispatched by factories.

3. ***We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.***

The industry, in which we are operating, is competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing, better quality and fashion trends. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations. However, we have grown over the years and have created a niche market for us which gives us an advantage over our competitors.

4. ***Our Company does not have long term agreements for sale of our products with any customers which may adversely affect our results of operations.***

Our Company does not have long term commitments supply of our products with any customers in domestic market. There is no assurance that our Company will continue to receive requirements from the same customers either on substantially the same terms or at all, which could have an adverse effect on our Company's operations and profitability. However, we have been regularly supplying to our certain big customers for a very long period.

5. ***Our Company does not have long term agreements for purchase of denim fabric from the suppliers and any fluctuation in the prices of the material may adversely affect our results of operations.***

Our Company does not have long term commitments supply of denim fabric with any of our suppliers. There is no assurance that our Company will continue to receive the required product from the suppliers either on substantially the same terms or at all, which could have an adverse effect on our Company's operations and profitability. Further, fluctuations in the prices of these materials are not in our control. Increase in prices shall lead to increase in the price of our product. This would have an adverse impact on

our business, financial conditions and results of operations. However, our long term relations with suppliers help us in addressing the situations well in time.

6. Our Company runs a risk of cash handling.

Our Company has sales counter at its Registered Office, where our products are being sold in cash. At any time, humans handle cash, there is an inherent risk of loss/mismanagement. Such loss/mismanagement can be simply due to human error where cash balance at the end does not match. Other losses can be attributed to theft, both from internal sources (employee theft) and external sources (robberies). Transporting cash to a bank also imposes a risk to those assigned to such task. Our Company had a cash balance of Rs. 116.64 as on June 30, 2017, which was subsequently deposited in Bank. Further our Company do not have insurance policy to cover any losses on account of theft or embezzlement. This may lead to stoppage of operations or losses in case of such occurrence. However, in post GST era our cash handling has become minimum and majority of our debtors are paying us by banking channels.

7. Our Company had deposited cash during demonetization period.

Our Company had deposited cash in bank accounts during demonetization from November 08, 2016 to December 30, 2016 aggregating to Rs. 193.95 Lakhs. Our Company had received notice from the Income Tax department regarding the same and our Company had already filed reply on the compliance window of Income Tax Department. 12. We constantly face a credit risk which may in turn affect our complete buying cycle adversely.

As a textile trading Company, our primary competence is the ability to procure and market our textile products to various customers, and hence exploit the benefits of bulk purchase and credit shortage in the textile trade. Our requirement of working capital is high mainly due to our ability to procure and store sufficient amounts of denim fabric. Comparison of our Debtors turnover period with our Creditors turnover period leads to a considerable working capital gap.

Our aforementioned buying cycle is heavily dependent on timely payments being received from our customers. If there is a default in payment from any of our customers or there is any unforeseeable delay in payment, our working capital cycle will be adversely affected, which consequently, leads an adverse effect on our business operations and profitability.

13. Our Company has limited geographical reach for sale of our products.

Our Company has limited geographical reach for sale of our products. Our failure to capture new markets may have an adverse impact on our business and financial performance. There can be no assurance that we can effectively capture market at new locations and any such failure may have a material adverse effect on our business, financial condition and results of operations. However, we have been capturing new customers over a period of time.

14. Our Company had issued equity shares upon conversion of loan.

* No. of Shares are as per post-split shareholding having face value of Rs. 10/- (Rupees Ten Only) each.

15. The rate of interest for the loans obtained by us from the bank is variable and any increase in interest rates may adversely affect our results of operations and financial condition.

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. As such, any increase in interest rates may have an adverse

effect on our business, results of operations, cash flows and financial condition. However, with the inflation at ease, we do not expect any upward trend in the interest rate in short to medium term.

16. We rely significantly on our Direct Marketing Network for sale of our products. Also, we do not have any formal agreement with our customers.

We sell our products through our direct marketing network. We sell our products in Mumbai, and Ulhasnagar Districts. As on date, we do not have any formal agreement with our customers. In the absence of any formal agreement with them, these clients may stop purchasing our products which may adversely affect our operations. Furthermore, our business growth depends on our ability to attract additional customers and widen our network. While we believe, that we have good relations with our customers but there is no assurance that our customers will continue to do business with us or that we can continue to attract additional customers. If we do not succeed in maintaining the stability of our customer network, our market share may decline, materially affecting our results of operations and financial condition. However, we have been constantly adding more customers which is evident from our growth in sales.

17. Our Company had negative cash flows from our Operating activities, investing activities and financing activities in some of the previous year(s) as per the Restated Standalone Financial Statements and the same are summarized as under:

Our Company had negative cash flows from our operating activities, investing activities and financing activities in some of the previous year(s) as per the Restated Standalone Financial Statements and the same are summarized as under:

(Rs. In Lakhs)					
Particulars	As on June 30, 2017	As on March 31, 2017	As on March 31, 2016	As on March 31, 2015	As on March 31, 2014
Cash Flow from/ (used in) Operating Activities	146.12	(37.90)	(358.97)	(30.54)	(8.86)

Cash Flow from/ (used in) Financing Activities	(29.56)	78.19	359.14	32.80	31.88

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

18. Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 85 of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.

The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 85 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency.

19. Any variation in the utilization of the Net Proceeds or in the terms of any contract as disclosed in the Draft Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.

We propose to utilise the Net Proceeds as stated under section titled "Objects of the Issue". For further details of the proposed objects of the Issue, please refer to section titled "Objects of the Issue" beginning on page 85 of this Draft Prospectus. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in this Draft Prospectus without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in this Draft Prospectus, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, or varying the terms of contract, which may adversely affect our business and results of operations.

20. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

21. Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline.

Our revenue and profitability have grown in certain years and are likely to vary significantly in the future from period to period. Therefore, we believe that period to period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as an indication of our future performance. It is possible that in future our results of operations may be below market expectations, which could cause the share price of our equity shares to decline significantly.

22. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained all the requisite permits and licenses which are adequate to run our business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with.

Some of the approvals are granted for a fixed period of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with. Any default by our Company in complying with the same, may result in interalia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

Further, we are also in process of availing approvals like PAN, GST and other statutory approvals in name of Mittal Life Style Limited pursuant to conversion of our Company into public limited. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to obtain the required permits or approvals in name of 'Mittal Life Style Limited' in time may result in the interruption of our operations and may have a material adverse effect on our business.

We have regular system of checking for any regulatory license being expiring & to apply for renewal within stipulated time. For further details, please refer to section titled "Government and Other Statutory Approvals" beginning on page 191 of this Draft Prospectus.

23. *The Promoter Group of our Company does not include certain relatives of Mr. Brijeshkumar Jagdishkumar Mittal and Mr. Pratik Brijeshkumar Mittal or any entity in which they may have an interest.*

24. *We may decide not to proceed with the Issue at any time before Allotment. If we decide not to proceed with the Issue after the Issue Opening Date but before Allotment, the refund of Application amounts deposited will be subject to us complying with our obligations under applicable laws.*

We, in consultation with the Lead Manager, reserve the right not to proceed with the Issue at any time before the Allotment. If we withdraw the Issue after the Issue Opening Date, we will be required to refund all Application amounts deposited within the time prescribed of the Issue Closing Date. We shall be required to pay interest / penalty, as specified under SEBI (ICDR) or Companies Act, 2013, on the Application amounts received if refund orders are not dispatched within the stipulated time from the Issue Closing Date. Notwithstanding the foregoing, the Issue is also subject to obtaining the approvals of the Stock Exchange.

These proceedings are pending at different levels of adjudication before various courts, tribunals, authorities, enquiry officers and appellate tribunals. The brief details of such outstanding litigation are as follows:

LITIGATION RELATING TO THE COMPANY

We cannot assure you that these legal proceedings will be decided in favour of our Company, our Subsidiaries, our Promoters, our Directors and our Group Entities, as the case may be, or that no further liability will arise out of these proceedings. Further, such legal proceedings could divert management time and attention and consume financial resources. Any adverse outcome in any of these proceedings may adversely affect our profitability and reputation and may have an adverse effect on our results of operations and financial condition.

26. *The registered office of our Company is not owned by us. In the event, we are unable to renew the lease/rent agreements, or if such agreements are terminated, we may suffer a disruption in our operations.*

The registered office of our Company is taken on leases for fixed tenure. These leases are renewable on mutually agreed terms. Upon termination of the leases, we are required to return the said business premises to the Lessor/Licensor, unless renewed. There can be no assurance that the term of the agreements will be renewed and in the event the Lessor/Licensor terminates or does not renew the agreements on commercially acceptable terms, or at all, and we are required to vacate our offices, we may be required to identify alternative premises and enter into fresh lease or leave and license agreement. We may have to find new premises which may lead to higher costs. However, since the registered office premises are owned by our promoter/promoter group, we do not foresee any problem in renewal.

For details on properties taken on lease/rent by us please refer to the heading titled “Property” in chapter titled “Our Business” beginning on page 100 of this Draft Prospectus.

27. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.*

Our lease agreements for registered office have not been stamped & registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate

stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

28. *Our indebtedness and the restrictive covenants imposed upon us in certain debt facilities could restrict our ability to conduct our business and grow our operations, which would adversely affect our financial condition and results of operations.*

As on November 30, 2017 we had aggregate outstanding fund based and non-fund based limits of Rs. 440 Lakhs from Bank of Maharashtra. The agreements governing our existing indebtedness contain restrictions and limitations, such as restriction on withdrawal of profits/ capital without prior approval of bank and retention of entire profits in the business, change in capital structure, etc. There can be no assurance that our Company has, and will, at all times comply with all of the terms of the said financing documents. Any failure to comply with the financial or other covenants or obtain the consents necessary to take the actions may affect our business and operations. Further, any failure to service our Company's indebtedness and/or to comply with all of the terms of the said financing documents could have an adverse effect on the operations and/or profitability of our Company. However, we have always maintained financial discipline with Banks and there is no instance of not meeting financial obligations or non-compliance with the terms and condition as on the date of this Draft Prospectus. For further details on restrictive covenants, please refer to the chapter titled "Our History and Certain Other Corporate Matters" beginning on page 114 of this Draft Prospectus.

Our Promoters and Promoter Group Members have provided personal guarantees as security to secure our existing borrowings of Rs. 440 Lakhs taken from Bank of Maharashtra and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoters and Promoter Group Members may be invoked and/ or the security may also be enforced, which could negatively impact the reputation and net worth of the Promoters. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoters and Promoter Group Members may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. However, we have following policy of complying with all terms and conditions of loan agreements and we ensure timely compliance of its terms. For further details regarding loans availed by our Company, please refer "Statement of Financial Indebtedness" under chapter "Financial Statement" beginning on page 147 of this Draft Prospectus.

We shall be repaying Rs. 291.14 Lakhs out of these outstanding unsecured loans. In balance cases, the lender is empowered to require repayment of the facility at any point in time during the tenure. We may not be able to secure fresh funds or have internal accruals to repay those loans. Further, our Company is required to maintain the unsecured loan pursuant to the requirements of Sanction Letter dated November 14, 2017 of Bank of Maharashtra. If we

are unable to maintain required unsecured loan, the Bank of Maharashtra may revoke our cash credit facilities. As a result, cash flow may be affected resulting in working capital constraints. Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

33. *Our success depends largely upon the services of our Management and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain key managerial personnel may adversely affect the operations of our Company.*

Our Company and our Promoters have built relations with suppliers, clients and other persons who are connected with our business. Further, our Key Managerial Personal also possesses the requisite domain knowledge to provide efficient services to our clients. Accordingly, our Company’s performance is dependent upon the services of our Promoters and other Key Managerial Personnel. Our future performance will, therefore, depend upon the continued services of these persons. Demand for key managerial personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.

34. *One of our Key Management Personnel are associated with the Company less than one year.*

One of our Key Management Personnel i.e. Company Secretary is associated with the Company for a period of less than one year. For details of Key Management Personnel and their appointment, please refer to chapter “Our Management” beginning on page 121 of this Draft Prospectus.

35. ***We have not registered our trademark / logo nor have we made any application to register the same. If we are unable to protect our trademark and trade-names, others may be able to use our trademark and trade-names to compete more effectively.***

We have neither obtained trademark registrations for our logo nor have we applied to register our logo. We cannot assure you that we will be able to obtain such registrations in a timely manner, in case we determine to apply in the later course of time. As a result, we may be unable to prevent use of these logo/trademark or variations thereof by any other party or ensure that we will continue to have a right to use it. We have taken insurance which may not be adequate enough for covering the entire future unforeseen liabilities that might occur in the normal course of business. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time by the insurers. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected. For further details on insurance arrangements, see the section titled “*Our Business*” on page 100 of this Draft Prospectus.

37. ***Our Promoters and the members of our Promoters Group will continue to retain significant control in the Company after the Issue, which will enable them to influence the outcome of matters submitted to shareholders for approval. Our Promoters and the members of our Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.***

As on the date of this Draft Prospectus, our Promoters and the members of our Promoter Group hold 100% equity share capital of the Company. After completion of the Issue, our Promoters and the members of our Promoter Group will hold 70.21% of the equity shares capital of the Company and continue to retain a significant control of the Company. As a result, our Promoters and our Promoter Group will have the ability to control our business, including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company’s best interest. In addition, for so long as our Promoters and the members of our Promoter Group continue to exercise significant control over the Company they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. Our Promoters and the members of our Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

38. *The Goods and Services Tax (GST) regimes enacted by the Government of India may have material impact on our operations.*

The Government of India has enacted a comprehensive national Goods and Services Tax (GST) regime that will combine taxes and levies by the Central and State Governments into unified rate structure which has become effective from July 01, 2017. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Though the government is taking necessary steps to guide the impact of GST, We are unable to provide the impact of this tax regime on our operations.

II. *Risk related to this Issue and our Equity Shares*

39. *Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.*

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

40. *Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

B. EXTERNAL RISK FACTORS

41. *Natural calamities and force majeure events may have an adverse impact on our business.*

Natural disasters may cause significant interruption to our operations, and damage to the environment that could have a material adverse impact on us. The extent and severity of these natural disasters determines their impact on the Indian economy. Prolonged spells of deficient or abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy, which could adversely affect our business and results of operations.

42. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares will be determined by our Company in consultation with the LM and will be based on numerous factors. For further information, see the section titled "*Basis for Issue Price*" on page 89 of this Draft Prospectus. The Issue Price may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurances that applicants who are allotted Equity Shares through the Issue will be able to resell their Equity Shares at or above the Issue Price.

43. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax ("STT") is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more

than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For further details, see the section titled "Statement of Tax Benefits" on page 91 of this Draft Prospectus.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October, 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October, 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

- 44. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards ("IFRS"). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.***

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the "IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

- 45. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.***

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

- 46. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency

and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

47. Economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

48. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

49. Investors may be adversely affected due to retrospective tax law changes made by the GoI affecting us.

Certain recent changes to the Income Tax Act provide that income arising directly or indirectly through the sale of a capital asset of an offshore company, including shares, will be subject to tax in India, if such shares derive indirectly or directly their value substantially from assets located in India. The term "substantially" has not been defined under the Income Tax Act and therefore, the applicability and implications of these changes are largely unclear. Due to these recent changes, investors may be subject to Indian income taxes on the income arising directly or indirectly through the sale of the Equity Shares. In the past, there have been instances where changes in the Income Tax Act have been made retrospectively and to that extent, there cannot be an assurance that such retrospective changes will not happen again.

SECTION III - INTRODUCTION

SUMMARY OF OUR INDUSTRY

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed, and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

OVERVIEW OF INDIAN ECONOMY

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP AND OTHER INDICATORS

Demonetization had negative impact on India's growth which slowed down to 7.1% in 2016-17, despite a very good showing by the agricultural sector. India also lost the tag of the fastest growing economy to China in the March quarter with a GDP growth of 6.1%. The GDP, as per the new series with base year of 2011-12, had expanded by 8% in 2015-16. It was 7.9% as based on the old series.

According to the data released by the Central Statistics Office (CSO), the Gross Value Added (GVA) slipped sharply to 6.6% in 2017 ended March 31, from 7.9% growth in 2015-16. The demonetization seems to have impacted the GVA in the third as well as fourth quarter of 2016-17 which slipped to 6.7% and 5.6% respectively, from 7.3% and 8.7% in the same quarter of 2015-16.

Almost all sectors, with the exception of agriculture, showed deceleration in the aftermath of demonetization. While the manufacturing sector output in the fourth quarter slowed to 5.3% versus 12.7% in the same period of last year, the construction sector slipped into the negative territory.

India's GDP (Gross Domestic Product) growth has recovered to 6.3% in the second quarter from a three-year low of 5.7% in first quarter, said the Ministry of Statistics and Programme Implementation (MOSPI).

The GDP at constant (2011-12) prices in Q2 of 2017-18 is estimated at Rs 31.66 lakh crore, as against Rs 29.79 lakh crore in Q2 of 2016-17, showing a growth rate of 6.3%. Quarterly GVA (Gross Value Added) at basic price

at constant (2011-12) prices for Q2 of 2017-18 is estimated at Rs 29.18 lakh crore, as against Rs 27.51 lakh crore in Q2 of 2016-17, showing a growth rate of 6.1% over the corresponding quarter of previous year.

Index of Industrial Production

Output, as measured by the Index of Industrial Production (IIP), rose 3.8% in September, compared with an upward revised 4.5% in August, data released by the government showed. The preliminary estimate for August industrial growth was 4.3%.

Mining output climbed 7.9%, electricity generation rose 3.4% and manufacturing increased 3.4% in September. For the April-September period, the index was up 2.5% compared with 5.8% in the first half of 2016-17. Capital goods production rose 7.4%, suggesting some traction in investment activity, while output of consumer non-durables increased 10%, indicating better rural demand. Production of consumer durable goods contracted 4.8% as against growth of 10.3% last year. reported 0.5% growth.

OVERVIEW OF INDIAN TEXTILE AND APPAREL INDUSTRY

Introduction:

Textile sector is one of the largest contributors to India's exports with approximately 15% of total exports. The textiles industry is also labour intensive and is one of the largest employers. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale. The textile industry employs about 51 million people directly and 68 million people indirectly. India's overall textile exports during FY 2015-16 stood at US\$ 40 billion.

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

The textile and apparel industry can be broadly divided into two segments - yarn and fibre, and processed fabrics and apparel. India accounts for ~14% of the world's production of textile fibres and yarns (largest producer of jute, second largest producer of silk and cotton, and third largest in cellulosic fibre). India has the highest loom capacity (including hand looms) with 63% of the world's market share. The domestic textile industry in India is estimated to reach US\$ 250 billion by 2019 from US\$ 150 billion in July 2017. Increased penetration of organised retail, favourable demographics, and rising income levels are likely to drive demand for textiles. India is the world's second largest exporter of textiles and clothing.

Textile and apparel exports from India are expected to increase to US\$ 82 billion by 2021. Readymade garments remain the largest contributor to total textile and apparel exports from India, contributing 47.69% to total textile and apparel exports. Yarn and made-ups were the other major contributors with shares of 14.36% and 12.89%, respectively. Rising government focus and favourable policies is leading to growth in the textiles and clothing industry. The Ministry of Textiles is encouraging investments through increasing focus on schemes such as Technology Up-gradation Fund Scheme (TUFS). To promote apparel exports, 12 locations have been approved by the government to set up apparel parks for exports. As per the 12th Five Year Plan, the Government plans to provide a budgetary support of US\$ 4.25 billion to textiles. Free trade with ASEAN countries and proposed agreement with European Union will also help boost exports.

The government has extended the duty drawback facility on all textile products and increased rates in some cases for one year to boost exports in the sector. The government is also planning to conduct roadshows to promote the country's textiles in non-traditional markets like South America, Russia and select countries in West Asia.

SUMMARY OF OUR BUSINESS

5. Execution of the order at the quoted price and quantity must be guaranteed by the Market Maker(s), for the quotes given by him.

SECTION IV- ABOUT THE COMPANY

OUR INDUSTRY

The information in this section includes extracts from publicly available information, data and statistics and has been derived from various government publications and other industry sources. Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

OVERVIEW OF INDIAN ECONOMY

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly less than half of the work force is in agriculture, but services are the major source of economic growth, accounting for nearly two-thirds of India's output but employing less than one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services, business outsourcing services, and software workers.

Thus, the country is attracting many global majors for strategic investments owing to the presence of vast range of industries, investment avenues and a supportive government. Huge population, mostly comprising the youth, is a strong driver for demand and an ample source of manpower.

With 1.33 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

GDP AND OTHER INDICATORS

Demonetization had negative impact on India's growth which slowed down to 7.1% in 2016-17, despite a very good showing by the agricultural sector. India also lost the tag of the fastest growing economy to China in the March quarter with a GDP growth of 6.1%. The GDP, as per the new series with base year of 2011-12, had expanded by 8% in 2015-16. It was 7.9% as based on the old series.

According to the data released by the Central Statistics Office (CSO), the Gross Value Added (GVA) slipped sharply to 6.6% in 2017 ended March 31, from 7.9% growth in 2015-16. The demonetization seems to have impacted the GVA in the third as well as fourth quarter of 2016-17 which slipped to 6.7% and 5.6% respectively, from 7.3% and 8.7% in the same quarter of 2015-16.

Almost all sectors, with the exception of agriculture, showed deceleration in the aftermath of demonetization. While the manufacturing sector output in the fourth quarter slowed to 5.3% versus 12.7% in the same period of last year, the construction sector slipped into the negative territory.

India's GDP (Gross Domestic Product) growth has recovered to 6.3% in the second quarter from a three-year low of 5.7% in first quarter, said the Ministry of Statistics and Programme Implementation (MOSPI).

The GDP at constant (2011-12) prices in Q2 of 2017-18 is estimated at Rs 31.66 lakh crore, as against Rs 29.79 lakh crore in Q2 of 2016-17, showing a growth rate of 6.3%. Quarterly GVA (Gross Value Added) at basic price

at constant (2011-12) prices for Q2 of 2017-18 is estimated at Rs 29.18 lakh crore, as against Rs 27.51 lakh crore in Q2 of 2016-17, showing a growth rate of 6.1% over the corresponding quarter of previous year.

Index of Industrial Production

OVERVIEW OF INDIAN TEXTILE AND APPAREL INDUSTRY

Introduction:

Textile sector is one of the largest contributors to India's exports with approximately 15% of total exports. The textiles industry is also labour intensive and is one of the largest employers. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale. The textile industry employs about 51 million people directly and 68 million people indirectly. India's overall textile exports during FY 2015-16 stood at US\$ 40 billion.

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other

countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

The textile and apparel industry can be broadly divided into two segments - yarn and fibre, and processed fabrics and apparel. India accounts for ~14% of the world's production of textile fibres and yarns (largest producer of jute, second largest producer of silk and cotton, and third largest in cellulosic fibre). India has the highest loom capacity (including hand looms) with 63% of the world's market share. The domestic textile industry in India is estimated to reach US\$ 250 billion by 2019 from US\$ 150 billion in July 2017. Increased penetration of organised retail, favourable demographics, and rising income levels are likely to drive demand for textiles. India is the world's second largest exporter of textiles and clothing.

Textile and apparel exports from India are expected to increase to US\$ 82 billion by 2021. Readymade garments remain the largest contributor to total textile and apparel exports from India, contributing 47.69% to total textile and apparel exports. Yarn and made-ups were the other major contributors with shares of 14.36% and 12.89%, respectively. Rising government focus and favourable policies is leading to growth in the textiles and clothing industry. The Ministry of Textiles is encouraging investments through increasing focus on schemes such as Technology Up-gradation Fund Scheme (TUFS). To promote apparel exports, 12 locations have been approved by the government to set up apparel parks for exports. As per the 12th Five Year Plan, the Government plans to provide a budgetary support of US\$ 4.25 billion to textiles. Free trade with ASEAN countries and proposed agreement with European Union will also help boost exports.

The government has extended the duty drawback facility on all textile products and increased rates in some cases for one year to boost exports in the sector. The government is also planning to conduct roadshows to promote the country's textiles in non-traditional markets like South America, Russia and select countries in West Asia.

Market Size:

The Indian textiles industry, currently estimated at around US\$ 120 billion, is expected to reach US\$ 230 billion by 2020. The Indian Textile Industry contributes approximately 4% to India's Gross Domestic Product (GDP), and 14% to overall Index of Industrial Production (IIP).

Indian khadi products sales increased by 33% year-on-year to Rs 2,005 crore (US\$ 311.31 million) in 2016-17 and is expected to exceed Rs 5,000 crore (US\$ 776.33 million) sales target for 2018-19, as per the Khadi and Village Industries Commission (KVIC).

INDIAN DENIM MARKET

An Overview:

India is a big market with a lot of untapped potential for the denim industry despite the fact that the industry has been growing robustly over the past few years. For a majority of the Indian youth, denim is not just a casual wear, but more of a fashion statement. Almost 85% of the market is dominated by men, with 10% contribution from the female segment and the kids segment contributing about 5% of the market. Denim is now considered a staple product not only in the major metropolitan cities of India, but also in the Tier II and III cities. There is increasing acceptability of denim amongst all strata of the Indian society. However, the top 10 towns that account for less than 10% of Indian population account for almost 50% of domestic denim consumption. With almost 35% of sales from the organised sector and 40% from the branded segment, the denim trend is expected to penetrate the market further and register significant growth in the near future. In line with international trends, the share of premium and luxury products is expected to register the highest growth on a relatively smaller base confirming the hypotheses of increasing disposal income and fashion quotient of the youthful Indian population.

Denim Market Size and Growth:

The Indian fashion retail market is continuously evolving and is expected to perform at a high Compound Annual Growth Rate (CAGR) of 9.7% to reach US \$115.14 billion by 2026, up from the current market size of US \$45.71 billion. Domestic fashion retail has been demonstrating high receptivity towards corporatisation. The Government's efforts to boost cashless transactions and reform indirect taxation with a nationwide unified tax structure, Goods and Services Tax (GST) are also expected to accelerate corporatized retail. At the same time, the Indian apparel market is also witnessing a growing inclination towards western and casual wear. Denim is among the highest growth categories in the Indian apparel market.

The market size of Indian Denim Wear was estimated to be Rs 20,205 crore in 2016. The market is now projected to grow at a CAGR of 14.5% and reach Rs 39,651 crore by 2021, and Rs 77,999 crore market by 2026.

Men's Denim: Men's denim enjoy the largest share and are poised to grow at a high CAGR of 14% over the next decade. Until a few years ago, denim was popular with men in the urban cities only, however, it has now gradually become popular in the semi-urban and rural markets also. Growing awareness and an increasing affinity for global fashion have led to this development. Denim is considered the most versatile fabric for men with multiple applications over casual wear, work wear and everyday wear.

Women's Denim: Among Indian women, jeans or denim trousers are the most popular articles. Women across different age brackets and spanning all shapes and sizes like to wear denim as it are comfortable, functional and durable. Denim is also gaining popularity in at leisure form among women owing to the comfort provided by stretch denims. Women who are not at ease with western wear have taken up wearing jeans by pairing them with Indian ethnic wear like kurtis. This mix and match style is gradually picking up, particularly among women in small towns and those who come from a traditional background and is likely to further fuel the growth of the segment. The fashion and fit element which is an inherently necessity in women's apparel has been taken care of through the introduction of flexible/ stretch fabric for different applications. This segment is expected to grow the fastest at the CAGR of 17.5%.

Kid's Denim: This is the smallest segment in the domestic market, but is expected to grow at a high rate primarily due to the availability of the products led by the innovations in the industry for natural, hygienic and flexible fabrics. However, the retail segment in the section has its own challenges since the larger market is dominated by unorganized sector due to pricing point disadvantages applicable to organized retailers. With parents and children becoming more conscious about kids fashion and trends, the kids wear segment in India is garnering a lot of attention of late. The advent of e-commerce in the apparel segment has resulted in the easier availability of products, though the pricing of products remains a challenge. The increase in purchasing power of the parents is expected to take care of this issue and propel the growth of the segment further.

INCREASING DENIM AFFINITY

The denim segment has always been one of the leading segments in the apparel industry. The blue denim has remained a wardrobe essential for decades. Due to its increasing popularity in India, denim wear is now also witnessing huge demand among masses. There are certain key attributes which are making the future of denim wear industry promising:

- 1. Durability:** This is one of the major reasons which make it popular among masses. Denim wear is considered durable as it is made up of a sturdy cotton twill textile. It is woven in a manner that it can be effortlessly worn in any condition.
- 2. Comfort:** Conventionally, denim was made from 100% cotton, but modern interventions have made varieties of denim available in the market. Today, denim blended with polyester is also popular as it manages shrinkage and crease. Stretchable jeans are also popular among masses as they provide comfort and a better fit.
- 3. Versatility and Convenience:** Denim apparel are considered low maintenance, ready to wear clothes, which is another reason for their increasing acceptance. In addition, denim wear is available in different designs, stretch and colours which make it a preferable choice among consumers. Denim is finding ways into other components of the wardrobe in the form of dresses, joggers' pants, jeggings, light weight denim shirts, denim shorts, accessories out of denim fabrics etc.
- 4. Availability:** Denim wear is now much more easily available in the market, deeper across the country and across different market segments and varied price points as well. Thus, bringing it within the reach of different income groups.

PRICE SEGMENTATION

The denim market can also be segmented based on its 'premiumness'. There are therefore several clusters that cater to different targeted price points. The super-premium, premium, and mid-market segments together made up only 8% of the total Indian denim market in the year 2016. The overall growth during the year mainly came from an increase in the 'value' of sales, which in turn was driven by consumers having higher disposable incomes. On the other side however, brands in the mass market and unbranded segments made up for a staggering 92% of the total denim market in 2016. The key factors responsible for the growth for this part of the market was the huge 'volume' of sales coming from the increasing penetration of these brands into Tier -II and -III cities and the rising aspirations of consumers from smaller cities to follow the latest trends like their peers from metros.

KEY TRENDS AND GROWTH DRIVERS

The Indian Denim wear market is currently dominated by unorganized players. However, with many private labels and international brands entering Indian apparel market, the inclination towards branded denims is increasing among consumers.

The future value growth within the denim category shall be because of the increased demand for enhanced product attributes: fashion, quotient, stretch and light weight fabric, varying colors, styling and detailing. This trend is emerging across both men's and women's segments. The above factors shall combine to drive relatively higher levels of growth of the mid-premium and premium/ luxury segments as well. Recent trends have indicated increased penetration of denim category across semi-urban and rural centers which shall drive volume growth across mass market and unbranded segments.

Certain factors which are contributing as key growth drivers of denim wear in the country are enumerated below:

- 1. Youth as a growth driver:** Youth (15 to 29 years old) who comprise 26% of the consuming population, are a key growth driver of denim wear in the country. Increasing disposable income, comfort, quality and brand consciousness are major reasons behind increasing acceptance of denims among this young population.
- 2. Growth of the organised retail sector:** The denim wear market is dominated by unbranded denim products who constitute 60% of the market and thus tend to give intense competition to branded denim players. However, with many private labels and international brands entering the Indian apparel market, the inclination towards branded denim wear is increasing in consumers.
- 3. Online penetration of denim:** Increased penetration of Internet coupled with burgeoning smart phone market has resulted in the growth of e-tailing in India. Due to ease of ordering online, paucity of time, flexible return policies and the cash on delivery, the youth of India is more likely to purchase denims online.
- 4. Increased rural spending:** Rural areas are developing at a rapid pace and so is their purchasing power. With the percolation of mass media, people in rural areas are also aware of fashion trends. Their inclination towards western wear is another reason for the growing demand of denims in rural areas. The mid-value segment of denim wear, characterized by quality, value-for-money, and increasing styling quotient, is the preferred choice of people from rural areas.
- 5. Growing popularity of engineered/ distressed denim:** The emergence of tattered denim has provided a perfect option for fashion conscious youth. The applications of distressed/ripped/tattered/patched denim are not restricted to bottom wear jeans but can be seen in jackets, shorts, skirts etc. These are emerging as one of the most stylish must haves for both men and women. This trend has been re-emerging in many new avatars every season.
- 6. New denim fabric washes:** In denims, 'wash' refers to shade of the denim fabric. Jeans manufacturers are focused in achieving different hues of blue by washing the fabric in certain dyes, bleaches or other agents that affect the denim colour. Dark indigo, faded blue/vintage/aged, stone wash and distressed jeans are new denim fabric washes in trend these days.
- 7. Changing classification of consumer's wardrobe:** The change in classification of consumer's wardrobe has acted as a growth driver for the casual wear and denim wear in India. Earlier, fashion was considered as a basic need to be purchased on the basis of the requirements. Consequently, the typical consumer wardrobe was limited to basic categories like shirts, trousers, winter jackets and sweaters, sarees and salwar kameez. The basic purchase parameters were limited to the basic functions of the cloth, comfort and price. However, with the changing socio-cultural values, increased per capita consumption, increasing exposure to international fashion trends and growing disposable income apparel market is slowly becoming more occasions specific. Consequently, fashion basket has expanded to include clothing like sports/gym wear, occasion specific ethnic wear, jeans etc.

RELATED TO OUR BUSINESS

THE INDIAN CONTRACT ACT, 1872 (“CONTRACT ACT”)

The Contract Act 1872 codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and the breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement.

INTELLECTUAL PROPERTY LAWS

TRADEMARKS ACT, 1999 (TM Act)

A trademark is used in relation to goods so as to indicate a connection in the course of trade between the goods and a person having the right as proprietor or user to use the mark. The Trademarks Act, 1999, (Trademarks Act) governs the registration, acquisition, transfer and infringement of trademarks and remedies available to a registered proprietor or user of a trademark. Registration is valid for a period of 10 years but can be renewed in accordance with the specified procedure.

As per the Trademarks (Amendment) Bill, 2009, Registrar of Trade Marks is empowered to deal with international applications originating from India as well as those received from the International Bureau and maintain a record of international registrations. It also removes the discretion of the Registrar to extend the time.

PROPERTY RELATED LAWS

TRANSFER OF PROPERTY ACT, 1882

The transfer of property, including immovable property, between living persons, as opposed to the transfer of property by the operation of law, is governed by the Transfer of Property Act, 1882 (“T.P. Act”). The T.P. Act establishes the general principles relating to the transfer of property including among other things identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property.

THE INDIAN STAMP ACT, 1899

However, under the Constitution of India, the states are also empowered to prescribe or alter the stamp duty payable on such

documents executed within the state. Instruments chargeable to duty under the Stamp Act but which have not been duly stamped, are incapable of being admitted in court as evidence of the transaction contained therein. The Stamp Act also provides for impounding of instruments by certain specified authorities and bodies and imposition of penalties, for instruments which are not sufficiently stamped or not stamped at all. Instruments which have not been properly stamped instruments can be validated by paying a penalty of up to 10 times of the total duty payable on such instruments.

TAXATION & DUTY LAWS

THE CENTRAL GOODS AND SERVICES TAX ACT, 2017 (GST)

GST is a single tax on the supply of goods and services, right from the manufacturer to the consumer. Credits of input taxes paid at each stage will be available in the subsequent stage of value addition, which makes GST essentially a tax only on value addition at each stage. The final consumer will thus bear only the GST charged by the last dealer in the supply chain, with set-off benefits at all the previous stages.

INCOME TAX ACT, 1961

The government of India imposes an income tax on taxable income of all *persons* including individuals, Hindu Undivided Families (HUFs), companies, firms, association of persons, body of individuals, local authority and any other artificial judicial person. Levy of tax is separate on each of the persons. The levy is governed by the Indian Income Tax Act, 1961. The Indian Income Tax Department is governed by CBDT and is part of the Department of Revenue under the Ministry of Finance, Govt. of India. Income tax is a key source of funds that the government uses to fund its activities and serve the public. The quantum of tax determined as per the statutory provisions is payable as: a) Advance Tax; b) Self-Assessment Tax; c) Tax Deducted at Source (TDS); d) Tax Collected at Source (TCS); e) Tax on Regular Assessment.

The Professional tax slabs in India are applicable to those citizens of India who are either involved in any profession or trade. The State Government of each State is empowered with the responsibility of structuring as well as formulating the respective professional tax criteria and is also required to collect funds through professional tax. The professional taxes are charged on the incomes of individuals, profits of business or gains in vocations. The professional tax is charged as per the List II of the Constitution. The professional taxes are classified under various tax slabs in India. The tax payable under the State Acts by any person earning a salary or wage shall be deducted by his employer from the salary or wages payable to such person before such salary or wages is paid to him, and such employer shall, irrespective of whether such deduction has been made or not when the salary and wage is paid to such persons, be liable to pay tax on behalf of such person and employer has to obtain the registration from the assessing authority in the prescribed manner. Every person liable to pay tax under these Acts (other than a person earning salary or wages, in respect of whom the tax is payable by the employer), shall obtain a certificate of enrolment from the assessing authority.

VALUE ADDED TAX (VAT)

VAT is a system of multi-point levy on each of the purchases in the supply chain with the facility of set-off input tax on sales whereby tax is paid at the stage of purchase of goods by a trader and on purchase of raw materials by a manufacturer. VAT is based on the value addition of goods, and the related VAT liability of the dealer is calculated by deducting input tax credit for tax collected on the sales during a particular period. VAT is a consumption tax applicable to all commercial activities involving the production and distribution of goods and the provisions of services, and each state that has introduced VAT has its own VAT Act, under which, persons liable to pay VAT must register and obtain a registration number from Sales Tax Officer of the respective State.
